**O**F the two original works forming the subject of the present volume, and of which an English translation is now for the first time submitted to the public, the *MIUT AMIL* or that comprising the text, contains a brief but comprehensive view of the first division of Arabic Syntax, or of that part, which treats of the government exercised by nouns, verbs and particles. The second, or *SHURH*, is a commentary on the former, and illustrates by a more minute and detailed analysis, the various rules recorded in the text, and the general acceptations of the several governing powers.

The first Book is entitled *MIUT AMIL*, or the *HUNDRED GOVERNING POWERS*, because the Author has contrived to reduce to that precise number, the whole of those powers in Arabic construction, which are found to affect the terminations of nouns and verbs. A synopsis of this system may be seen in the commencement of the work, and a brief explanation of its leading divisions will be found in the concluding remarks to the translation; it is unnecessary therefore to enter into any further detail, and I shall merely observe of the title, that although it appears in some degree affected, and is not I imagine altogether strictly correct, yet the general design of the treatise, displays so much skill and ingenuity, and combines at the same time so many excellencies of brevity, order, perspicuity and precision, that it may be fairly considered, on the whole, as the most judicious compendium of Arabic regimen, that has yet appeared in the language.

Those indeed who are fond of simple abstracts of science, will have no reason to complain of the length or difficulty of the *Miut Amil*. It contains in something less than five quarto pages, the most important department of Arabic Syntax, and is almost entirely free from those little verbal quibbles and philological fopperies, which tend more or less to disgrace almost every work on Arabic grammar. The title to be sure carries with it an appearance of superfluous exactness, and some little grammatical finesse will no doubt be discovered in the author's mode of supporting it,\* but this is too petty an objection to merit any remark, it is in truth a mere systematic *capriccio*: a solitary particle out of the great arabian desert of metaphysical refinement, where subtilties,

Swarm populous, un-numbered as the sands,  
Of Barca or Cyrene's torrid soil.

---

\* His method is as follows. He divides regimen into two general classes or departments, termed verbal and absolute. By the first is simply understood the effect that one word has upon the termination of another. By the second is meant that specific mark of case assumed by a noun when used absolutely as the nominative to a sentence. The government in the first instance is termed *verbal*, because, the change of termination is occasioned by some word either expressed or understood. In the second it is called *absolute*, because the word thus governed is considered independent of all verbal agency, and acquires this peculiar form of construction from its nominative situation alone. Verbal government he then subdivides into two distinct classes. The first, comprehends *ninety-one* specific words, which are termed from their nature, *Prescriptive* governors. The second, contains *seven* distinct classes of words, such as verbs, adjectives, participles, infinitives &c. &c. each of which necessarily includes all the words of its own species, and each of these classes he considers numerically as *one*, and terms the whole *Analogous* governors; here then are all the verbal governors in the language reduced to *ninety-eight*, viz. *ninety-one* in the prescriptive, and *seven* in the analogous class, to which if we add *two* in the absolute, we shall have an exact centenary of governing powers.

I know not well what the votaries of the eastern oracles will say to this comparison. I fear they will rise indignant against me for venturing an expression that may tend to degrade the literary eminence of the Arabs: but this is not my intention: I would rather support than lessen their importance. I consider myself in some measure as one of their disciples, and certainly feel respect for their language and literature. But although I freely acknowledge their merits, I will not acknowledge the infallibility of their doctrines, nor voluntarily subscribe to all their grammatical dogmas; their *superlunar* speculations; their metaphysical distinctions ‘twixt south and south-west side;’ and the whole host of fallacies and fictions, with which they perplex and embarrass the most simple subjects of literature. Undoubtedly their works discover both genius and learning, and in the minute cultivation of many sciences, particularly grammar and rhetoric, it may be doubted whether they have been surpassed by the learned of any other nation, but their literary affectation by disfiguring their works, diminishes in a considerable degree the real merit of their labours, and throws so many unnecessary impediments in the way of the student, that it is not very surprising we should find them almost entirely neglected.

One specimen of their solemn mode of trifling in literary works may be worth inserting. The Author of the grammatical treatise termed the Kafeca, for some reason best known to himself, neglected to prefix to his grammar the usual auspicious formula of praise to the deity, the omission of which is considered by the sober Moosulmans as a serious mark of impiety. It was therefore necessary to defend this omission, and accordingly his commentator Moolla Jamee, in the true spirit of casuistical sophistry, settles the point of conscience as follows: “It is observable, ‘says he’ that the Author

## PREFACE.

Shuekh Ibnool Hajib, has not commenced his work with the prescribed ceremonial of praise to the deity. This omission however must not be attributed to negligence or contumely—‘then to what must it be attributed?’ why, to a proper sense of *modest humility* to be sure, which led him to depreciate his own merit as a grammarian, in comparison with those who preceded him, (the grace of God be upon them!) and consequently he thought himself unworthy to imitate their works in *any* respect! but although, continues the commentator, he has omitted the actual insertion of the words, it cannot therefore be inferred, that in direct opposition to the positive injunction of the sacred ritual, he has neglected the ceremony altogether. ‘Oh no!—that would be an unreasonable and unnecessary supposition,’ particularly as we know ‘adds he,’ that it is not restricted to verbal forms alone, but may be virtually discharged in secret, mental aspirations!’ Now this is considered a very conclusive piece of reasoning, and completely exculpates the grammarian from all manner of censure.\*

In speculations of this nature the Arabian grammarians seem to take peculiar delight. One third of the commentary on the Kafeea by Moolla Jamee, consists of subtilties and sophisms, which have very often no more connexion with the science of grammar, than with the science of palmistry. Every trifle gives occasion for an episode, and every episode is ‘*conglutinated* or made up’† of as much recondite erudition, as the learned commentator can well muster together. After defining a word, he ascends synthetically to language as a compound, which comprises he says the language of God, of man, of angels, and

of Genii.\* Lest any one however should be puzzled to find out the true nature of this latter dialect, a learned scholiast comes forward with a specimen,† and another gravely adds, as an infallible proof of its *demoniac* originality, that no human being can pronounce it three times successively at one breathing.

Through this commentary however, this *χάσμα μέγα* of syntax, or some other, of equally ‘crude consistence,’ every student is obliged to ‘swim, or sink, or wade, or creep, or fly,’ who would aspire to any thing

† It is also given in the *Tulkhees-ool-Mistah*, a treatise on Arabic Rhetoric, as a specimen of verbal harshness, and is supposed to have been uttered by a Jin after having killed a traveller in the Arabian desert, whose name was HURB. It turns out however to be very intelligible Arabic, though in—

‘Words so debas’d and hard, no stone,  
Is hard enough to touch them on.’

وَقَبْرٌ حَرْبٌ بِمَكَانٍ قَفْرٍ

Which the reader may compare with the well known line in Homer,

Πολλὰ δ’ ἀνὰ νηῖα, κατὰ νηῖα, παρά νηῖα τε δοχμιά τ’, ἦλθον.

So happily paraphrased by Pope,

O’er hills, o’er dales, o’er crags, o’er rocks, they go;  
Jumping, high o’er the shrubs of the rough ground,  
Rattle the clatt’ring cars, and the shockt axles bound.

like literary distinction. Moolla Jamee is indeed the Priscian of the East, and his comment is considered the very ne plus ultra of grammatical knowledge. Not to have read it, argues absolute ignorance; read it, and you are dubbed at once a Moolla, and a man of learning: such is the wonder-working efficacy of Arabic grammar. It supercedes in a great degree the knowledge of every other art, and every other science, being in fact, if we may credit some of the learned Arabian doctors, the very essence of all the arts and sciences.

But grammar after all in its obvious and natural sense, is truly a simple art, the art of teaching the rules of inflexion and syntax, or the various relations of words to one another in discourse. The rules necessary for this knowledge are neither very numerous nor difficult, and perhaps not more so in Arabic than in other languages, but the Arabian philologists by blending them with the abstract speculations of logic, have effected a new and complex system of grammar, a system which comprises not merely the various relations, but the exact significations and definitions of words; their divisions into genera or classes; their combinations into propositions, and these again into reasoning or discourse. Now all this is the proper business of logic, which is surely a distinct science, yet all this they have in some measure confounded with the simple rules of government and concord, so that a student looking into their works for a plain rule of syntax, finds himself entangled in all the mysteries of metaphysics.

‘ There are some men, says Johnson, who seem to think nothing so much the characteristic of genius, as to do common things in an uncommon manner, like *Hudibras*, to tell the clock by algebra, or like the lady in Dr. Young’s Satires, to drink tea by stratagem; to quit the beaten track only because it is known, and take a new path, however crooked

PREFACE.

or rough, because the straight was found out before :’ this is precisely the case with the Arabian grammarians : they are always employed in raising straws with levers, in illustrating what cannot be misunderstood, in devising difficulties where none ever existed, and in perplexing the simplest rules of regimen and concord with useless subtilties and logical definitions ; but if grammar be a particular art, what has it to do with general and abstract speculations ? A disquisition on symbols and conventional signs, or the origin of general terms,\* will not facilitate a student’s progress in the laws of syntax. These may be important enquiries, but they are not the more so, because conducted in Arabic : they have in truth no more connexion with the language of the Arabs, than with the language of the Troglodytes.

It is indeed amusing to observe the very opposite opinions of learned men on the subject of grammar. Some will have it a *science*, which views language only as significant of thought, and this is philosophical or *general* grammar. Others consider it as a simple *art*, which teaches the inflexion of words, and their due disposition into sentences and phrases, and this is *particular* grammar. A third race of philologists will neither allow it to be general nor particular, but a mixture of both, and this may be properly called *mixed*, or Arabic grammar.

The modern grammarians of Europe consider grammar and etymology as synonymous terms, and with them all languages go upon *wheels*,† but those of Arabia who have no acquaintance with verbal antiquities, reject etymology altogether, and substitute in its place a dash of dialectics, with

which they are acquainted. Here then, are two opposite roads to the same end, and the student may take his choice. Either to adopt the plan of Horne Tooke and his followers, and set about digging for grammar through some dozen or fifteen collateral dialects, or getting boldly on the back of *Synthesis* with Mr. Harris and the Arabian grammarians, gallop circuitously to it, through the whole region of science.\*

In order to learn any language with accuracy and facility, we must first endeavour to learn its rules, or the customary application of its words; these in their simple state, disencumbered of all technical formalities, are seldom difficult and may be easily acquired, but when once perplexed with obscure etymologies and logical definitions, and when every Dyche and Dilworth, who writes a twopenny-halfpenny guide to the eight parts of speech, deems it his duty to work them up into what he calls a *new* grammatical system, then indeed they assume a different character, or rather a variety of different characters, and are not easily acquired at all; the student, finding himself bewildered in the wordy labyrinth, abandons the study altogether, and willingly consigns to the Fates, the whole race of *miserable* grammarians with their *miserable* canons.

Felix grammaticus non est, sed nec fuit unquam,

Nec quisquam est felix nomine grammaticus:

Aut siquis felix præter fatum exstitit unquam,

Is demum excessit grammaticos canones.†

As far however as relates to the present system of Arabic grammar, at least to the technical and speculative part of it, as distinct from the practical, my own opinion is, that it is chiefly, if not entirely derived from

the philosophical writings of the Greeks, and particularly from those of Aristotle, with which the Arabs had been long and familiarly acquainted. They have certainly adopted his analysis of language,\* his definition of the parts of speech,† his reasoning on substance and accident, or Mode,‡ which they have applied to words, under the grammatical denominations of NOUNS and INFINITIVES, and his whole theory of the elements of language as significant of ideas. These are some of the principal topics, which the Arabian grammarians take delight in discussing, and to which, they not improperly attach a high degree of importance, but the merit of originality must be transferred to the Stagyrte, whose dialectics, if I am not much mistaken, will be found to contain the most remarkable facts that distinguish the philosophical grammar of the Arabs.

By ACCIDENT here, and in Arabic grammar, as applied to an INFINITIVE, or اسم حدث is not meant as has been erroneously supposed, any thing casual or fortuitous: but as this is a point of some importance to the true understanding of an Arabic MUSDUR, (for an explanation of which I refer the student to my Annotations on the Commentary, p. 195.) I shall lay before him Dr. Gillies' note on the subject, which will certainly corroborate one material point of my argument. "The Greek word συμβεβηκος is, as far as I know universally translated, "accident;" συμβεβηκοτα in the plural, "accidents," from which, "Accidence," denoting the little book, that explains the properties of the eight parts of speech, is generally held to be a corruption. But accident, in its proper sense of what is casual or fortuitous, has nothing to do with the one or the other; and Aristotle's meaning of συμβεβηκος ought to be expressed by a Latin or English word derived, not from 'accido,' but from, 'accēdo.' See p. 65.

## PREFACE.

Indeed the whole philosophy of the Arabs may be traced to the Greeks,\* whose language and literature they seem to have studied with uncommon ardour, for upwards of five centuries, that is, from A. D. 754 to the taking of Bagdad in 1258. Rhetoric and logic were their favorite pursuits. Averröes, the great commentator, as he is generally called, is known to have paraphrased Aristotle's rhetoric, and Alfarabius is said to have written no less than sixty distinct treatises on the Aristotelian philosophy, which was publicly taught in Bagdad, Bussurah, Koofah, Bocharia, Alexandria, Cairo, Morocco and Fez, as well as in several parts of Spain and Italy; but

\* " See Abulfarag. per Pocock, Dynast. p. 160. Greek was a familiar language to the Arabians. The accounts of the Caliph's treasury were always written in Greek till the year of Christ 715. They were then ordered to be drawn in Arabic. Many proofs of this might be mentioned. Greek was a familiar language in Mahomet's household. Zaid, one of Mahomet's secretaries, to whom he dictated the Koran was a perfect master of Greek. Sale's Prelim. Disc. p. 144, 145. The Arabic gold coins were always inscribed with Greek legends till about the year 400." See WARTON, Hist. Eng. Poet.

particularly in the celebrated *Schola Salernitana*?\* For a detailed account however of the origin and progress of Grecian literature among the Arabs, I refer the student to Warton's 2d Dissertation on the History of English poetry, and Enfield's History of philosophy, from Brucker's HISTORIA CRITICA PHILOSOPHIÆ, a work of considerable merit, though Dr. Gillies is of opinion, that his account of Aristotle's philosophy, is in many parts erroneous, and in some even unintelligible; while others go still farther, and hint that he did not understand Greek! It will there be seen, that the acroatic works of the Stagyrte, were translated, studied and taught by the learned of Arabia, and that to these works in particular, the Arabians seem indebted for all their notions of the philosophical sciences.

---

\* " Their learning, but especially their medical knowledge, flourished most in Salerno, a city of Italy, where it formed the famous *Schola Salernitana*."

It must not be forgot, that they translated Aristotle's POETICS. There is extant "Averrois Summa in Aristotelis poetriam ex Arabico sermone in Latinum traducta ab Hermanno Alemanno; Præmittitur determinatio Ibinrosdin in poetria Aristotelis Venet. 1515." There is a translation of the POETICS into Arabic by Abou Muscharmetta, entitled, ABOTIKA. See Herbel. Bibl. Oriental. p. 18. col. a. p. 971. b. p. 40. col. 2. p. 337. col. 2. Farabi, who studied at Bagdad about the year 930, one of the translator's of Aristotle's ANALYTICS, wrote sixty books on that philosopher's Rhetoric; declaring that he had read it over two hundred times, and yet was equally desirous of reading it again, Fabric Bibl. Gr. xiii. 265. D'Herbelot mentions Aristotle's MORALS, translated by Honain Bibl. Oriental. p. 963. a. See also p. 971. a. 973. p. 974. b. Compare Mosheim. Hist. ch. i. p. 217. 288. Note-C. p. 2, ch. 1. Averrois also paraphrased Aristotle's RHETORIC. There are also translations into Arabic of Aristotle's ANALYTICS, and his treatise of INTERPRETATION. The first they called ANALUTHICA, and the second, BARI ARMENIAS. But Aristotle's logic, metaphysics, and physics pleased them most; particularly the eight books of his physics, which exhibits a general view of that science. Some of our countrymen were translators of these Arabic books into Latin. Athelard, a monk of Bath, translated the Arabic Euclid into Latin, about 1000." Leland. Script. Brit. p. 200. There

It must not indeed be denied, that there are many subjects connected with the arts and sciences, for which the modern nations of Europe are supposed to be indebted to the Arabs. Bossut attributes to them our present system of arithmetical numeration, as well as the first notions of Algebra which are found in Diophantus.\* He gives them the credit of several important discoveries on trigonometrical calculation, and many ingenious improvements and alterations in astronomy.† An Arab in Spain was the first who attempted a theory of refraction and the twilight, which doctrine Malbranch is said to have enlarged upon, but as he does not quote the author, Bossut presumes he was unacquainted with his works. In truth the Arabs seem to have arrived at eminence in almost every science, and even in mechanics, the clepsydra or water clock sent by Haroon Al Rusheed in 799 to Charlemagne, is said to have astonished by its ingenuity the whole of Europe.‡

---

are some manuscripts of it in the Bodleian library, and elsewhere. But the most beautiful and elegant copy I have seen is on vellum, Trinity college library at Oxford. Cod. MSS. Num. 10." Warton.

\* " Cardan considers the Arabs as the real inventors of Algebra. Practical geometry and astronomy owe the Arabs eternal gratitude, for having given to trigonometrical calculation the simple and commodious form which it has at present. Bossut, p. 157.

† Of all the mathematical sciences astronomy is that which the Arabs have most cultivated, and in which they have made the most remarkable discoveries. p. 159.

‡ In the dial of this Clepsydra, were twelve small doors, forming the divisions of the hours, and each of these doors opened in succession at the hour it marked, and let out little balls, which, falling on a brazen bell, struck the hour. The doors continued open till twelve o'clock, when twelve little knights mounted on horseback, came out together, paraded round the dial, and shut all the doors. This machine astonished all Europe, when men's minds were employed chiefly on *futile* questions of Theology and Grammar." Bossut. p. 161.

All this must indeed be granted to the Arabs, but it appears from the united testimony of the learned,\* that their philosophy was entirely Grecian. 'They did not form, says Brucker, a new system, but merely revived the Peripatetic doctrine.' Their logic was the logic of Aristotle, and the common introduction to that science, which is now current in Arabia and India, is a simple translation of the *ISAGOGE* of Porphyry. Aristotle's rhetoric probably led the way to their own, and his logic, when applied to the rudiments of their language, produced that ingenious but intricate and elaborate elementary system, which has perhaps not improperly, been termed philosophical or transcendental grammar.

This then is the origin of the philosophical sciences among the Arabs. Grammar, Rhetoric and Logic or Dialectics, formed the basis, to which if we add Arithmetic, Geometry and Astronomy,† which they also

cultivated with success, we shall find them pursue (with the exception perhaps of music,)\* the exact course of studies, as practiced by the Christian philosophers in the middle age.

---

\* I say with the exception of *Music*, because I am inclined to think that *Music* as a science, was not regularly cultivated in Arabia, though some examples may be produced to prove the contrary. The learned Farabi already mentioned as the translator of Aristotle's *Analytics*, and who was styled the *Coryphæus* of Philosophers, deserves perhaps to be recorded as the *Timotheus* of Arabian Musicians, for his performance on the Lute before Sooltan Syf-ood-Doula, was not inferior to that of the Theban before Alexander. "Il tira, ' says D'Herbelot, ' de sa poche une piece avec toutes ses parties qu'il distribua aux Musiciens, & continuant à soutenir leur voix de son luth, il mit toute l'assemblée en si belle humeur, qu'ils se mirent tous à rire à gorge déployée; après quoy faisant chanter une autre de ses pieces, il les fit tous pleurer; & en dernier lieu changeant de registre, il endormit agreablement tous les assistans." vid. Art. Farabi. *Bibliothèque*. Farabi is said also to have written an introduction to the science of Music, which is mentioned in the *BIBLIOTHEQUE DE TURCHI* of TODERINI. "*Nell' accennata classe di Scienze, che contiene cento e venti due volume, l'ottantesimo secondo scritto nell' Indice è un Trattato di Musica del Farabi intitolato Medchul Musiki, ossia Introduzione alla Musica.*" This valuable work of Toderini's, which seems very little known in India, contains a full account of the Arts and Sciences as known to, or cultivated by the Turks and Arabians, including, their Grammar, Logic, Rhetoric, Moral Philosophy, Arithmetic, Algebra, Geometry, Physics and Natural History, Medicine, Chemistry, Astronomy, Navigation, (*Nautica, e Nuova Accademia di Marina.*) Astrology, Poetry and Music. The work is entitled, *Letteratura Turchesca, Studj, Accademie, Biblioteche e Tipografia in Costantinopoli. Opéra, dell' Ab. Gio. Battista Toderini. Tomo I, II, e III, in Venezia, 1786.* The following extract from this work, relating to the Logic of the Arabs, as copied from the Greeks, will corroborate what I have before stated regarding that science.

*La Logica, che studiano i Turchi è opera di Aristotele, il quale, come notò Gezañ nel suo libro Monked presso Herbelot, è l'inventore, dell'arte del ragionare, ed il primo, ch'abbia ridotto a metodo questa scienza. Oltre il Ketab Aloias le Aristothelu, ossia trattato del Sillogismo d' Aristotele, tradotto nell' Arabo, e diviso in due libri annoverati nel Catalogo*

I have now to offer a few words on the grammatical works here translated, but of their authors unfortunately I know little or nothing. The commentator indeed attributes the *Miut Amil* to Abdoolqahiribno Abdirrihman of Goorgan,\* whom he styles the most excellent of the learned, but he does not say in what age he lived, nor in what his excellence consisted, and we are left to form our own opinion of his merits, from five pages of Arabic syntax! I find his name however in the *Mirat-ool-Junan*,† with a few particulars, which as we have nothing better, we must substitute for a biographical memoir.

Abdoolqahir, surnamed from eminence, ALNUHWEE, or the grammarian, was of the sect of Shafei, and one of the followers of Abool Hussun al Asharee. Besides the *Miut Amil* and *Joomul*, (another introduction to Arabic Syntax,) he wrote a learned commentary termed *Almooghnee*, in three volumes, upon the *EEZAH*, besides several other celebrated works on grammar and rhetoric, and died in the four hundred and seventy-fourth year of the Hejira, or about the middle of the eleventh century of the Christian era. These facts though a little mutilated, and with some addi-

tions, are given in the Preface to Meninski,\* on the authority of Shums-ood-Deen, the author of a commentary on the Joomul, and both these works (the former with a Latin translation,) are said to be deposited in the Escorial in Spain.

Abdoolqahir appears to be the first grammarian, who reduced the governing powers of the Arabic language to a definite number,† and as he lived at a time when Grecian literature of every kind was ardently cultivated in Arabia, and when in fact almost every learned Arab made a merit of studying and copying the philosophical writings of the Greeks, it is not very improbable that the CENTILOQUIUM of Ptolemy,‡ a work, on Astrology, which must have been popular at that period in Arabia, gave him the first hint for the title of his treatise on regimen, and produced the MIJUT AMIL, or HUNDRED governing powers.

The extreme brevity of the text has occasioned many commentaries on the Mijut Amil, but that which usually accompanies it in this country, and which I have here translated, is generally supposed I believe to be written by a native of India. D'Herbelot mentions but one commentary

Obiit anno Hegræ 471. De ling. Arab. xxxiv.

† The author of the first works on Arabic regimen, is said to have been النجیل بن احمد who was born in 100 and died in the year 170 of the Hejira.

by EBN HESCHAM, whose name as a grammarian, he probably confounds with Hoosam-ood-Deen, who is stated in the *Kushf-ooz-Zoonoon*, to be one of the commentators on the *Miut Amil*;\* it is possible however, that D'Herbelot alludes to Shuekh Jumal-ood-Deen Aboo-Moolhummud Yoosoof, who was also known by the name of Ibn Hisham, but as no such commentary is attributed to him, in either of the Biographical works above alluded to, I feel some hesitation in allowing him to be the author of the *Shurhoo Miut Amil*. D'Herbelot† however was certainly but very little acquainted

Pococke speaks of an Historian of that name, ابو محمد عبد الملك ابن هشام obiit anno Hejiræ 213. juxta alios 218. Pococke Spec. Arab. His. p. 362. Meninski also mentions ابن هشام of Cairo who died in 761 Hejiræ.

It may be necessary to inform the student, that Averroes (see p. x.) is corrupted from ابن رشد His entire name is ابو الوليد محمد بن احمد بن محمد بن رشد vid. Hist. Med. et Epit. Yafei. Pococke.

† He calls the *MIUT AMIL*, the Hundred *Particles*! "ABDALCAHER, Grammairien celebre Auteur des Aouamel. Ce livre a été commenté par Ebn Heschâm; Il se trouve manuscrit dans la Bibliotheque du Roy N°. 1086, & a été imprimé à Rome avec la traduction Latine sous le titre de *Centum Regentes*, c'est-à-dire, les cent *Particules* Arabiques, qui regissent après elles des noms de differens cas dans la construction de cette Langue. Ce même Auteur a aussi composé un abrégé du Dictionnaire Arabe de Gianhari, & l'a intitulé *Mokhtar al Selah*, qui se trouve aussi dans la Bibliotheque du Roy N°. 1088. Le nom entier de cette Auteur est M. Ben Aboubcer Ben Abdalcaher al Razi, il étoit natif de la Ville de Rei." Bibliotheque Orientale.

with Abdoolqahir and his writings, and the account he gives of the *Miut Amil* in particular, is a demonstrative proof that he was ignorant of the simplest principles of Arabic grammar.

This is all the information I have been able to collect of the author of the *Miut Amil* and his commentators. Something more might perhaps have been found had I been more industrious, but I confess I did not think it necessary to toss over half the manuscripts in the College Library, for the purpose of adding one or two obscure anecdotes to the life of Shuekh Abdoolqahir. Neither would the search have rewarded my pains, for Biography is a very different thing in Asia from what it is in Europe. There are no *Pater Noster Rows*, nor Cadell and Davies's in Arabia, and consequently there are no Boswells nor Piozzis. A grammarian may write five pages of Syntax there, without having five quarto volumes of *Memorabilia* recorded of him: for who could copy them, or who would read them? The life of an Arabian worthy indeed, is frequently dispatched in a line, and is seldom more entertaining or instructive, than a *hic jacet*, or a village epitaph. 'His name, his years,' with a *ruzeeullaho anho*,\* or a 'holy text' from the Qooran, supply the place, "of fame and elegy," and constitute the brief memorials of a literary career.†

---

\* رَغِي اللّٰهُ عَنْهُ *May God be satisfied with him*, a pious petition, which almost invariably follows the name of the defunct, in Oriental Biography.

† I ought perhaps to apologize for venturing this opinion of Arabian biography, for Sir Wm. Jones, whose authority will doubtless be considered decisive, has given a very different account of the matter. He prefers the biography of *Ibn Khalikán*, not only to that of *Nepos* and *Laertius*, but even to that of *Plutarch* himself; nay he seems inclined to rank the historian above all the biographers of ancient and modern times. '*Nescio an hic omnibus vitarum scriptoribus sit anteposendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundior*, and so on.—To all of which I can only answer, consult the Biography of *Ibn Khalikán*.

Such is the life of Abdoolqahir, as handed down to us by two very popular historians, and the amount of the whole is simply this, that he was an eminent grammarian, that he wrote the Mooghnee, the Joomul, and the Miut Amil, and that he died in the year 474 of the Hejira.

There is no date to the Commentary, nor can I pretend to settle one, I suspect however that it is comparatively modern. The author, at the conclusion of it, speaks of Ibn Malik the grammarian, who died A. H. 672, but if D'Herbelot's information be correct, it will probably give an antiquity of 500 years to the work, as Ibn Hisham is known to have died in 762.

The Miut Amil must be considered as a mere text-book, in which the governing powers of the Arabic language are arranged into appropriate classes, their grammatical offices defined, and their primitive senses illustrated by easy familiar examples. The commentary is an enlarged exposition of the governing powers, after the precise order laid down in the text, for it preserves the same arrangement of the parts, the same definitions of the rules, and the same examples illustrative of the original force of the terms, adding however to the primitive or current senses, the more immediately consequential or secondary acceptations:—Let us explain by an example.

The Preposition **بِ** which is the first, in the first class of grammatical agents, is stated simply in the text, to be a GENITIVE PARTICLE, and one example is subjoined to illustrate its force. The commentator repeats the rule regarding its regimen, but adds its primitive acceptance, which he states to be UNION, and this he considers as two-fold: either *absolute*, as denoting actual coalition or cohesion of parts, or *relative*, as implying proximity or contiguity of person or place. The first he exemplifies by the phrase **يَسْهُدُ** 'He is sick, or sickness is inherent in him.' The latter, by the

sentence مَرَرْتُ بِزَيْدٍ 'I passed by Zued.' He then goes on to define the collateral and accidental significations of this particle, under the various relations of *instrumentality*, *causality* or *causation*, *concomitance* or *association*, *substitution* or *exchange*, *inclusion* or *comprehension*, with some others, which may be seen by refering to the translation, and each of these senses he elucidates by one familiar example.

This is the general mode of analysis, as adopted in the commentary. The words are all considered either separately or in classes, their original and accidental significations defined and illustrated, and their analogous and anomalous syntactical structures pointed out and determined. The etymological formation of some words are occasionally explained, but this is but seldom, and only in particular cases, where words apparently simple, are shewn to be compound, as كَذَا formed from the particle كَاب of similitude and the Pronoun ذَا.

The commentary in short, is a simple introduction, comprising a distinct general view of the essential parts of Arabic regimen and nothing more. To render it however as extensively useful as possible, I have transcribed from the works of several of the most eminent Arabian grammarians, whatever appeared to me best calculated to illustrate the force and application of the several governing powers, and these with my own observations and remarks subjoined to the translation, form a perpetual commentary on the text, which I trust will be found useful.

To these annotations sometimes critical and sometimes explanatory, I have occasionally added others of a more light and miscellaneous nature. They are not indeed of much importance to the work, and might well enough have been omitted, but they amused me at the time of

writing, and may probably amuse others. To extract mirth or humour however out of Arabic grammar, must I am persuaded be looked upon as a hopeless attempt, an attempt perhaps not altogether dissimilar to that on record of certain ingenious people in the Island of *Mateotechny*, who are said to have employed themselves, *in gathering grapes from thorns, and figs from thistles*; or of others, *who pitched nets to catch the wind, and caught—cock lobsters!*\*

The original works from which I have selected the materials for the notes are as follow: SHURHOO WAFEEA,<sup>a</sup> SHURHOO MOOLLA,<sup>b</sup> SHURHOO RUZEE,<sup>c</sup> SHURHOO MISBAH,<sup>d</sup> SHURHOO ALFEEA,<sup>e</sup> QUTR-oon-NUDA,<sup>f</sup> MOO-FUSSUL<sup>g</sup> and the MOOGHINEE-ool-LUBEEB.<sup>h</sup> Of these, the three first are commentaries on the KAFEEA; the first by Ibnool Hajib, the author of

the text ; the second by Moolla Jamee the Poet, and the third by Ruzecood-Deen Moohummud of Astrabad. The WAFEEA though a very valuable work, is perhaps but little read ; the Shurhoo Moolla, as it is generally called, is a logical and argumentative comment on the text, and is every where studied in India, but the commentary by Ruzee (from which indeed the greater part of Jamee's is supposed to be borrowed) is the most voluminous and elaborate of all, and is justly considered a chef d'œuvre of grammatical science,

Of the other works, namely the Shurhoo Misbah, by Taj-ood-Deen Moohummud of Asferan ; the Qutr-oon-Nuda, by Aboo Abdoolla Moohummud Bin Yoosoof Hisham, and the Shurhoo Alfeca, by Shuekh Aboo Moohummud Abdoolla Bin Abdoorrahman, more generally known by the name of Ibn Uqeel, I have nothing particular to offer. They are all popular works in Arabia, and the latter in particular, seems to possess the same rank in Bagdad, as the Shurhoo Moolla does in India, a fact which is certainly somewhat remarkable, as the former is as much famed for simplicity, as the latter is for subtilty. The same may be observed of the Mooghnee-ool-Lubeeb, by far the most useful work on Arabic grammar with which I am acquainted. It has supplied me with almost every thing valuable on the particles,

In order to illustrate with greater effect, the practical applications of these *most subtle parts of speech*, as they are sometimes called, I have added at the conclusion of the annotations on each, an Arabic story, in which the particle will be found to occur under all the senses ascribed to it in the commentary. The natural and popular use of the word will, by this means be better understood, its lighter and more evanescent shades of meaning, rendered more obvious and determinate, and the whole series

PREFACE.

of primitive, derivative and metaphorical acceptations exhibited at one view, in an easy and regular scheme of explication.

I have pursued this plan throughout the volume. A story is appropriated to every preposition, and afterwards to every class of governors consecutively. The words thus explained, are distinguished by figures in the original, that the student may be enabled to compare their use with the explanations given in the commentary, and the whole is accompanied with an easy English version.

The stories thus given, are partly original and partly extracted from books, either printed or in manuscript. Those at the commencement of the commentary, were prepared by Sueyid Uhmud, a learned Arab, of the College of Huneefu, who accompanied me from Bagdad in the year 1812. The sudden and unexpected death however of this most excellent scholar, a few months after his arrival in Calcutta, deprived me, at an early period, of the benefit of his services, and forced me, reluctantly to relinquish the extensive plan of illustration, which he had himself originally proposed, and by which I had hoped to diversify and enliven my commentary, with much curious and interesting matter. This pleasing scheme however was in a great measure prevented by his death. I had no choice of materials, and was frequently obliged to adopt a number of insipid stories, which under other circumstances, I should certainly have rejected. The most entertaining portion of them were supplied me by an ingenious native of Yemen in Arabia, Nathaniel Sabat,\* whose literary talents and acquirements, are well known in India, and for whose useful assistance in this department of my work, I am under considerable obligations.

---

\* At present employed by the Reverend T. Thomason, on a translation of the New Testament into Arabic.

My constant guide and companion in almost every stage of this translation, was Moulvee Umanut-Oollah, a learned native of India, formerly on the establishment of the College of Fort William, and a more able guide or skilful and judicious instructor, I know not well where I could have found.

For the poetical versions of sundry passages from the Arabian poets, which will be found occasionally interspersed through the notes, I am entirely\* indebted to the kindness of my friend Mr. Wilson, the learned and elegant translator of the *MĒGHĀ DŪTA*,† and to Captain Roebuck of the College, who afforded me his assistance in conducting the work through the press, I beg leave to offer my best thanks.

I have no further observations to make on the works here translated, and of the translation itself any observation on my part must be useless; I shall therefore offer none: it may speak for itself or be silent. The typographical errors are indeed rather numerous, and require some apology. I believe they were occasioned in a considerable degree, by the rapidity with which a large portion of the work was hurried through the press, for it is certain, that the greater part of the commentary, with all its appendages of extracts, stories, annotations, &c. were prepared, translated and printed off in something less than five months. I have endeavoured however to rectify these mistakes as well as I could, by a table of *errata*, which will be found in general to consist of little more than transpositions in the *VOWEL POINTS*. The errors in the English part, are not likely to embarrass the student, and I have accordingly omitted to record them.

---

\* With the exception of the paraphrase in page 48.

† Or *CLOUD MESSENGER*, a Poem in the Sanscrit language by *CA'LYDĀ'SA*.

If to the two elementary works contained in this volume, be added the *first* and *fifth* Chapters of the MISBAH,\* or rather perhaps a portion of the HIDAYUT-oon-NUHO, a body of syntax will be formed sufficiently comprehensive for every practicable purpose whatever; but if the student aspires to a higher and more accurate knowledge of the subject, and would understand not only the rules, but the reasons of the rules, with all the delicacies, refinements and peculiarities of this admirable system of speech, I would recommend to him a GRAMMAR of the ARABIC LANGUAGE, by Mr. Lumsden, the Persian and Arabic Professor in the College of Fort William, a work which I am persuaded will be found to exhibit, the most profound and masterly analysis of the language, that has ever been presented to the public.

OF THE HUNDRED GOVERNING POWERS.

ARABIC SYNTAX comprehends AN HUNDRED GOVERNING POWERS, of which some are, لَفْظِيّ or (VERBAL;) and some, مَعْنَوِيّ or (ABSOLUTE.)

Of those termed لَفْظِيّ or VERBAL, there are two CLASSES: The first, سَبَاعِيّ, or the PRESCRIPTIVE GOVERNMENT; the second, قِيَاسِيّ or the ANALOGOUS, which with two of the مَعْنَوِيّ or ABSOLUTE, comprise THE HUNDRED GOVERNING POWERS.\*

---

\* A summary view of the whole MEEUT AAMIL is here annexed.

There are an hundred governing powers in Arabic syntax, of which some are VERBAL and some ABSOLUTE. The VERBAL is divided in two classes, the 1st PRESCRIPTIVE, the 2d ANALOGOUS. The PRESCRIPTIVE, contains 91; the ANALOGOUS 7, and the ABSOLUTE 2, in all 100.

MEEUT AAMIL.

The سَبَّاعِي, or PRESCRIPTIVE government, is divided into *thirteen* CLASSES.

## CLASS FIRST.

النُّوعُ الْأَوَّلُ حُرُوفٌ تَجْرُ الْإِسْمَ تَقَطُّ

The *first* CLASS contains *seventeen* particles, or prepositions, which govern the noun alone in the GENITIVE OR RELATIVE CASE. viz.

بَا، مِنْ، عَنْ، إِلَى، فِي، لَامَ، رَبَّ، عَلَى، كَافَ، مُذْ، مُنْذُ،

The PRESCRIPTIVE is divided into 13 CLASSES.

The 1st class contains 17			{	Prepositions which govern the NOUN alone in the GEN. or RELATIVE case.
2d	—	—	6	{ Particles, govern the NOUN in the ACC. or OBJECTIVE and the PREDICATE in the NOMINATIVE.
3d	—	—	2	{ Particles, govern the NOUN in the NOM. and the PREDICATE in the OBJECTIVE CASE.
4th	—	—	7	Particles, govern the NOUN in the OBJECTIVE CASE.
5th	—	—	4	{ Particles, prefixed to the aorist tense of verbs, change the <i>ruffa</i> of the final letter into <i>nusub</i> .
6th	—	—	5	Particles, prefixed to the aorist render the final letter <i>quiescent</i> .
7th	—	—	9	{ Words, prefixed to the aorist render the final letter quiescent—they possess a conditional or subjunctive meaning, like the particle. ن!
8th	—	—	4	{ Nouns, govern an indefinite noun in the genitive or relative case, when employed as the TUMEEZ or noun of <i>specification</i> .
9th	—	—	9	{ Words, called VERBAL NOUNS, of which 6 govern the OBJECTIVE CASE, and have an <i>imperative</i> meaning; and 3 the NOMINATIVE and have a <i>preterite</i> signification.
10th	—	—	13	{ DEFECTIVE VERBS, govern the NOUN in the NOM. and PREDICATE in the ACCUSATIVE.
11th	—	—	4	VERBS OF PROPINQUITY, govern the noun in the NOMINATIVE CASE.
12th	—	—	4	{ Verbs of PRAISE AND CENSURE, govern generic nouns, with the definite article, in the NOMINATIVE CASE.
13th	—	—	7	{ VERBS OF DOUBT AND CERTAINTY, govern a double accusative, or two nouns in the OBJECTIVE CASE, the second explaining or announcing some thing regarding the first.

The ANALOGOUS GOVERNORS, are 7, and are as follow; 1st *a verb whether active or neuter*.

مَرَرْتُ بِالْقَوْمِ عَدَا زَيْدٍ I passed by (all) the tribe, *except* Zeid.

## CLASS SECOND.

النَّوْعُ الثَّانِي حُرُوفُ تَنْصِبُ الْإِسْمَ وَتَرْفَعُ الْخَبَرَ

The *second* CLASS contains *six* particles, that govern the noun in the ACCUSATIVE OR OBJECTIVE CASE, and the predicate of the proposition in the NOMINATIVE. VIZ.

إِنَّ، أَنَّ، كَانَ، لَكِنَّ، لَيْتَ، لَعَلَّ

### EXAMPLES.\*

إِنَّ زَيْدًا قَائِمٌ Certainly Zeid is a stander.

بَلَغَنِي أَنَّ زَيْدًا مُنْطَلِقٌ { It reached me, or it was known to me, that  
Zeid was *certainly* a goer.

كَأَنَّ زَيْدًا أَسَدٌ As if Zeid were a lion.

قَامَ زَيْدٌ لَكِنَّ أَمْرًا جَالِسٌ Zeid stood, but Amr is a sitter.

لَيْتَ الشَّبَابَ عَايِدٌ Would to God, that youth was a returner.

\* The following are the usual significations of the above six particles. إِنَّ *certainly, verily, truly.* أَنَّ the same. كَانَ *like, as if.* لَكِنَّ *but, nevertheless, &c.* لَيْتَ and لَعَلَّ are used in the sense of *supplication* or *wishing*: the distinction between them is this, that the former is used indifferently to express a wish, whether possible, or impossible of attainment, while the latter is restricted in its application to the first. It may be translated—*perhaps, it may be.*

لَعَلَّ عَمْرًا خَارِجٌ I hoped or perhaps Amr is a goer out.

CLASS THIRD.

النَّوْعُ الثَّلَاثُ حَرَّ قَانٍ تَرَفَعَانِ الْإِسْمَ وَتَنْصِبَانِ الْخَبَرَ وَهُمَا مَا وَلَا  
الْمُشَبَّهَتَانِ بَلَيْسَ

The *third* CLASS contains *two* Particles, that govern the noun in the NOMINATIVE case, and the predicate in the ACCUSATIVE OR OBJECTIVE, viz. مَا and لَا, resembling the imperfect verb لَيْسَ

EXAMPLES.\*

مَا زَيْدٌ فَاضِلٌ Zeid is not a learned man.

لَا رَجُلٌ أَفْضَلُ مِنْكَ There is no man more learned than thou.

CLASS FOURTH.

النَّوْعُ الرَّابِعُ حُرُوفُ تَنْصِبُ الْإِسْمَ فَقَطْ

The *fourth* CLASS contains *seven* Particles, that govern the noun alone in the OBJECTIVE CASE. viz.

الْوَاوُ، الَّيَا، أَيَا، هَيَا، أَيِ، هَهْزَةُ الْمَفْتُوحَةِ

EXAMPLES.†

إِسْتَوَى الْبَاءُ وَالْخَشَبَةُ The water was equal with the wood.

\* مَا and لَا are synonymous negative particles, and are distinguished in their application thus; مَا precedes either a definite or indefinite noun; لَا an indefinite only.

† The objective particle و or wao governing the ACC. CASE, always means with. الَّيَا has an *exceptive*

جَاءَنِي الْعَوْمُ إِلَّا زَيْدًا (All) the tribe came to me *except* Zeid.

يَا عَبْدَ اللَّهِ  
أَيَا عَبْدَ اللَّهِ  
هَيَا عَبْدَ اللَّهِ  
أَيَّ عَبْدَ اللَّهِ  
لَا عَبْدَ اللَّهِ } O servant of God!

CLASS FIFTH.

الْتَّوَعُّ الْخَامِسُ حُرُوفٌ تَنْصِبُ الْفِعْلَ الْبُضَارِعَ

The *fifth* CLASS contains *four* Particles, which being prefixed to the aorist of verbs, change رَفَعَ of the final letter into نَصَبٌ, viz.

أَنْ, لَنْ, كَيْ, إِذَنْ

EXAMPLES.\*

كَرِهْتُ أَنْ تَضْرِبَ } I disliked, or had an aversion to your beating  
(or to this, that thou shouldest beat.)

لَنْ تَفْعَلَ } Thou never will do (or act.)

جِئْتُكَ كَيْ تُعْطِيَني حَقِّي } I came to you, that you might grant me my right.

signification. أَيَّ هَيَا أَيَّا and ا are vocative particles: of which the 1st is used indifferently whether the object is distant or near. The 2d and 3d when the object is distant: the 4th and 5th when the object is near.

\* The particle أَنْ is here called أَنْ مُصَدَّرِيَّةٌ because it gives the verb to which it is prefixed the sense of the *infinitive*. لَنْ restricts the verb to the future time in a confirmed negative sense, كَيْ means cause or motive إِذَنْ synonymous with then, at that time, and restricts the verb to the future time.

أَسَلَمْتُ إِذْنًا تَدْخُلُ الْجَنَّةَ { I embraced the Mussulman faith. (Answer)  
then, you will enter heaven.

CLASS SIXTH.

النُّوعُ السَّادِسُ حُرُوفٌ تَجْزِمُ الْفِعْلَ الْبُصَارِعَ

The sixth class contains five Particles, which being prefixed to the aorist tense of verbs, render the final letter quiescent; viz.

إِنْ، لَمْ، لَمْ، لَمْ، لَمْ

EXAMPLES.\*

إِنْ تُكْرِمْنِي أُكْرِمَكَ If you honor, or respect me, I will respect you.

لَمْ يَضْرِبْ زَيْدٌ } Zeid did not strike.  
لَمْ يَضْرِبْ زَيْدٌ }

لِيَضْرِبْ زَيْدٌ Let him (Zeid) strike.

لَا تَضْرِبْ زَيْدًا Do not strike Zeid.

CLASS SEVENTH.

النُّوعُ السَّابِعُ أَسْبَاءٌ تَجْزِمُ الْفِعْلَ الْبُصَارِعَ عَلَى مَعْنَى إِنْ

\* The Particle <sup>اِنْ</sup> is synonymous with *if*. <sup>لَمْ</sup> and <sup>لَمْ</sup> are negative Particles, distinguished in their application thus. <sup>لَمْ</sup> is used to denote a *simple* <sup>لَمْ</sup> an *absolute negative*, importing that the action was never performed at any past period of time. Examples <sup>لَمْ يَضْرِبْ</sup>  
He did not beat. <sup>لَمْ يَضْرِبْ</sup> He never did beat. For an explication of the Particles in Class the seventh, see the Commentary.

The *seventh* CLASS contains *nine* words, which, prefixed to the aorist, render the final letter quiescent: they possess a conditional or hypothetical signification like the particle *ان* viz.

مَنْ مَا مَتَى مَهْمَا أَيَّ أَيْنَمَا أَنَّى حَيْثُهَا إِذَا مَا

EXAMPLES.

مَنْ يُكْرِمْنِي أُكْرِمُهُ He who honors me, I will honor him.

مَا تَصْنَعُ أَصْنَعُ Whatever you make I will make.

مَتَى تَذْهَبُ أَنَذْهَبُ Whenever you go I will go.

مَهْمَا تَكُنْ أَكُنُ Wherever you are there will I be.

أَيَّهْم تَضْرِبُ أَضْرِبُ Whomsoever you strike, I will strike.

أَيْنَمَا تَجْلِسُ أَجْلِسُ  
أَنَّى تَقْعُدُ أَقْعُدُ } Wherever you sit I will sit.

حَيْثُهَا تَذْهَبُ أَنَذْهَبُ Wherever you go I will go.

إِذَا مَا تَفْعَلُ أَفْعَلُ At the time, or, when you do it, I will do it.

CLASS EIGHTH.

النَّوعُ الثَّامِنُ أَسْمَاءُ تَنْصِبُ عَلَى التَّيْمِيزِ أَسْمَاءُ نَكْرَةٍ

The *eighth* CLASS contains *four* nouns, which govern a general or indefinite noun in the OBJECTIVE CASE, being the *تَيْمِيز* \* or, NOUN OF SPECIFICATION.

\* The word *تَيْمِيز* signifies literally *separation*, *segregation*, and is applied in Arabic Grammar, to denote THE SECOND OF TWO SUBSTANTIVE NOUNS, WHEN EMPLOYED FOR THE PURPOSE OF EXPLAINING SOME UNCERTAINTY, SUPPOSED TO EXIST IN THE PRECEDING NOUN TO WHICH IT IS IM-

The 1st of these is *عَشْرَ*, *ten*, when compounded with *أَحَدَ* *one*, *إِثْنَيْنِ*, *two* &c. as far as *ninety-nine*.

EXAMPLES.

جَاءَنِي أَحَدُ عَشَرَ رَجُلًا (There) came to me eleven men.

The 2d is, *كَمْ* { (How many?), as, *كَمْ رَجُلًا عِنْدَكَ*, How many men are with (lit. near) you?

The 3d is, *كَذَا* { (Some), as, *كَذَا دِرْهَمًا عِنْدَكَ*, You have got some money. (Dirhums.)

The 4th is, *كَايِّنَ* { (Some), or, how many as, *كَايِّنَ رَجُلًا عِنْدَكَ*, How many men are with you?

CLASS NINTH.

الْتَّاسِعُ الْتَّاسِعُ كَلِمَاتٌ تُسَمَّى أَسْمَاءَ الْأَفْعَالِ بَعْضُهَا تَرْفَعُ وَبَعْضُهَا تَنْصِبُ

The ninth CLASS contains nine words, termed *أَسْمَاءُ أَفْعَالٍ* or VERBAL NOUNS, viz. nouns having a verbal signification: of these six have an imperative sense, and govern the noun in the ACCUSATIVE or OBJECTIVE CASE: viz.

رُوَيْدَ , بَلَّهَ , دُونَكَ , عَلَيْكَ , حَيْهَلْ , هَا

PUTED. The cardinal number *أَحَدُ عَشَرَ* (*eleven*) for instance, as exemplified in the text, is the mere name of a certain species of quantity, and therefore incapable of conveying to the mind any other idea than a certain aggregate of units. 'There came to me *eleven*'—eleven what?—men, horses, or dogs? Some word is evidently required to expel the obscurity, or in other words, to separate some specific object from the mass of possibilities, in order to give a determinate character to the sentence: this word the Arabian Grammarians have therefore with analogical propriety termed the *تَبْيِيزُ* or, as it may be rendered in English, THE NOUN OF SPECIFICATION.

*كَذَا* and *كَايِّنَ* are synonymous, the latter however is sometimes used interrogatively.

## EXAMPLES.

- رُوِيَ زَيْدًا أَيَّ امْهَلْ زَيْدًا Release, or permit Zeid to go for a little.
- بَلَّهْ زَيْدًا أَيَّ دَعْ زَيْدًا } Leave Zeid at liberty, i. e. let him do as he pleases.
- دُونِكَ زَيْدًا أَيَّ خُذْ زَيْدًا Seize Zeid.
- عَلَيْكَ زَيْدًا أَيَّ الْزَمْ زَيْدًا } Be sure you continue by Zeid, viz. do not let Zeid go till you have gained your object.
- حَيْهَلْ زَيْدًا أَيَّ ائْتِ زَيْدًا Come to Zeid.
- هَازَيْدًا أَيَّ خُذْ زَيْدًا Take or seize Zeid.

The remaining three, have a *preterite* signification, and govern the noun in the NOMINATIVE: viz.

هَيَّاتَ , شَتَّانَ , سَرَّعَانَ

## EXAMPLES.

- هَيَّاتَ زَيْدٌ أَيَّ بَعْدَ زَيْدٍ Zeid was distant.
- شَتَّانَ زَيْدٌ وَعَمْرٌ } Zeid and Amr mutually separated.
- أَيَّ اقْتَرَفَ زَيْدٌ وَعَمْرٌ }
- سَرَّعَانَ زَيْدٌ أَيَّ سَرَّعَ زَيْدٌ Zeid hastened or made haste.

## CLASS TENTH.

النُّوعُ الْعَاشِرُ أَفْعَالٌ نَاقِصَةٌ تَرْفَعُ الْإِسْمَ وَتَنْصِبُ الْخَبَرَ

The tenth class contains thirteen words, termed أَفْعَالٌ نَاقِصَةٌ or DEFECTIVE VERBS, which govern the noun in the NOMINATIVE, and the predicate in the OBJECTIVE CASE. viz.

OF THE ANALOGOUS GOVERNMENT.

الْقِيَاسِيَّةُ مِنْهَا سَبْعَةٌ عَوَامِلُ

THE CLASS termed قِيَاسِي or ANALOGOUS, has seven governors, and consists of the following parts of speech, viz.

الْفِعْلُ عَلَى الْإِطْلَاقِ A VERB UNIVERSALLY.

الْصِّغَةُ الْبُشْبَهَةُ { A DERIVATIVE ADJECTIVE, OR ADJECTIVE  
NOUN.

أَيْ سَمُ الْبُضَافِ { A NOUN GOVERNING ANOTHER IN THE GENITIVE  
OR RELATIVE CASE.

الْإِسْمُ الْقَامُّ { A PERFECT OR COMPLETIVE noun; viz. a noun  
terminating either in تنوين or, what is con-  
sidered as a substitute for the *tunween*, namely  
the *noon* of the dual or plural number:—or, a  
noun followed by another in the genitive case:  
in all which cases it requires the *Tumeez*, or  
NOUN OF SPECIFICATION.\*

---

\* The government of the above parts of speech will be exemplified in the second book.

OF THE ABSOLUTE GOVERNMENT.

الْمَعْنَوِيَّةُ مِنْهَا عَدَدَانِ

THE CLASS termed مَعْنَوِيَّةٌ or ABSOLUTE, has *two* peculiarities of regimen. Of these, the first requires, in the absence of any verbal governor, the SUBJECT and PREDICATE in the nominative case: the second is the AORIST tense of a verb, which, in the absence of certain governing particles, receives the vowel *Zummu*; or in other words, the final letter of the tense is marked مرفوع .

End of the Meeut Aamil.

At the conclusion of the first book, it may not be unnecessary to offer a few general observations, on the nature, divisions and peculiar distinctions of THE HUNDRED GOVERNING POWERS, a clear and comprehensive conception of which will tend to facilitate, in a considerable degree, the future progress of the student.

The subject of the MEEUT AAMIL, is grammatical regimen, or government; and is defined to be that part of Syntax, which regulates the dependency of words, and the alterations which one occasions in another.

This is divided into two general classes or divisions: the first termed VERBAL, or the relative or dependent government; in contradistinction to the second, which flows from the sense, and is therefore properly ABSOLUTE or independent.

In the VERBAL or relative, the word governed necessarily depends on, or is influenced by, some other word in construction: the ABSOLUTE is totally independent of all such influence, having the intrinsic power of assuming a certain grammatical character, or indication of case, which in the Arabic language is invariably NOMINATIVE.

For it must be remembered, that in this language, there is a state in which nouns are found to exist, before they are distinguished by any marks of annexation, or indications of case, such for instance as the word زيد (deprived of the *tunween*,) which is considered the primary, or radical form of the noun, and must necessarily be connected with some other word in construction, before it can assume any grammatical character, indicative of case. The nominative therefore, which always denotes a certain specific relation, is distinguished by a termination or mark of inflection, significant and peculiar to itself, superscribed over the final letter of the noun in its radical form, as قام زيد—Zeid stood.

Under the first species of government, namely the VERBAL, or relative, are included two distinct classes, or the PRESCRIPTIVE, and ANALOGOUS. Of these, the first relates to a certain specific number of words, the government of which is settled and authorized by long usage and custom; while the latter is restricted to the government of a certain class of words, in which you reason by analogy from one to another, and consequently, determine their influence in speech to be every where regular and uniform.

The second form of government, which has been translated ABSOLUTE or independent, is of a twofold nature. The first governing the SUBJECT and PREDICATE: the second the AORIST tense of a verb, which is said to resemble in sundry particulars a noun, and, in the absence of any verbal governor, assumes the vowel *Zummu*, viz. the final letter of the tense is marked مرفوع. These peculiarities of regimen have been variously accounted for by grammarians, and shall be noticed in their proper place. The government, in both instances, is said to flow from the sense, and to be totally independent of any other word in construction, and seems therefore to resemble that case, in the greek language, which certain grammarians have termed the NOMINATIVE ABSOLUTE.

The above remarks will perhaps be sufficient to convey a general idea of Arabic government. For a more minute and particular analysis of the subject, together with the various significations and peculiarities of the hundred governing powers, the reader is referred to the commentary on this book.

شَرْحُ مِائَةِ عَامِلٍ

SHURHOO MI,UT AMIL,

OR A

COMMENTARY

ON THE

HUNDRED GOVERNING POWERS.

BOOK II.

INTRODUCTION.

THE author of the MI,UT AMIL\* enumerates in Arabic syntax one hundred governing powers, of which some are لَفْظِيّ or VERBAL,† and some مَعْنَوِيّ OF ABSOLUTE.

\* The grammatical treatise termed مِائَةُ عَامِلٍ MI,UT AMIL, on which the present work is a Commentary, contains agreeably to the literal meaning of the title, one hundred governing powers: these are divided into co-ordinate and subordinate classes, with reference to their general and particular offices, and the author with an ingenuity characteristic of the systematic refinement of an Arabian grammarian has reduced the whole to an exact centenary of governing powers: in this he was doubtless as much influenced by numerical symmetry, as logical or grammatical precision, but the arrangement is convenient and sufficiently accurate for all useful purposes.

† لَفْظِيّ and مَعْنَوِيّ are relative nouns, from لَفْظٌ utterance, or vocal expression, and مَعْنَى signification, meaning. The first signifies literally, verbal, and denotes that the government to

BOOK SECOND.

The VERBAL government is subdivided into two general classes, the first named PRESCRIPTIVE سِبَاعِي \* the second ANALOGOUS قِيَاسِي. The PRESCRIPTIVE includes *ninety-one*, the ANALOGOUS *seven*, and the ABSOLUTE *two*, forming on the whole, one hundred grammatical agents or governing powers.

OF THE GOVERNMENT TERMED سِبَاعِي OR PRESCRIPTIVE.

THE PRESCRIPTIVE GOVERNMENT IS DIVIDED INTO *thirteen* CLASSES.

## CLASS FIRST.

The *first* CLASS contains *seventeen* PARTICLES OF PREPOSITIONS, which simply go-

---

which it is applicable is influenced by *words*. The second on the contrary as its name imports has, no reference to words, but relates merely to *sense*: the one is *extraneous*, the other *intrinsic*, and both seem properly enough designated by our own grammatical terms, VERBAL and ABSOLUTE.

\* From the infinitives سَمِعَ *hearing*, and قَيَّاسَ *rationation*, سَمْعِيَّةٌ, are formed the relative nouns سِبَاعِي and قِيَاسِي the former of which, as applicable to all irregular grammatical agents, may be termed PRESCRIPTIVE, or as this class of irregular governors are more literally denominated by AGAPITI À VALLE, AUDIBILIA, *quia à magistro audienda*.\* They may properly be considered as exceptions to the general class of regular governors, and are accordingly restricted in number to *ninety-one*. The analogous classes will be illustrated in their proper place, and it therefore only remains to be remarked, that the government of the particles extend to all the cases, while some of them possess the peculiar property of changing the رَفْعُ of the final letter of verbs, into نَصْبٌ and others that of affecting the sound of the terminating letter, with the mark جَزْمٌ. These distinctions seem to correspond with the *antithesis* and *apocope* of European languages and should therefore agreeably to our notions of grammar, be rather included in the rules of prosody than inflexion.

vern a noun in the AORIST CASE. They are called حُرُوفُ جَارَّةٌ OF PARTICLES OF ATTRACTION. \*

\* They are called PARTICLES OF ATTRACTION, because they are said to attract the sense of the antecedent word to the consequent, pointing out at the same time the relation subsisting between both, and for a similar reason are also termed حُرُوفُ الْإِضَافَةِ or CONNEXIVE particles. They are applied like the prepositions of other languages in a two-fold capacity; Κατὰ παράθεσιν by way of *juxta position*, and Κατὰ σύνθεσιν by way of *composition*; viz. some of them are separable, and some inseparable. They invariably render the governed word مُجَرَّرٌ *MUJROOR*, which some grammarians have rendered the GENITIVE case, but what it may be asked in the genitive case? 'le fils aîné du romanitif,' says Du Marsais,\*—the eldest son of the nominative! 'and is formed to express all relations commencing from it itself,' says Harris, in contradistinction to the dative, which expresses 'all relations tending to itself.' If this be the true character of the genitive, it is obvious it cannot be applicable to the term *mujroor*, as the prepositions مِنْ *from* and إِلَى *to*, govern the same case, though the relations they are formed to denote, are directly opposed to each other. If the metaphorical or rather whimsical language of the French grammarian be admissible, it must be allowed that the claims of this case to hereditary pre-eminence are much superior to those of the *fils aîné*, as it may be said to inherit a sort of *trinal* consanguinity, or *triplicity* of filiation possessing in itself a complex cognation, with its progenitor the nominative, which includes not only the rank and powers of the *eldest son*, the genitive, but of the two *younger* also, the dative and ablative.

It might perhaps be called the RELATIVE CASE, if it were not that every case is strictly speaking relative, a case being generally defined by grammarians—the *special difference in a noun*, according to the different relations that things bear to one another; yet the *Messieurs De Port Royal* who copied this definition from Sanetius,† have strangely enough, and almost in the same page restricted the term, relative to the dative. On a question however merely nominal it is not necessary to be captious:—*in re levi nolumus esse morosi*;—the arbitrary distinctions of language have no essential connexion with the operations of words; the name is seldom found significant of the office. But although 'the equality of words to things be often neglected,' it seems necessary in technical appellations to be as precise as possible:—to the two first terminations or cases of an Arabic noun, the terms NOMINATIVE and ACCUSATIVE are sufficiently applicable, but the compre-

## OF THE PARTICLE OR PREPOSITION,

باء

THE PREPOSITION <sup>باء</sup> signifies *union*, or *coalescence*, <sup>إلصاق</sup> in a two-fold manner:—

$\left\{ \begin{array}{l} \text{Absolutely, حَقِيقَةً, as يَدَاء} \\ \text{Relatively, حُكْمًا, as مَرَرْتُ بِزَيْدٍ} \end{array} \right.$	He is sick, or diseased, <i>lit.</i> in him is disease: I passed by Zued; <i>in other words</i> ,

ensive and indefinite character of the one in question, which comprises virtually the various powers of the genitive, dative and ablative, seems to require a name of correspondent import; I shall therefore hazard an innovation, and term it in future the **AORIST CASE**.

From the etymology of the word **case**, grammarians have pretended to explain its properties. **CASE** they say comes from *casus* à *cadere* to fall, like the Greek *Πτῶσις* from *Πιπτεῖν*—*words following* (as it were) *from the mind or discursive faculty*.\* This is fanciful enough, and worthy the ingenuity of Harris, and his friends the Peripatetics. But what authority is advanced for supposing, that words when first applied as terms of art, were applied in their primitive rather than in their consequential or metaphorical significations? There is no authority for such a supposition, but authority directly against it. The word *casus* in Latin is considered synonymous with *eventus* and *exitus*, and has many other senses besides its literal one:—*case* in English is never used in its original import, and Aristotle† himself applies *Πτῶσις* to the variations of the noun and verb, not only to what we term *declension* and *conjugation*, but even to the singular and plural *number*. But this is not a work for minute discussions on grammatical subtleties and verbal peculiarities, I shall therefore conclude with observing that the

2. It denotes *instrumentality*, (اِسْتِعَاذَةً) \*

EXAMPLE. \*

كَتَبْتُ بِاَلْقَلَمِ I wrote *with* a pen.

3. It is occasionally used in the sense of (تَعْلِيلٌ) *causality*, or *causation*.

EXAMPLE.

اِنَّكُمْ ظَلَمْتُمْ اَنْفُسَكُمْ { Verily you have injured your souls by your

God.

same idea is expressed in Arabic by the word *حَالَةٌ*, meaning familiarly *state*, *case*, &c. which a fanciful grammarian after the usual mode of etymological retrogradation might trace to the verb *حَالَ* he turned, inverted or declined, and hence argue that the term was thus significantly applied in grammar, to express the *variations*, or *declensions*,\* “of a noun from its *upright form* (حَالَةٌ رَفِيعٌ) through its various *declining forms*.” (حَالَةٌ خَفِضٌ) This is quite as plausible a derivation as the other, but I am persuaded it never entered the mind of an Arabian Grammarian. Who would not smile to hear a physician etymologize on the word *case*, and inform his Patient, that it signified literally *falling*, implying as it were the *decline* or *fall* of his health from its *upright form*?—Yet the physician’s etymology is every way as good as the grammarian’s; or rather they are both good for nothing.

\* اِسْتِعَاذَةً from اَسْتَعَاذَ literally asking or demanding assistance.

## COMMENTARY.

4. It denotes *concomitance*, (مُصَاحَبَةٌ)

### EXAMPLE.

اِشْتَرَيْتُ الْفَرَسَ مَعَ سَرْجِهِ I bought the horse *along with* his saddle.

5. It has another property termed (تَعْدِيَّةٌ) and is that, by which a *neuter verb* is rendered *transitive*.

### EXAMPLES.

ذَهَبَ اللَّهُ بِنُورِهِمْ God took away their light, i. e. he blinded them.

أَذْهَبْتُ زَيْدًا I took or carried away Zued, *equivalent to* أَذْهَبْتُ

6. It denotes *substitution or exchange*, (مُتَابَلَةٌ)

### EXAMPLE.

اِشْتَرَيْتُ الْعَبْدَ بِالْفَرَسِ { I bartered the horse *for* the slave, or *lit.* I purchased the slave *in exchange* for the horse.

7. It denotes *swearing*, (قَسَمٌ)

### EXAMPLE.

بِاللَّهِ لَا فَعَلَنْ كَذَا By God, I will certainly do so.

8. It denotes *inclusion*, or *comprehension*, (ظَرْفِيَّةٌ)

EXAMPLE.

زَيْدٌ بِالْبَلَدِ Zued is in the city.

9. It is used as a mere expletive or redundant particle, (زِيَادَةٌ)

EXAMPLE.

وَلَا تُلْغُوا بِأَيْدِيكُمْ إِلَى التَّهْلُكَةِ Do not imbrue your hands in slaughter.

Annotation.

Grammarians have assigned various other relations to the particles بِا besides those enumerated in the text, but they seem all correlative and may be traced to the primary signification or generic idea denoted by the term, الصِّقْ

The radical import of this particle is therefore UNION, whether *absolute* or *relative*.

*Absolutely*, it denotes positive or immediate union or co-alescence.

*Relatively*, it implies simple relation of vicinity or proximity of place.

From the generic idea of union flow several specific relations, which may be translated by the following English prepositions.

1. *With*, denoting the instrument or agent, which is expressed in Latin by the ablative case as كَتَبْتُ بِالْقَلَمِ. Scripsi calamo.

2. *By*, or *on account of*, denoting the efficient or final cause, the means by which any thing is performed; also in swearing.

3. *Along with*, association, society, or connexion.

4. *For*, in exchange of.

5. *In*, denoting the relation between the object contained and that containing it.

It corresponds very nearly in all its relations with the English preposition *by*.

## STORY.

The various uses of this particle, together with the *Cæcus amor sui*, or tympany of self conceit are illustrated in the following Story.—The Figures point out their application as explained in the Text.

## S T O R Y.

A silly fellow observing one morning that his house was ready to tumble about his ears from decay, and being destitute of the means of repairing it, went with a long face of rueful cogitation to his wife, and informed her of his miseries. Now the wife was just as great a noodle as himself,—so says she, why, my dear distress yourself about a trifle? You know you have got a cow worth thirty dirhums, take her to the market and sell her for that sum, I have also some thread which I will dispose of to-day, (and between us both we shall raise the wind I warrant it.)

The man instantly rose up, drove the cow to the market, and delivered her over for sale to the public appraiser of cattle. The salesman shewed her to the bystanders; directed their attention to all her excellent points,—expatiated on her numerous good qualities, and in short puffed her off as a cow of inestimable

value:—to all this the wiseacre listened with delight and astonishment;—he heard her praised for qualities that he thought no other cow could possess, and determined in his own mind not to lose so rare a bargain, but purchase her himself and baulk the chapmen; he therefore called out to the appraiser, and asked him at what she was going, he replied at fifteen dirhums and upwards. By the head of our Prophet says the Cappochia, had I known before that my cow was such a prodigy of excellence, you would not have caught me in the market offering her for sale. Now it happened that he had just fifteen dirhums, and no more;—these he thrust upon the broker, exclaiming—the cow is mine—I have the best claim to her! He then seized her, and drove her home, exulting all the way, as if he had found a treasure. On reaching home he enquired eagerly after his wife to inform her of his adventure, but was told she had not returned from market. (There was no remedy but patience, *which he despised*, so he sat biting his nails in the last stage of the *Fidgets*.)—At length she appeared, and he sprung up to meet her exclaiming,—wife I have done something to-day, that I believe will astonish you!—I have performed an exploit, that would do honor to the first genius of the age. Patience says his wife;—perhaps I have done something myself to match it;—however hear my story first and afterwards talk of genius if you please. The husband desired her to proceed. When I went to market, says she, I found a man in want of thread;—I shewed him mine, which he approved of, and having bargained for it, he agreed to pay me according to the weight. I told him it weighed so much, which he seemed to discredit, and weighed it himself:—observing it fall short of the weight I had mentioned, and fearing I should lose the price I at first expected, I requested him to weigh it over again and be certain:—in the mean time taking an opportunity unobserved, I slipped off my bracelets, and put them slyly into the scale with my thread.—The scale of course preponderated and I received the full price demanded. Having finished her story, she cried out—What think you now of the genius of your wife!\* (It must be

recollected says the historian, that the bracelets were of silver and double the value of the thread.) Amazing, amazing, says, the Booby, your capacity is truly supernatural!\* and now, if you please, I will give you a specimen of mine, and he related the adventure as above.—Oh husband says the woman, the almighty has favored us in this affair—had we not possessed such consummate wisdom and address, how could we have contrived means to repair our old house? In future therefore annoy yourself no more about *domestic concerns*; for the Lord is merciful. On my part I shall continue to exert my abilities, and do you the same, and by our mutual talents and dexterity, it is impossible we can want for any thing.

---

\* <sup>و</sup>لله <sup>د</sup>رفق a sort of encomiastic exclamation of very frequent occurrence in Arabic, and much easier to comprehend than translate. The word <sup>د</sup>رفق signifies literally *flowing out exuberantly*, as milk from the udder, &c. and was hence transferred to denote *bounty*, or *liberality*, as <sup>د</sup>رفق <sup>د</sup>رفق <sup>د</sup>رفق *your bounty flows liberally*, and laterally to signify *natural capacity*, indoles &c. The phrase means literally—*your flow of milk is by or through God*. i. e. your capacity is divine or supernatural.

The few liberties taken with the original will be readily pardoned by the Arabic Scholar, and to any other class of readers it would be useless to offer explanations. The extreme brevity, simplicity, and terseness of the original diction cannot I believe be preserved in our English Idiom; but the solemn gravity of the dialogue defies all power of imitation.

OF THE PREPOSITION.

مِنْ

1. THE PREPOSITION مِنْ is used to denote the *Commencement of Interval* (ابتداء الغاية) \* as applicable to time and space.

EXAMPLES.

سَرْتُ مِنْ ابْصَرَةَ إِلَى الْكُوفَةِ I travelled from Busruh to Koofuh.

نَهَيْتُ مِنْ أَوَّلِ اللَّيْلِ إِلَى آخِرِهِ } I slept the whole night, *lit. from the beginning*  
to the end of it.

2. It is used in the sense of *partage*, or *participation*, (تَبَعِيضٌ)

EXAMPLE.

أَخَذْتُ مِنْ الدَّرَاهِمِ I took some of the Dirhums.

Annotation.

\* The phrase ابْتِدَاءُ الْغَايَةِ would signify literally *the beginning of the end*, a sort of phraseology not likely to convey much information; but the Commentators explain this oxymoron, by asserting that the word غَايَةً by a\* synecdoche is here synonymous with مَسَافَةً space or interval.

The word *interval* which was originally applied to space, is considered by Dugald Stewart in his *Philosophical Essays*, as now exclusively restricted to time;—whatever may be the case *now* (which by the by is a very indefinite term,) it certainly was not so restricted by writers in the two last centuries. It is useless to multiply examples, but with following one from Milton, every reader is acquainted.

"Twixt host and host a narrow space was left,  
A dreadful interval."

\* الأمرُ ادُّبَالُ الْغَايَةِ الْمَسَافَةِ أَطْلَاقًا لِاسْمِ الْحِزْمِ عَيْنِ الْكَلِّ } By the word غَايَةً is meant مَسَافَةً expressing  
the name of a part for the whole. See the Commentary on the KAFEE by MOOLA JAMEE.

## COMMENTARY.

3. It denotes *explication*, or *elucidation*, (تَبْيِينٌ)

### EXAMPLE.

فَاجْتَنِبُوا الرِّجْسَ مِنَ الْأَوْثَانِ أَيِ } Abstain from abomination, (*namely*) the abo-  
الْأَوْثَانِ الَّذِي هُوَ الْأَوْثَانُ } mination of idols.\*

### Annotation.

Besides the above applications of the particle مِنْ there are a great variety of others, the whole of which the Arabian Grammarians deduce from the primitive idea *Beginning*.

The present work will not admit a detail of these various senses; I shall therefore merely notice those of most frequent occurrence.

The particle مِنْ denotes *Causation*, as in the following lines of the Poet FURUZDUG, in praise of ZUEN-ool-ABIDEEN.

يَغْضِي حَمَاهُ وَيَغْضِي مِنْهُ بَنَاتُهُ } Through modesty he bends his looks on the ground;  
فَمَا يَكَلِّمُ إِلَّا حِينَ يَسْتَسِمُّ } the people do the same from awe of him; and no man  
dares to speak but when he smiles.

It is synonymous with the particle مِنْ as زَيْدٌ أَفْضَلُ مِنْ عُمَرَ Zued is more excellent than UMR, which agreeably to the authority of the Grammarian ابْنُ مَالِكٍ IBNO-MALIK, is equivalent to the phrase زَيْدٌ جَاوَزَ عُمَرَ فِي الْفَضْلِ Zued surpasses UMR in excellence.

It is used for عَلَى as نَصَرْنَا عَنْ الْقَوْمِ —We assisted him *against* the tribe.

It is used in a peculiar sense to denote *termination*, *bound*, or *limit*, the very opposite of its original signification;—example, رَأَيْتُهُ مِنْ ذَلِكَ الْمَوْضِعِ I saw him *from* that place, or I saw him *to* that place; viz. to the very extent of vision, as we say in English, I saw him *from afar*. The correspondent preposition DE, in the French language is used in a similar manner to denote opposite relations, as

Approchez-vous DE ce poêle, vous vous chaufferez.

Eloignez-vous DE ce poêle vous vous brûlerez.

\* In the Latin translation of this example, the preposition *ex* has the same force as مِنْ e-g.  
Recedite ab abminatione ex idolis.

4. It is *redundant*, (زِيَادَةٌ)

EXAMPLE.

يَغْفِرُ لَكُمْ مِنْ ذُنُوبِكُمْ He (God) will pardon your sins.

Annotation.

The particle <sup>ا</sup>مِنْ as illustrated in the Text, may be translated as follows :

1. By the preposition *from*, denoting *commencement*.

2. *Some, part, &c.* denoting *partage* and also by *of*;—as we say in English I took *of*, or *from* them; viz. I took *some* of them. In this sense it is always synonymous with <sup>بَعْضُ</sup>بَعْضُ.

3. *Namely, to wit, &c.* in the sense of *Elucidation*: in such examples the relative pronoun in Arabic may be substituted for the particle. The above senses will be found illustrated in the following Story :

حِكَايَةٌ

خَرَجَ الرَّسَيْدُ مِنْ دَارِ حُكُومَتِهِ يَوْمًا مَعَ جَعْفَرِ الْبَرْمَكِيِّ وَزِيرِهِ

لَهُ جَعْفَرُ إِنِّي تُرِيدُ يَا شَيْخُ قَالَ لَا يَهْبُتُكَ ذَلِكَ قَالَ أَلَا أَدُلُّكَ عَلَى شَيْءٍ تَدَاوِي

'The Calif Haroon Rusheed and his minister Giaffar the barmecide, intent one day on a frolic, strolled out of Bagdad together in disguise. A little way out of the city, they happened to meet an old man with sore eyes, driving along an ass. The Calif gave a wink to Giaffar to smoke him. Where are you bound, my old man says Giaffar? That is no concern of yours replied the other—What says Giaffar, not allow me to prescribe something for your eyes?—I want none of your prescriptions, rejoined the old fellow. Nay, don't say so, says Giaffar, you do require it, *and this is the recipe.* Take a little *wind-wood*, a quantity of the *dust of water*, and some *mushroom leaves*,\* these having well mixed up together in a nut-shell, apply to your eyes, and you will find immediate relief. Upon this, the old man reclined backwards upon his ass, and—βροντᾶ κομιδῇ παπᾶζ.† So much learned doctor, says he, for your description of the *wind-wood-eye-salve*; and if I find it benefit me you shall have a double fee. The Calif was so delighted with the repartee, that he was nearly falling off his horse with laughter.

\* This is nearly as fanciful a collection of heterogenous ingredients as those in the thunderbolts of Jupiter—"Three rays of twisted showers, three of watery clouds, three of red fire, and three of winged south winds; with terrific lightnings, sound, fear, anger, and pursuing flames, mixed up in the work."

† This may perhaps be called an obscure paraphrase, but I found it difficult to express the bathos of the original, without descending to the oracular language of Giacoma Rodogina, the engastrymythian prophetess. The French Nuns in the scrupulous chastity of their dialect, have prettily termed it *sonnet*, but our language admits of no such happy refinement, I was therefore compelled to have recourse to the words of STREPSIADES in the CLOUDS. OF THE PREPOSITION,

عَنْ

THE PREPOSITION عَنْ denotes *distance* and *transition*, (بُعْدٌ وَمُجَاوِزَةٌ)

EXAMPLE.

رَمَيْتُ السَّهْمَ عَنْ الْقَوْسِ I shot the arrow *from* the bow.

Annotation.

THE PREPOSITIONS مِنْ and عَنْ which seem formed to denote ideas radically distinct and inconvertible, do notwithstanding very frequently occur as synonymous terms, and as such act reciprocally in composition without any injury to sense or idiom. Of these, the preposition مِنْ, is certainly represented in our language by *from*, which in common with its prototype is said to refer to *beginning*, and to nothing else; but for عَنْ denoting *distance* and *transition*, where shall we find an adequate representative? This question has already been considered by Mr. Lumsden in his Persian Grammar, and after an attentive examination of the subject, he decides with his usual judgment and discrimination in favor of the preposition *off*. The particle عَنْ as explained in the Text, is unquestionably represented by *off*, for both are said to denote *distance*, and *separation*,\* but the former is used in a multiplicity of relations, widely differing from the radical sense and from each other, and the latter seems restricted in its application to the two significations above mentioned, namely *distance* and *separation*,† so that the parity seems merely of an etymological nature, and will it is feared tend little to illustrate the singular powers of the Arabic preposition.

عَنْ in Arabic is used in a threefold capacity.

\* OFF separationem significat, ut aliquando Latinorum *abs, ex*; ut *abscondo, exuo*; cui opponitur ON continuationem innuens, (*exuo to put off, induo to put on.*) Ioannis Wallisii Gram. Lingue Anglicanæ.

OFF signifies *separation* and *distance*. Royal Eng. Gram. by Greenway.

† OFF in truth appears the most useless preposition in the English Language and might perhaps be entirely dispensed with: as an Adverb indeed it is of greater importance and signifying in this character, *Disjunction, absence, privation* and *distance*, may perhaps approximate nearer to the various powers attributed to عَنْ.

Annotation.

1. It is placed before verbs in construction, and is termed **عَنْ صَدْرِيَّةٌ** bestowing on the verb to which it is prefixed the sense of the infinitive.

2. It occurs as a noun, and in this sense is considered synonymous with **جَانِب** *side*, &c.

3. It is a preposition, and in this character has ten different applications; at least this is the opinion of the Grammarians of Busruh, for the rival schools of Koofuh allow it no other signification, than that of <sup>19</sup>مَجَاوِزَة, *transition*, which is the strict sense of the term though perhaps *separation*, may be also indirectly inferred. The following example from the history of Tamerlano will shew the force of the word جَاوَزَ مَجَاوِزَةَ بَنِي إِسْرَءِيلَ الْبَحْرَ <sup>199</sup> "They passed it (the river) like the *passage* of the children of Israel through the Red Sea."

1. The preposition <sup>١٩</sup>عَنْ denotes *distance* and *transition*, (مَجَاوِزَةً) and may be then translated *off, out of, from, from out.*

2. It denotes *exchange*, ( $\mathfrak{J}_{\mathfrak{S}_1}$ ) answering to ———— for, in exchange of, &c,

3. It denotes *exaltation*, (עָלָה) ————— on, above, over,

4. It denotes causation, (تَعْلِيلٌ) ————— through, by, from, &c.

6. It is synonymous with  $\hat{\Delta\pi}_j$ , \_\_\_\_\_ after.

6. It denotes *inclusion* or *comprehension*, (ظرفية) \_\_\_\_\_ in.

7. It is synonymous with <sup>^</sup>cr \_\_\_\_\_ *from.*

8. It denotes instrumentality, (ᄃᆞᆫᆫᆫᆫ) ————— with, by.

9. It is synonymous with set with, &c.

10. It is *redundant*, (زِيَادَة)

To the whole of these various senses, with the exception of the first, the preposition *off* seems totally inapplicable. The extensive character of *from* may render it a more general substitute in translation, but it will be found defective in several of the examples and must call in the assistance of other particles.

### Annotation.

The radical distinction therefore between <sup>أ</sup>من and <sup>ع</sup>من, with their occasional correspondence, and idiomatic peculiarity, do not appear sufficiently illustrated by any two particles in our language: The Greek however will afford a nicer parallel, on which though a matter of mere curiosity, I may be permitted to offer a few remarks.

The preposition ἀπὸ and ἐκ are radically distinct in signification, and like <sup>أ</sup>من and <sup>ع</sup>من are occasionally substituted for each other. In composition ἀπὸ as well as <sup>أ</sup>من is said to denote *source* or *origin*, and ἐκ from *ἐκκα*, *cedo*, is analogous to *transition*. The first will be found applicable to every use of <sup>أ</sup>من, the latter will be illustrated by the following examples.

- \* 1. ἐκ, like <sup>ع</sup>من is synonymous with *after*, as  
ἐκ τῆς ὑπατείας i. e. *post* consulatum.
2. ἐκ, like the 9th sense of <sup>ع</sup>من means *with*, as,  
ἐκ πολλῆς τῆς περιουσίας i. e. *cum* ingenti excessu. or as the French say, *avec* beaucoup d'avantage.
3. ἐκ resembles <sup>أ</sup>من in its 4th signification, as,  
ἐκ τούτων i. e. *propterea*, *ob* eas causas.
4. ἐκ like <sup>ع</sup>من is frequently used adverbially, as,  
ἐκ τῆς Φανεῖας, i. e. *palam*—like the Arabic <sup>أ</sup>من قصد
5. ἐκ is sometimes explained by the ablative, as,  
ἐκ θαλάσσης i. e. *per* mare. ἐκ τούτων τῶν λόγων *hac* ratione.

This sense though peculiar will be found frequently to occur in Arabic: the following example however from the law case proposed to Abou Zued in the fifteenth Muqam of HURENNE may be sufficient.

رجل مات <sup>أ</sup>من أخه Which would be translated by the ablative absolute in Latin, thus,—  
*Homo obiit relicto fratre.* (A man died leaving a brother &c.)

The parallel if necessary, might be extended, but the above will doubtless be deemed sufficient.

\* VICIUS de Idiotismis.

Annotation.

It very frequently resembles *hors* in French and *fuor* in Italian and in such cases will be translated *out of*: 'Take one example out of many from the إخوان الصفا Ikhwan-oos-Sufa, where the Dolphin in enumerating his disqualifications for the office of an Ambassador says to the King of the fish.

وليس لي رجلان أمشي بهما ولا لسان ناظف أتكلم به ولا صبر لي عن الماء  
ساعة واحدة لكن أرى أن السلحفاة يصلح لهذا الأمر لأنه يصبر على الماء

"And I have neither legs to walk with, nor tongue to speak with, nor can I live out of the water even for an hour; but I think the Tortoise is qualified for the task, for he can live out of the water."

The various applications of عَنِ as enumerated in page 34, will be found illustrated in the following Story.

S T O R Y.

An Arab presented himself one day before the Calif MOOATUSIM BILLAH, Commander of the Faithful. The Calif made trial of his abilities, and finding him in every respect intelligent and accomplished, appointed him one of his suite, and preferred his society to that of all his other counsellors. Now the Calif had a minister excessively envious, whose jealousy was excited by the Arab's promotion, but dreading the anger of the Calif if he attempted anything against him openly, he continued to keep up a shew of friendship, determining to effect his ruin by some secret wile or artifice. He continued therefore daily to encrease in civility towards him, and at length invited him to his house to dinner, and mixed up in his food a large

\* It is here used as a noun, and means side.

portion of Garlic. After dinner he said to the Arab,—“ when you attend the Calif's assembly, take care to sit a distance from him, for the smell of the Garlic may offend him.” The minister then waited on the Calif and said,—“ The Arab whom you made your favorite, and whose company you prefer to ours, has spread about a report that you have a stinking breath.” The Arab a little while after made his appearance, and seated himself at a distance from the Calif. The Calif desired him to come near him, which he obeyed, but covered his mouth as he approached with his sleeve. This action confirmed in the Calif's mind the truth of his minister's story and the treachery of the Arab. He thereupon wrote a letter to one of his governors to the following purport.—“ On receipt of this letter, let the bearer be immediately put to death.” He then sealed it, and delivered it to the Arab saying, convey this to such a one and return to me speedily with the answer. The Arab took it, and in going out happened to meet the minister at the door, who enquired where he was going. He replied the Calif has employed me to carry a letter to one of his governors. The minister immediately conjectured, that the Arab would receive some very considerable present from the governor, and he determined in his own mind, to possess it himself,—“ what say you, says he, if I release you from the annoyance and fatigue of the journey, and present you at the same time with two thousand Deenars? Most certainly says the Arab, you speak with judgment and in so doing will free me from a very unpleasant embassy.—“ You have shot the arrow of your judgment, *with\** the bow of unerring direction.” So accept the letter. He then delivered it to the minister and received in return two thousand Deenars. The minister proceeded to the house of the governor and shewed him the Calif's letter. The governor read it, and in conformity to the injunction it contained, ordered the minister to be beheaded. After

---

\* It is evident that this example is similar to the one adduced in the text to denote *distance* and *transition*; It might therefore be naturally asked why the particle *عَنْ* should not have a similar interpretation; I confess I see no good reason for it, but as the Arabian Grammarians think proper to allow it both applications, I have no wish to dispute the point with them.

some days had elapsed, the Calif remembered the affair with the Arab, and said to some of his attendants, enquire after the Arab who was formerly with me, and desire the minister to attend. They told him, the Arab was in the city, but that the minister had gone on a message to a certain governor, and had not returned. The Calif desired the Arab to be called before him, and asked him the particulars of the matter, which he related from beginning to end. But did you not say the Calif spread a report among the people, that I had a stinking breath? God forbid says the Arab I should report that of which I am ignorant. Your minister could have only told you this from treachery and deceit towards me;—he dug a pit for my destruction, in to which God has caused him to fall himself,—do not therefore grieve for his fate, for the proverb says, “he who digs a pit for his companion, will fall into it himself.” \* Grieve not, for in grief there is no advantage. Unable

\* The same idea it has been observed seems common in every language; Good has produced the following examples, in his notes on Lucretius,

‘ΟΙ ΑΥΤΟΙΣ ΚΑΙ ΤΕΥΧΗ ΣΥΝΕΡΧΑΝ ΚΑΙ ΤΕΥΧΑΝ.

‘Η ΔΕ ΚΑΙ ΤΗ ΒΟΥΛΗ ΤΗ ΒΟΥΛΕΥΣΑΝΤΙ ΚΑΙΣΤΗ.

Opp. et Dies, A. 263.

“ He works his own ill, who another’s works;  
“ In his own counsel self-destruction lurks.”

And in the psalms IX. 15.

“ The nations have sunk into the pit they had digged;  
“ In the snare they had hid, have their own feet been entangled.”

Also in psalms XXXV. 7.

“ For a snare without cause have they laid for me,  
“ Without cause have they digged for me a pit,  
“ May ruin rush upon them unawares;  
“ May the snare catch hold of them, which they themselves have laid,  
“ Into this destruction may they plunge headlong.”

To which may be added the two following from the Persian,

بد مکن که بد افتی و چاه مکن که خرد افتی

چاه کن را چاه در پیش

M

yourself to avoid the occurrence of contingent evils, how do you expect to ward them off others, as the Poet says,

You lament at the untimely fate of another?

But say can you extricate yourself from the power of death!

The Calif was astonished at this marvellous adventure, and saw that the almighty from the purity of the Arab's intentions had rescued him from an untimely end—He exclaimed—Vengeance on the head of the envious man!—Envy where it originates, will surely destroy its possessor. He then bestowed a dress of honor on the Arab, appointed him to the vacant office of his minister, and seated him at the head of the assembly on his right hand.

OF THE PREPOSITION,

إِلَى

1. THE PREPOSITION *إِلَى* is used to denote the *bound* or *termination* of interval, (انتهاء الغاية) as applicable to time and space.

EXAMPLE.

سرتُ إِلَى الكُوفَةِ I travelled to Koofuh.

Annotation.

There is nothing particular to be remarked of the preposition *إِلَى*: it is the correlate of *مِنْ*, and as applicable to time and place, is properly rendered in English by *To*, and *Till*. The senses attributed to it in the text are doubtless those of most frequent occurrence, but there are a few others, which may be probably worthy of a place.

[ " You have shot the arrow of your judgment from (or *with*) the bow of unerring direction." See page 40.] It may perhaps be worth remarking that the same idea is expressed nearly in the same words by Gay.

" Go child, and when your grown maturer,

" You'll shoot your next opinion surer."

FABLE XVI.

2. THE PREPOSITION **إِلَى** is sometimes though not frequently synonymous with **مَعَ**.

EXAMPLE.

لَا تَأْكُلُوا أَمْوَالَهُمْ إِلَىٰ أَمْوَالِكُمْ { Do not consume their property along with  
your own.

Annotation.

1. **إِلَى** After words expressive of *love, esteem, &c.* and their opposites *hatred, aversion, and the like*, serves to discriminate the agent in the sentence, which in such cases it immediately governs: as in the following example from the Qooran, where the BLOOMING HEBREW BOY in resisting the threats and blandishments of the CHASTE EGYPTIAN DAME, exclaims.

رَبِّ السِّجْنِ أَحَبُّ إِلَيَّ مِمَّا يَدْعُونَنِي إِلَيْهِ

“O Lord, a prison is more desirable to me, than that which (these women) invite me to.”

Here the first personal affix, **يَ** is governed by **إِلَى** following the word **أَحَبُّ** *more desirable*, and is thereby pointed out as the agent in the sentence.

2. **إِلَى** Is sometimes found in a sense directly opposite to its radical one, namely **أَبْتَدَأَ** or *beginning*, and is consequently in this case synonymous with **مِنْ**.

EXAMPLE.

تَقُولُ وَقَدْ عَلِمْتُ بِالْكَوْرِ فَوْقَهَا أَيْسَقِي فَلَا يَرَوِي إِلَىٰ ابْنِ أَحْمَرَ

“She says, (i. e. the camel) while I am placing the saddle on her back ;—has INNO-UMMURA drank of me, and is yet unsatisfied?”

The camel jaded and harassed by incessant travel is supposed to exclaim as above, on seeing her master about to remount her, but whether INNO-UMMURA was the name of the master, who relates the occurrence, or of some other whose conduct had passed into a proverb, I confess I am unable to decide,—these detached and frequently mutilated passages from the Poets which are constantly brought forward by the Arabian Grammarians in emergency, seem as often to

3. When that which follows *إلى* happens to be of the same general nature, or genus as that which precedes it, the preposition will then have an *inclusive* signification.

EXAMPLE.

فَاغْسِلُوا وُجُوهَكُمْ } Wash your hands and your faces to the  
وَأَيْدِيَكُمْ إِلَى الْمَرَافِقِ } elbows, (i. e. the elbows inclusive.)

Annotation.

require illustration themselves as the points which they are intended to illustrate; and without the aid of comment or context the sense must be often guessed at.

It seems worthy of remark that *Till*, like *إلى*, in our old authors is found some times to denote *with*, and *from*.

EXAMPLES.

*Till*, denoting, *with*, in addition to.

The empyee than oure story sayis,  
Come in England in the dayis,  
In that land to ger be dwne,  
And to be mad kyng hyr swne,  
Henry, the quhilk oure kyng dawys,  
And *til* hym serdis ryght mony,  
Kend hyme nerrest ayre to be,  
Than of all that reawte.

*Wynetown*, vii. 6. 230.

*Till* denoting *from*.

Swa *til* saynt margret estyre sync,  
As *til* malcolme in ewyn lyne,  
All our kyngis of Scotland,  
Ware in-*til* success yowne discendand.

*Wynetown*, vi. 19. 133.

See JAMIESON'S *Dict.*

In the latter example JAMIESON remarks that *till* is used improperly for *from*, and if the impropriety consist in the infrequency of its occurrence, the same may perhaps be said of *إلى*. They are both however found in this sense and should therefore be recorded.

4. When that which follows **إلى** happens to be of a different class or genus to that which precedes it, the preposition will then have an *exclusive* signification.

EXAMPLE.

ثُمَّ أَتَوْا الصَّيَامَ إِلَى اللَّيْلِ Then continue the fast *till* night.

Annotation.

3. **إلى** Is occasionally synonymous with **في**

EXAMPLE.

وَلَا تَتْرُكْنِي يَا أَوْعِيدَ كَأَنِّي إِلَى النَّاسِ مَطْلِي بِهِ الْغَارُ أَجْرَبُ

“And do not desert me in society, under your threats, as if I were a scabby camel besmeared with pitch.”

4. It is synonymous with **من**.

EXAMPLE.

أَمْ لَا سَبِيلَ إِلَى الشَّبَابِ وَذِكْرُهُ أَشْهَى إِلَيَّ مِنَ الرَّحِيقِ السَّلْسَلِ

“But there is no return to youth, the very remembrance of which is dearer to me, than the most delicious wine.”

This preposition may therefore be occasionally translated by, *to, till, with, and from*. The senses enumerated by the Commentator in the text, will be found in the following little *Jeu d'esprit*.

حِكَايَةٌ

قَالَ الْغَرَزُ ذُقْ مَا اسْتَغْبَلَنِي أَحَدٌ يَبْدُلْ مَا اسْتَغْبَلَنِي بِهِ نَبْطِي قَالَ أَنْتَ الْغَرَزُ ذُقْ

I never says FURUZBUQ\* experienced so severe a retort, as I did once from a certain Nabathæan. Are you the FURUZBUQ, says he, whose constant employment it is, to lampoon and flatter the people, for mercenary purposes? The same I replied. Than said he you are sunk in a privy to the very nose. But why exclude the eyes said I?—To enable you to behold, replied he, the abject state, into which your sordid passions have reduced you.

---

\* FURUZBUQ one of the most ancient Arabian Poets celebrated alike for his extravagance of praise, and bitterness of censure. Some extracts from his writings will be found in the biography of IBN-OKHILUKAN, a work that has been eulogized by Sir WILLIAM JONES in a strain of amplification, not much inferior perhaps to that of FURUZBUQ himself:—The passage is so remarkable, that I think it should be laid before the reader. “ *Porrò scriptoris politissimi EBN-I-KHALICAN, opus historicum non magis verborum elegantia et ubertate commendatur, quam illustriorum poetarum versibus, quibus conspergitur. Ac nescio an hic omnibus vitarum scriptoribus sit anteponeendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundior, et dignus est profectò liber, qui in omnes Europæ linguas conversus producat.*” A very correct and elegant copy of this work which I procured at Bagdad is now in my possession; it consists of 1266 octavo pages, and 826 lines, and is considered I believe by the Arabs in general as an impartial compendium of biography, but as to copiousness, jucundity, elegance, and such other pleasing epithets ascribed to it by Sir WILLIAM, I fear we must attribute them rather to the partiality than candour of the learned orientalist.

The name is sometimes written KHULUKAN and the Arabian Etymologists ascribe a reason for each. خُلِكَان They say is compounded of خَلَّ a friend and كَانَ was; and خَلَّ of خَلَّ dismiss, let go, &c. and كَانَ which in the current dialect signifies enough. This phrase the authour was frequently in the habit of making use of and at length it superseded his real name.

في

1. THE PREPOSITION في denotes *inclusion*, (ظرفية)

EXAMPLE.

المال في الكيس The money is *in* the purse.

2. It denotes *exaltation*, or *elevation*, (استعلاء)

EXAMPLE.

ولا صلبتكم في جذوع النخل { And I will certainly crucify you *on* the trunks  
of palm-trees.

### Annotation.

Besides the above senses, the particle في is found occasionally synonymous with *إلى*, *لام*, *مع*, *من* and *بها*, with some others which are detailed at large in the *MOOGHNEE-POOT-LUBEE*. The example produced by the Commentator from the Quran to illustrate the 2d use of the particle, in the sense of *exaltation* or *elevation* may perhaps be considered equivocal, the following however will doubtless be deemed satisfactory.

قَالَ الرَّجُلُ غُلَامٌ سَرَقَ الْخَبَارُ الَّذِي فِي الْبَيْتِ  
قَالَ الْعَبْدُ لِلَّهِ حَيْثُ لَمْ أَكُنْ فِي ظَهْرِهِ

“A servant informed his master that his Ass was stolen :—thank God says he, that I was not *on* his back !”

The correspondent prepositions in Latin and Italian have a similar application, as

Equitare *in* arundine longo,  
Mettere un anello *in* dito.

The original sense of the preposition, namely *inclusion*, is either real or metaphorical—the first has already been illustrated in the example in the text, the latter occurs repeatedly in the following

## PARAPHRASE.

As sleepless one night I lay musing in bed,  
With whims and chimeras afloat in my head,  
I grew drowsy at length, and fell into a doze,  
When who should appear but old Nick at my nose:  
And with accent and mien prepossessing and civil,  
Sitting down by my side thus address'd me the Devil.

Come Friend speak your mind, what shall I procure you?  
Would you like a tit-bit from the purlicus of Drury?—  
I shew'd by my looks, that I relish'd the bliss,  
So I smil'd approbation, and answer'd him yes.

Then he added,—perhaps it will highten your sport,  
If I bring with the Doxy some mellow old Port?  
Some mellow old Port, I exclaim'd with delight!  
Ay, o der it straight, and we'll tope it all night.  
And Songsters, said he, with such notes as of old,  
Made Mrs. Eurydice 'scape from my hold?  
Yes, yes, bring us Songsters; said I by the score,  
'Till the Welkin in rapture reecho encore!—  
But, what says my Boy, to the bosom of snow,  
The soft pouting lip, and the ringlets that flow,  
To the heart-melting glances; the sweet bashful charms  
Of a maid of sixteen to enfold in your arms?—\*  
Mr. Devil, says I, I'm unwilling to teize ye,  
But the sooner you bring her, the better you'll please me.  
Then up jump'd the tempter and grin'd in my face,  
Crying, sink of iniquity, lust and disgrace,  
I've prov'd you a scoundrel,— and thus having spoke,  
He made me a congè, and vanish'd in smoke.

OF THE PREPOSITION,

لام

1. THE PREPOSITION لام denotes appropriation, (إِخْتِصَاص)

EXAMPLE.

الجُلُ للفرس The covering is for the Horse.

\* I have omitted the translation of a verse in the original as conveying an idea suitable only to Satan himself or an Eastern Debauchee.

2. It is sometimes *redundant*, (زِيَادَةٌ)

EXAMPLE.

رَدِيفُكُمْ بَعْضُ الَّذِي } Part of that which you desire to accelerate,  
تَسْتَعْجِلُونَ } may perhaps follow close behind you.\*

3. It denotes *possession*, (تَهْلِيكٌ)

EXAMPLE.

الْمَالُ لِزَيْدٍ The property is Zued's.

4. It denotes *causality* or *causation*, (تَعْلِيلٌ)

EXAMPLE.

جِئْتُكَ لِكِرَامِكَ { I came to, or waited upon you that you might  
exalt or ennoble me.

5. It is used to denote *swearing*, (قَسَمٌ)

EXAMPLE.

لِلَّهِ لَا يُؤَخِّرُ الْأَجَلَ By God death will make no delay.

\* The sentence is imperfectly given in the text—it will be more intelligible by inserting it entire.  
وَيَقُولُونَ مَتَى هَذَا الْوَعْدُ إِنْ كُنْتُمْ صَادِقِينَ قُلْ عَسَى أَنْ يَكُونَ رَدِفُكُمْ بَعْضُ الَّذِي تَسْتَعْجِلُونَ  
“And they say when will this threat be accomplished if you speak true? Answer, perhaps part of  
that (punishment) which you desire to accelerate may follow close behind you.”—See Chap. 27,  
Qur'an.

6. It denotes عاقبة end, succession or consequence.

EXAMPLE.

كَلِمَةُ الشَّرِّ لِلشَّقَاوَةِ { Evil necessarily follows depravity (i. e. of  
manners.)

Annotation.

This preposition answers frequently to the dative case in Latin, as لِرَبِّ Domino—لَكَ  
tibi—لَهُم illis—لَنَا nobis—لَهُ ei, لِي mihi, &c. as may be observed in the following lines  
of the Poet سراج الورداق SARAJ-ool-WARRAQ.

وَوَرَقًا أَرَقْنِي نوحها  
لها مثل ما لي فؤاد صريح  
تنوح واكتتم سريها  
ودمع لي سري لديها يذيع  
كانا تقاسينا للهوي  
فبينها النواح ومنوي الدموع

The Dove whose plaintive notes deprives me of rest,  
Has like me a heart pierced with anguish,  
It complains aloud and I conceal my secret  
But my tears sufficiently declare to it the cause.  
It appears as if we had divided love between us  
For it is busied in complaint and I in tears.

These verses are quoted by Sir WILLIAM JONES in his Commentary on Asiatic Poetry; but in  
a manner so strangely incorrect, that they afforded neither sense nor measure. The same

## Annotation.

office of complaint is attributed by Petrarch, though with less art, to the nightingale, and the general resemblance of the whole is so great, that the reader may probably wish to see the original inserted.

" *Quel rosignuol, che si soave piagn,*  
*Forse suo figli, o sua cara consort,*  
*Di dolcezza empie il ciel, e le campagne*  
*Con tante note sì piotose, e scorte;*  
*E talta notte par che m'accompagne,*  
*E mi ramente la mia dura sorte."* SONETTO, XXX.

" The wakeful nightingale, from off its thorn  
 Wailing its lost mate, or its ravish'd young;  
 Pierces the skies, the woodlands with its song,  
 In trills of melody so sweet, so lorn;  
 From eve's last glance, till dawns the crimson morn,  
 Like me it pours soft sorrow from its tongue."

The various uses of the particle **لام** as explained in the text will be found in the following Little Story.

STORY.

They relate that AMUR-ool-QUES, before his decease, delivered over his armour and military weapons to the care of SUMUWWUL BINI ADEEA. After his death, the

king of Kinduh sent an ambassador to SUMUWWUL, to solicit the arms of the deceased, but he refused, and said, I will not deliver up any part of what has been entrusted to me, to any but the lawful proprietor. The king repeated his demand, but he persisted in his refusal, swearing, by the Almighty God, I will not abuse the trust reposed in me, nor act treacherously to gratify the king. When the ambassador reported the determination of SUMUWWUL to the king, he marched against him with his army; but SUMUWWUL retreated into his fortress, and there secured himself. Then the king besieged it, and the son of SUMUWWUL happened to be out of the fort at the time, and the king seized him and made him prisoner, and carried him round the fortress, proclaiming to SUMUWWUL: I have taken your son captive, behold he is with me—then he shewed him to him, and said, if you will deliver to me the arms and weapons, I will restore to you your son; if not, I will slay him before your face; so choose which you like.—And SUMUWWUL said, do as you please. for I will not violate my faith and promise. Then the king put the son to death in the sight of his father. And the king was baffled in his attempts against the fortress, and obliged to raise the siege and retreat in disgrace; but SUMUWWUL bore his misfortune with patience, conscious of having performed his duty with integrity; and when the lawful heirs of AMUR-OOO-L-QUES arrived, he delivered to them the armour and weapons in his charge, preferring the observance of his promise and good faith, to the life of his own son; and the faith of SUMUWWUL became afterwards proverbial.

#### OF THE PREPOSITION,

رَبَّ

1. THE PREPOSITION رَبَّ denotes *paucity*, (تَقْلِيلٌ) and requires in construction an indefinite noun which it immediately governs, qualified by an adjective or epithet, and a verb in the past tense.

#### EXAMPLE.

رَبَّ رَجُلٍ كَرِيمٍ لَقِيتُهُ I visited a *few* liberal or generous men.

2. It sometimes precedes a ضَمِيرٌ مُبْتَدِئٌ or indeterminate pronoun, and in this case governs an indefinite noun as its تَمَيِّزٌ in the accusative or objective case.

EXAMPLE.

رَبِّهٖ رَجُلًا لَقِيْنُهُ I visited a few men.

Annotation.

Neither the true character nor meaning of this word seems properly ascertained by Grammarians. By some it is considered a noun, by others a particle:—one will have it to signify *paucity*, another *abundance*, and for both opinions numerous examples are produced. Moola JAMEER, the celebrated Commentator on the Kafeen, says the word was originally formed to denote *paucity*, but the author of the Moognee-ool-Lubeeb, authority still higher, contends that its proper signification is *abundance*. From this 'chaos of mingled purposes,' how shall we extricate truth? The task would indeed be long and tedious, and provoke discussions unsuitable to the nature of this work, I shall therefore confine myself to a few observations on its practical application to the purposes of speech.

رَبِّهٖ or رَبِّهَا in the following sentence from the Qooran, is adduced by the author of the Moognee-ool-Lubeeb, as an example of its use in the sense of تَكْثِيرٌ

رَبِّهَا يُوَدُّ الَّذِينَ كَفَرُوا الزُّكُوفَ نَوَاسِطِينَ

Sale however has adopted the opinion of other Commentators, and renders it thus. "The time may come, when the unbelievers shall wish that they had been Moslems,"—instead of,—the unbelievers shall frequently wish,' &c. In this he seems to have followed Maracçi. "Aliquandò, desiderabunt, qui infideles fuerunt, ut fuissent Mosleini." Who justifies this version by the following note. Particula رَبِّهَا significat tam التَّكْثِيرُ multiplicitatem; quam التَّعْلِيلُ paucitatem. Potest itaque verti multoties, vel aliquandò, vel fortassè. Hoc autem desiderium erit, juxta Gelalem يَوْمَ الْقِيَامَةِ إِذْ لَعَنُوا أَحِبَّاهُمْ وَحَالَ الْمُسْلِمِينَ Die resurrectionis, quandò infideles videntur statum suum & statum fidelium.

In the following verse from أَخْرَاجِي, the word رَبِّهٖ is undoubtedly used in the sense of تَقْلِيلٌ or *paucity*.

## Annotation.

رَبِّ مَوْلُودٍ وَلَيْسَ لَهُ أَبٌ      وَذِي وَلَدٍ لَمْ يَلِدْهُ أَبُوَانِ

"There are few Children to whom nature has denied a father, and few parents, who never themselves had parents."

The poet in the first hemistich is supposed to allude to Christ, and in the latter to Adam.

رَبِّ after the particle *قَدْ* is very often understood, also frequently after *وَأَوْ* and occasionally after *يَلْ*: of the two latter, the following examples will be sufficient.

وَأَبْيَضٌ يَسْتَسْقِي الْغِيَامُ بُوْجَهْ      ثِيَابًا لِيَتَمَسَّ عَصْبَةً لِلْأَرَامِلِ

\*"There are few men from whose countenance the clouds can drink splendour, as they do from him who is, the protector of the orphan, and the support of the poor."

يَلْ بَلَدٌ ذِي صَعْدٍ وَكَأَمِي

"There are few Cities containing men of exalted prowess and bravery."

When *كَافَّةً* or the prohibitive particle is affixed to رَبِّ it destroys its government, example, رَبِّهَا يُوَدُّ الذِّبْنَ كَقَرُورًا, as quoted above.

This particle assumes no less than sixteen various forms, the following eight however are those of most frequent occurrence.

رَبِّ	رَبِّ	رَبِّ	رَبِّ
رَبَّتْ	رَبَّتْ	رَبِّ	رَبِّ

It may be translated occasionally, *some, a few, many, frequently, often* &c. it occurs in both senses, namely *تَكْثِيرٌ* and *تَقْلِيلٌ* in the following extract.

حِكَايَةٌ

قِيلَ إِنَّ رَجُلًا مِنْ طَلَبَةِ الْعِلْمِ دَخَلَ يَوْمًا عَلَى الْفَقِيهِ الْغَاضِلِ عَلَيْهِ

أَفِدْ نَبِيَّ مِمَّا أَفَادَكَ اللَّهُ بِهِ فَقَالَ لَهُ الْفَقِيرُ هَذَا مِنْ نَبِيِّ كَلْبَتَيْنِ نَافِخَتَيْنِ

S T O R Y.

A certain scholar called one day upon the learned lawyer ULİYU-BIN-SU'EDIN-ILKUO-KUBANEYYU, and after having paid his respects and taken his seat, said—pray benefit me by some of that knowledge, with which God has benefited you. Attend then said the lawyer to the two following useful maxims. *First.* There are many things in the acquisition of which men exert themselves, which when they have acquired, they will wish they had never acquired. *Second.* There are few stratagems more advantageous than alliance.\* The man remembered the maxims, thanked him, and went about his business.

OF THE PREPOSITION,

عَلَى

1. THE PREPOSITION عَلَى is used to denote exaltation or elevation, (استعلاء)

EXAMPLES.

زَيْدٌ عَلَى السَّطْحِ Zued is on the house-top.

عَلَيْهِ دَيْنٌ He is in debt, (or lit.) upon him is debt.

\* The example is by no means a good one, for the sentence will bear a very different interpretation—as,—“there are some frauds better than friends;”—or, “artifice is occasionally better than alliance.”

2. It is occasionally synonymous with **بَاء**

## EXAMPLE.

مَرَرْتُ عَلَيْهِ I passed by him.

## Annotation.

The true character of **عَلَى** as well as **رَبِّ** is imperfectly understood: although I believe at present, it is generally considered as a particle yet the Grammarian **سَبَّوِيح**, SEEBOWUEH, and others of high authority, contend that it is a noun, and nothing else. I shall as usual wave the discussion as unimportant, and content myself with offering a few examples of its practical application.

1. It is sometimes synonymous with **مَعَ**

## EXAMPLE.

لَيْسَ الْبِرَّ أَنْ تُوَلُّوا وُجُوهَكُمْ قِبَلَ الْمَشْرِقِ وَالْمَغْرِبِ وَلَكِنَّ الْبِرَّ مَنْ آمَنَ  
بِاللَّهِ وَالْيَوْمِ الْآخِرِ، وَآتَى مَالَهُ كَفَّةً وَالْكِتَابَ وَالنَّبِيِّينَ وَآتَى الْمَالَ عَلَى حُبِّهِ  
ذَوِي الْقُرْبَى وَالْيَتَامَى وَالسَّائِكِينَ وَابْنِ السَّبِيلِ وَالسَّائِلِينَ

“It is not piety that you turn your faces during prayer, towards the East and the West, but piety is of him who believes in God and the last day, and the Angels and the book (i. e. the Qooran) and the Prophets, and who gives money for the love of God, to his kindred, and to orphans, and the poor, and to travellers\* and beggars, &c.” See Qooran. C. ii.

It must be observed however that the words **عَلَى حُبِّهِ** are capable of a different meaning, as remarked by some of the Commentators on the Qooran, who interpret them thus “*notwithstanding his love of that money,*” &c.

\* Lit.—The son of the road.

Annotation.

It is sometimes synonymous with لام, example from the Qooran.

لَتَكْبُرُوا لِلَّهِ عَلَىٰ مَا هَدَانَا لَكُمْ وَلَعَلَّكُمْ تَشْكُرُونَ

"That ye may glorify God for having directed you, and that ye may give thanks."

It is synonymous with مِن

وَيْلٌ لِلْمِطْلَقِينَ الَّذِينَ إِذَا أَكْنَأُ لَوْ أَعَايَ النَّاسُ يَسْتَوْفُونَ

"Woe to unjust measurers, who when they receive by measurement, from the people demand the full &c. See Qooran. C. lxxxiii.

It is synonymous with بِأ as mentioned in the Text.

EXAMPLE.

حَقِيقٌ عَلَىٰ أَن لَا أَقُولُ عَلَى اللَّهِ إِلَّا الْحَقَّ

"It is just that I speak not of God, any thing but the truth." See Qooran. C. vii.

It is evident from the above examples, that the preposition عَلَى is capable of a variety of uses, besides those recorded in the Commentary, and there are several others of less importance which I have purposely omitted. The senses however in which it is most frequently found, are included in the following Story.

## S T O R Y.

It is related, that KISAE was sitting one day in his house, and heard some person call out in the street;—hear O ye people a wonder! the Ass upon which I am now riding is KISAE the Grammarian, let those that are absent be called that they may behold him. The Grammarian ran out in a rage, to discover who it was that had made an ass of him, and saw a tall fellow with a large head, to whom he went up and said;—pray Sir, how comes it, that KISAE whom we know to be a man, is turned into a brute? I will tell you says the man,—last night I offered up a

prayer to God for that purpose, in order to release 'Umr from the beating of ZUED,' and getting up sometime afterwards to shut the door, I found this very Ass at the threshold, I therefore naturally enough concluded, that my prayer was granted, and that God had transformed him as you see. KISAEE laughed heartily at the *supposed* stupidity of the fellow, and returned to his house exclaiming.—“ La huolu wu la qoowwutu illa billahi!”\*

OF THE PREPOSITION,

كاف

1. THE PREPOSITION كاف, is used in the sense of تشبيه, or Similitude.

EXAMPLE.

زَيْدٌ كَالْأَسَدِ Zued is like a Lion.

Annotation.

The Grammarian Seebuwueh with several others believe this particle to be a noon, synonymous with the word مِثْل, and the reason adduced by them for this opinion is, that it occurs in this character in composition and is preceded by a preposition. Its nominal use however they say is restricted to poetry, but the author of the MOOGNER-OOO-LUBEEB extends it to every sort of composition, and gives an instance of it in common conversation, —مررتُ بِكَأَلِ أَسَدٍ “I passed by him who is like a Lion.” Those who consider it a particle give the following reason, namely that it occurs as an expletive, which is never the case with a noun.

It has some other peculiar uses besides those mentioned by the Commentator.

\* حَوْلَةٌ or حَوْلَةٌ a verb in the third conjugation of increased Triliterals corresponding to the Quadrilateral radicals, possessing the peculiar power termed قصر or abbreviating—it signifies لَا حَوْلَ وَلَا قُوَّةَ إِلَّا بِاللَّهِ “There is no power, and no strength but in God.”

2. It is sometimes *redundant*, (زيادة).

EXAMPLE.

لَيْسَ كَمِثْلِهِ شَيْءٌ There is nothing like him, (i. e. God).

Annotation.

1. It is used to denote *مبادرة*, viz. *mutual celerity*, or the instantaneous occurrence of two actions.

EXAMPLE.

صَلِّ كَمَا يَدْخُلُ الْوَقْتُ "Pray as soon as the time comes."

It denotes *causation* and is synonymous with *لام*.

EXAMPLES.

كَمَا أَنَّهُ لَا يَعْلَمُ فَتَجَا وَنَزَلَ اللَّهُ عَنْهُ } "For he did not know better therefore God pardoned him." (i. e. *Because of his ignorance*.) Here it is found with the *ما كاذم*, or prohibitive particle.

وَأَذْكُرُوهُ كَمَا هَدَيْتَكُمْ } "And remember him for directing you in the right path." It is here used with the *ما مصدرية*, or infinitive part.

Some Grammarians however believe that the particle is never found in this sense, but when joined with the *ما كاذم*, or *ما مصدرية*, but the author of the *Mongnee* offers the following example from the *Qooran*, to prove the contrary. وَيَكَاذِبُونَ لَا يُفْلِحُ الْكَافِرُونَ. "And therefore certainly the unbelievers shall not prosper." It is not easy to translate the *وَيْ* or particle of astonishment in the above example, without losing the peculiar force of the particle *كاف*—Marauci renders it—"Papè! certè non prosperabuntur infideles." Sale—"Aha! the unbelievers shall not prosper."

It is used in the sense of *علل*, in answer to the question *كيف حالكم* "How are you?"  
Ans. *على خير* i. e. *على خير* "in health." Several of the above uses are illustrated in the following Story.

حِكَايَة

حَكِيَ أَنَّ بَعْضَ الْأُدَبَاءِ كَانَ جَالِسًا أَيْ يَوْمٍ عَلَى دَكَّةٍ بَابَهُ فَمَرَّتْ بِهِ  
 امْرَأَةٌ كَانَتْهَا <sup>Similitude.</sup> الْبَدْرُ رَجَبًا لَا فَرْ مَاهَا بَعَيْنُهُ وَقَالَ مُخَاطِبًا لَهَا أَيُّهَا <sup>Redundant.</sup> لِدُرَّةُ  
 الْيَتِيمَةِ الَّتِي أَيْسَ كَمِثْلِهَا جَمِيلَةٌ فِي نِسَاءِ الْعَالَمِينَ تَغِي سَاعَةً لِأَبْدِي  
 لَكَ مَا سَنَحَ الْآنَ بِخَطَارِي فَوَقَعْتَ وَهِيَ تَضْحَكُ <sup>A noun.</sup> عَنْ كَالْبَرَدِ الْمُنْهَمَ فَقَالَ  
 لَهَا أَنْ قَلْبِي مَا يُدُّ إِلَيْكَ وَقَدْ خَطَرَ بِنَا إِلَى بَيْتٍ مِنَ الشَّعْرِ وَهُوَ  
 \* زَوْدٌ يَنَامُ مِنْ حُسْنِ وَجْهِكَ مَا دَامَ فَحُسْنُ الْوُجُوهِ حَالٌ يَحُولُ \*  
 فَاجَابَتْهُ أَنْتَ كَخَيْرٍ وَعَافِيَةٍ وَالْوَصَالُ كَأَنْ فَلَ تَعْجَلْ ثُمَّ أَنْهَاذَ هَبَّتْ لِسَانَهَا  
 وَلَمْ تَعُدْ إِلَيْهِ فَمَرَضَ الرَّجُلُ لِغِرَافِهَا وَبَغِيَ فِي قَلْبٍ عَظِيمٍ إِلَى أَنْ قَضَى نَحْبَهُ

S T O R Y.

A man of learning was sitting one day at the door of his house, and observed a damsel passing by whose extreme beauty attracted his notice. He called out to her and said,—O incomparable pearl, surpassing in beauty all the women of this world, pray stop for a moment, that I may make known to you something that has come into my mind. The damsel upon this turned round, displaying her pearly teeth in a smile, when he addressed her and said. Truly my heart inclines towards you, and dictates the following verse.

Be bounteous of thy charms for beauty's power,

Boasts but a short and transitory hour.

She answered—How do you do, good Sir?—Here I am—why make any delay? and so saying she walked off and never returned. The poor man sickened in consequence of her absence, and continued till the hour of his death in the utmost grief and anxiety.

OF THE PREPOSITIONS,

مِنْذُ and مِنْذُ

1. THE PREPOSITIONS مِنْذُ and مِنْذُ are used to denote the commencement of an action with reference to *past* time.

EXAMPLE.

ما رأيتُهُ مِنْذُ يَوْمِ الْجُمُعَةِ وَمِنْذُ { " I did not see him *since* Friday," in other words,

إِبْتِدَاءِ عَدَمِ رُؤْيَيْهِ إِيَّاهُ كَانَ يَوْمَ الْجُمُعَةِ

" The beginning of my not seeing him was Friday."

Annotation.

In the explication of these particles, or rather particle (for they are but different forms of the same word,) Grammarians are very diffuse. They are compounded as some imagine of مِنْ and لَمْ, or of مِنْ and ذُو. مِنْذُ agreeably to the authority of AKFUSH is peculiar to the people of HAJAZ, and مِنْذُ to the tribe of TUMEEM. By the tribe of SOOLYMEE, they are pronounced مِنْذُ and مِنْذُ. The grammatical character also, of مِنْذُ or مِنْذُ has given rise to much controversy; some contending that it is at all times a noun, others that it is at all times a particle; the author of the Moognee however seems inclined to favor the latter doctrine.

AS A PARTICLE.

As a particle it is employed in three different senses.

1. With reference to the *past* time, it is synonymous with مِنْذُ, as exemplified in the Text.

2. They sometimes denote the whole time.

EXAMPLE.

ما رأيتُه مُذْ أو مُنْذُ يَوْمَيْنِ { I have not seen him these two days, in other words,

جميع مُدَّة انقطاع رؤيتي إياه يومان

"The whole period of my not seeing him was two days."

Annotation.

2. When the *present* time is intended, it is equivalent to قَبْلِي.

EXAMPLE.

مَا لَقِيتُهُ مُذْ يَوْمَنَا أَوْ شَهْرَنَا أَوْ عَامَنَا

"I have not met him this day, or this month, or this year."

3. When a specific or determined period of time is intended it is synonymous with إِلَى and مِنْ.

EXAMPLE.

مَا رَأَيْتُهُ مُذْ يَوْمَ ثَلَاثَةِ أَيَّامٍ أَوْ خَمْسَةِ أَيَّامٍ

"I have not seen him these three days, or these five days."

AS A NOUN.

مِنْ and مُنْذُ considered as nouns, belong to that class of words termed اسْمَاءُ أَزْوَاجٍ or nouns of *time* and *place*, and as such have a twofold signification, that is, they sometimes denote the *commencement* of time, and sometimes the *whole* of the period specified. In the *first* capacity, they are invariably followed by a definite noun in the singular number, significant of time, forming the answer to the question متى when? Ex. متى رأيتُه "When did you see him?" Ansr.

Annotation.

“ مَا رَأَيْتُكَ مُذَ وَأَمْسَ يَوْمَ الْجُمُعَةِ ” I have not seen him since Friday.” In the second capacity, they will be followed by a specific period of time, forming the answer to the question *كَمْ*. *Ex.* مَا رَأَيْتُكَ مُذَ—مُنْذُ and مَا رَأَيْتُكَ مُذَ أَوْ مُنْذُ ثَلَاثَةِ أَيَّامٍ أَوْ خَمْسَةِ أَيَّامٍ whether considered as particles or nouns, take after them, sometimes an *infinitive*, as—مَا رَأَيْتُكَ مُذَ يَأْتِي سَفَرَهُ “ I did not see him since his journey.” Sometimes a verb in the *past tense*. *Ex.* مَا رَأَيْتُكَ مُذَ سَافَرَ “ I did not see him since he set out.” But never the *Futura*.

The Arabic preposition *مُنْذُ* or *مُنْذُ* seems to correspond in almost every respect with the English *since*, which *MINSHEU* derives from the old English *sithence*, and *SKINNER* from the Latin *exhinc*; “*e et h* abjectis, et *x* facilima mutatione in *s* transeunt.” A process perhaps not more extraordinary than that recorded above of *مُنْذُ*. In like manner, the Latin preposition *post*, quasi *pone est*, and the Greek *ἐπειτα*, from *ἐπὶ ταῖς post hoc*, as well as the French *depuis* which is supposed to be corrupted from *post*. Several of the above senses will be found illustrated in the following Story.

حِكَايَةٌ

حُكِيَّ أَنَّ رَجُلًا غَابَ عَنْ زَوْجَتِهِ أَيَّامًا لِحَاجَةٍ عَرَضَتْ لَهُ وَكَانَتْ تُحِبُّهُ  
مَحَبَّةً شَدِيدَةً لَا مَزِيدَ عَلَيْهَا فَلَمَّا رَجَعَ إِلَيْهَا قَالَتْ لَهُ لَا شَكَّ أَنَّكَ نَاقَضَ  
الْعَهْدَ كَيْفَ وَمَا رَأَيْتُ مِنْكَ مَسْطُورًا مُنْذُ يَوْمِ سَفَرِكَ وَأَنْتَ وَعَدْتَنِي  
بِذَلِكَ وَالْمُرَاسَلَاتُ كَمَا قِيلَ نِصْفُ الْإِمْلَاقَاتِ وَلَا وَفَّغْتَ لَكَ عَلَى أَثَرِ  
مُنْذُ شَهْرٍ نَاهَذَا وَأَنْتَ الَّذِي قَالَ إِنِّي عَائِدٌ إِلَيْكَ فِي شَطْرِهِ عَلَى كُلِّ

حَالٍ وَهَاهُوَ قَدْ تَمَّ وَاللَّيْلَةُ الْهَالِلُ فَقَالَ لَهَا نَعَمْ يَا نُورَ عَيْنِي إِنَّ كَلَامَكَ  
حَقٌّ وَكَانَتْ النَّيَّةُ عَلَى مَا قُلْتَ لَكَ مُنْذُ يَوْمٍ سَفَرِي فَحِينَ مَضَيْتُ لِدَاكَ  
الْمِيهَمُ اسْتَتَعَلَ خَاطِرِي بِهَا لَا بُدَّ مِنِّي إِسْعَافِهِ فَنَسِيتُ مَا وَعَدْتُكَ بِهِ وَمَا  
ذَكَرْتُهُ مُدَّ شَهْرٍ نَاهِذَا إِلَّا الْآنَ فَأَنْشَدَتْ الْمَرْأَةُ عِنْدَ ذَاكَ شِعْرًا  
اتَّخَسَى مَنْ أَنْ أَبَا الْوَجْدُ قَلْبَهُ      وَابْتَسَّ جِسْمَهُ شَجْوًا وَكُرْبَةً  
وَصَادَفَ مِنْ هَوَاكَ الذَّبْرَاءُ      تَبَارِكًا طَارَتْ مِنْهُ لُبَّةُ  
هَجَرْتُكَ أَيُّهَا الْكُوْنِي هَجْرًا      طَوِيلًا تَضَحَّيْ بِهِ الْمَحَبَّةُ  
ثُمَّ أَنَّهَا ضَرَبَتْ نَفْسَهَا بِسِكِّينٍ كَانَ فِي يَدِهَا فَهَاتَتْ

S T O R Y.

A certain man had occasion once to be absent for sometime from his wife, who loved him with the most excessive tenderness and affection; on his return she said to him;—My dear you are certainly a promise-breaker, for I have not received a line from you since your departure, although you promised to write to me regularly, and ‘correspondence they say is half an interview.’ Now, I have heard nothing of you during the whole month, and you promised to return in fifteen days: the month you see is finished; this is the night of the new moon.

My soul, said he, you say right.—My intention was certainly to do so, on the day of my departure, but when I set out, my mind was so occupied, with the various

concerns of the journey that I entirely forgot my promise till this instant. On hearing this she repeated the following verses.

PARAPHRASE.

Hast thou forgotten her whose faithful breast,  
With fiercest flames by love enkindled, burns;  
Who veil'd in Sorrow's cold and gloomy vest,  
Affection scorn'd and unrequited, mourns?  
Whose Passion wakes the wildness of despair,  
And mad, accelerates the hand of fate;  
Farewell—Eternity relieves my care;  
Death breaks affection's bonds, and ends thy hate.

She then stabbed herself with a knife she had in her hand, and died on the spot!

OF THE PREPOSITION,

حتى

1. THE PREPOSITION حتى is used to denote the bound or termination of interval, as applicable to time and place.

EXAMPLES.

نبت البارحة حتى الصبح I slept last night till the morning.

سرت البلد حتى السوق { I perambulated the town as far as the market-  
place.

Annotation.

This word is considered by all the Arabian Grammarians as a particle, and in this capacity has three distinct offices: these, as of little importance, I shall not here comment on, but content myself with a few observations on its practical application.

2. It is used in the sense of *concomitance*, or *companionship*.

EXAMPLE.

قرأتُ وِردِي حَتَّى الدَّعَاءِ { I read my portion of the liturgy, *along with*  
the prayer.

3. It has sometimes an *inclusive* signification.

EXAMPLE.

أَكَلْتُ السَّيَكَةَ حَتَّى رَأْسِهَا I ate the fish *even to* the head, i. e. head and all.

Annotation.

1. It is used in the sense of *تعليل* or *causation* and in this sense is synonymous with كَرَى

EXAMPLE from the QOORAN.

هُمُ الَّذِينَ يَقُولُونَ لَا تُنْفِقُوا عَلَىٰ مَنْ عِندَ رَسُولِ اللَّهِ حَتَّىٰ يَنْفَضُوا

"These are the men, who say, do not bestow any thing, on those who are with the apostles of God, *that* they may be obliged to separate from him."

- 2 It is sometimes, though rarely, found synonymous with لَا as exemplified in the following verse.

شعر

لَيْسَ الْإِطَاعُ مِنَ الْغُضُولِ سَهَابًا  
حَتَّىٰ تَكْبُرَ وَمَا لَدَيْكَ قَلِيلٌ

"There is no liberality in the gifts of the prodigal, but there is in you, who possessing but little, will yet part with it."

3. حَتَّى occurs as a conjunctive particle synonymous with وَ, and as such requires to be followed by a noun apparent or expressed.

EXAMPLE.

ضَرَبْتُ الْقَوْمَ حَتَّىٰ زَيْدًا

"I beat the tribe and Zued also."

T

4. It invariably governs a noun apparent or expressed, (اسم ظاهر) in opposition to the preposition إلى for we cannot say حَتَّى, though we do إِلَيْهِ "to him."

Annotation.

4. When the word preceding حَتَّى is governed by a preposition, the preposition must be repeated with the word which follows it.

EXAMPLE.

مَرَرْتُ بِأَقْوَمٍ حَتَّى بَرَيْدٍ

5. حَتَّى resembles إلى in many respects, but can never be substituted for it in a sentence as the correlate of مِنْ. It occurs in several of the above capacities in the following dialogue.

حكاية

قِيلَ إِنَّ بَعْضَ الْفُقَهَاءِ رَأَى ابْلِسَ لَيْلَةً فِي مَنَامِهِ فَقَالَ لَهُ أَيُّهَا اللَّعِينُ  
حَتَّى <sup>Govt. expressed.</sup> مَتَى تَلْعَبُ مَكَبِدُكَ بِعُقُولِ النَّاسِ قَالَ لَهُ حَتَّى <sup>Govt. understood.</sup> يَوْمَ الْقَارِعَةِ  
 وَقَدْ زَيَّنْتُ لَهُمُ الْقَبَائِحَ <sup>Inceptive.</sup> حَتَّى إِنَّهُمْ أَعْرَضُوا عَنِ الرَّشَادِ فَقَالَ لَهُ الْفَقِيهُ  
 مَا قَوْلُكَ فِي الْفُقَهَاءِ أَيْدٍ خُلُونِ الْجَنَّةَ بِغَيْرِ حِسَابٍ قَالَ كَلَّا بَلْ يُسْعَوْنَ  
 مِنْ مَاءٍ صَدِيدٍ <sup>Conjunctive.</sup> حَتَّى يَذُوقُوا عَذَابَ جَهَنَّمَ يَوْمَ الْمَأْتِ ثُمَّ بَصُقَ فِي وَجْهِهِ  
 فَصَاحَ الْفَقِيهُ وَأَنْتَبَهَ مَرْعُوبًا

BOOK SECOND.

S T O R Y.

It is related that a certain Theologian saw the Devil one night in his sleep, and said to him, O accursed, how long will you continue to exercise your wiles on the understandings of mankind? Till the day of judgment, replied Satan, and I have so artfully arranged my plots as to secure success in all my schemes against them. But what is your opinion said the other with regard to Theologians, do you think they will be admitted into heaven unexamined? No, no, said the Devil, by no means, on the contrary, they shall be given to drink of purulent matter,\* and shall taste the bitterness of the damned, after this life. He then spit in his face, and the divine roaring out, awoke in a fright.

OF THE PREPOSITION,

واو

1. THE PREPOSITION واو, is used in swearing, (قَسَمَ) but is restricted in its application to a noun apparent or expressed.

EXAMPLE.

والله لا أشربن الخمر By God, I will never drink wine.

Annotation.

The Grammarians of Koofuh believe that واو is occasionally synonymous with رَبِّ, as in the example adduced by the Commentator in the text; but the author of the Moongnee, asserts that in all such cases it is invariably a conjunctive particle, and that the government of the word immediately following it is occasioned by رَبِّ understood. The preposition واو like بِ is properly a particle of swearing, the latter however may or may not at discre-

\* ما اصد يد Aqua purulenta, *potus inferni*, vide Will. in voce. The expression alludes to a passage in the 14th Chapter of the Qooran, thus rendered by Sale—"Hell lieth unseen before him, and he shall have *filthy water* given him to drink"—This *filthy water*, is supposed to issue from the bodies of the damned.

2. It is occasionally synonymous with رَبِّ

EXAMPLE.

وَعَالِمٌ يَعْمَلُ بِعِلْمِهِ } Few of the learned act in conformity to  
i. e. } their learning.  
رَبِّ عَالِمٍ يَعْمَلُ بِعِلْمِهِ

Annotation.

tion, assume a verb of swearing before it, which is not the case with **وَأَوْ** which invariably commences a sentence, we cannot therefore say as we do with **بِأَللَّهِ** **أَقْسَمْتُ يَا أَقْسَمُ وَاللَّهِ** "I swore or swear, &c."

The particle **بِأَللَّهِ** is used indifferently in interrogative, imperative, and indicative, senses, but **وَأَوْ** is restricted to the latter form of expression; we cannot therefore agreeably to the authority of the grammarian Ruzee say **وَاللَّهِ أَخْبِرْنِي يَا لَا تُخْبِرْنِي**, which does not require translation. It occurs in the following Story.

حِكَايَةٌ

قَالَ بَعْضُ الْعِبَادِ مَرَّ بِيْ اِبْلِيسَ ذَاتَ يَوْمٍ وَانَابَ صَوْمَعَتِيْ فَقَالَ مُخَاطِبًا  
لِيْ وَاللَّهِ اِنَّكُمْ ضَالُّوْنَ عَنِ السَّبِيلِ تَرَكْتُمْ اِلَادَاتِ الدُّنْيَا لِيُؤَيِّدَ لِكُلِّكُمْ  
النَّفَاسِ الْاُخْرَى وَلَمْ تَعْلَمُوْا اَنَّكُمْ اَضَعْتُمْ اَيَّامَ اَعْيَارِكُمْ فَيَبَا اِللَّهِ  
مُسْتَعْنٍ عَنْهُ وَمَا بَعْدَ هَا اِلَّا التُّرَابُ تَاللَّهِ لَا كَيْدَ نَكْمُ تَرَبِّ الْكَعْبَةِ لَا ضِلَلَنَّاكُمْ  
ثُمَّ غَابَ عَنْ نَظَرِيْ وَلَمْ اَرَهُ فَنَعُوْذُ بِاللَّهِ مِنْهُ

S T O R Y.

The Devil, says a certain Devotee, appeared before me one day in my cell, and accosting me said, by God, you have strayed from the true path, having rejected the enjoyments of this life, for those of an (*uncertain*) futurity, and do not seem to know that you are squandering away your time in the performance of that of which God is altogether independant, for after this life you are nothing but clay—By God I will certainly deceive you.—By the Lord of the sacred Temple, I will most undoubtedly lead you astray. He then vanished from my sight, and I saw no more of him.—O LORD protect us from him!

OF THE PREPOSITION.

تَا

1. THE PREPOSITION تَا is used as a particle of swearing, restricted however in its application to the name of the Almighty God.

EXAMPLE.

تَا لِلّٰهِ لَأَضْرِبَنَّ زَيْدًا By God I will certainly beat Zued.

2. It must be remembered, that the قَسَم or oath, invariably requires, what is termed in grammar the جَوَابُ الْقَسَم or fact asserted by the oath; if this

Annotation.

The author of the ذُو Zoo, (a well known Commentary on the مِصْبَاح MISBAH) believes that the particle تَا, as used in forms of adjuring or obtesting, is exclusively appropriated to the word اللّٰه, and the language of the text seems to favor this opinion; but the author of the Moognee, whose authority on all grammatical questions may be considered decisive, admits of no such restriction in its application, and says it may be prefixed not only to the word اللّٰه, but also to the various epithets or attributes of God, as تَرْبُّهُ, تَرْبُّهُ الْكَعْبَةِ, تَرْبُّهُ الْوَحْدَانِ, &c.

should happen to be a nominal sentence, (جُمْلَةٌ اسْمِيَّةٌ) in a *confirmed* sense, (مُثَبَّتَةٌ) it must be invariably preceded by **إِنْ**, or the prepositive or inchoative particle **لَا**. \*

EXAMPLE.

والله إن زيدا قائمٌ } By God Zued is *certainly* standing.  
والله لزيد قائمٌ }

3. If the جَوَابُ الْقَسَمِ be a *negative* sentence, (مَنْفِيَّةٌ) it must be preceded by one of the three following particles, viz. **مَا**, **لَا**, **إِنْ**.

EXAMPLES.

والله ما زيد قائمٌ By God Zued is *not* standing.  
والله لا زيد في الدار ولا عمرٌ By God Zued is *not* in the house, nor Umr.  
والله إن زيد قائمٌ By God Zued is *not* standing.

Annotation.

The Arabian Grammarians consider **وَإِ** as the substitute of **هَـ**, and **تَـ** again as the substitute of **وَإِ**, as **وَرَأَتْ** for **تَرَأَتْ** *heirdom*; — **تَجَاءَ** for **وَجَاءَ** *front, opposition, &c.* so that agreeably to this theory the original particle of swearing is **بَـ**, of which **وَإِ** is a mere derivative or labial variation, and **تَـ** a substitute for **وَإِ** though the reason for such a change does not appear very obvious.

The particles of swearing are **بَـ**, **تَـ**, **وَإِ**, and **مِنْ**, but the three first are of most frequent occurrence. **لَا**, like **تَـ**, is said to be the substitute of **وَإِ** and is never found prefixed to any word but **مِنْ**—**لَا** is almost invariably prefixed to **رَبِّ** 'my Lord,' as **مِنْ رَبِّي** *by my Lord*, but is occasionally though very rarely found also with **اللَّهِ**.

\* The same as the **لَا تَكِيدُ**, or particle of *corroboration*.

4. But if it be a *verbal* sentence, (جُملَةٌ فعليةٌ) in a *confirmed* sense, it will be preceded by both *لَا* and *قَدْ*, or by *لَا* alone.

EXAMPLES.

والله لقد قام زيدٌ By God Zued most certainly stood.

والله لا أفعلن كذا By God I will certainly do so.

5. If the sentence be *negative*, (منفيةٌ) and the verb in the *past* time, it will be preceded by the particle *مَا*.

EXAMPLE.

والله ما قام زيدٌ By God Zued did *not* stand.

6. But should the verb be in the *arist* tense, it will require one of the three following particles, namely, *لَنْ*, *لَا*, *مَا*.

EXAMPLES.

والله ما أفعلن كذا  
والله لا أفعلن كذا  
والله لن أفعل كذا } By God I will certainly *not* do so.

Annotation.

*مَا* as a particle of swearing occurs under five various forms, viz. *مَا*, *مَا*, *مَا*, *مَا*, *مَا*. of these the two first are prefixed to the words *رَبِّي* and occasionally to *الله*, the other three to *الله* alone.

The Grammarian SEEBUWEN, is of opinion that *مَا* or *مَا* is an original particle of swearing synonymous with *بِأَيِّ*, but others imagine that *مَا* is an abbreviation, or contraction of *يَمِين* an oath; and that *مَا* is immediately derived from *أَيْمِين*, the plural of *يَمِين* or according to others, from *أَيْمِين* happiness, felicity.

7. The **جَوَابُ الْقَسَمِ** is rejected whenever the sentence preceding the **قَسَم** happens to be of a similar nature, to that which should constitute the **جَوَاب**.

EXAMPLE.

والله إن زيدا عالم Zued by God, is learned i. e. **زَيْدٌ عَالِمٌ وَاللَّهُ**

8. It is also rejected when the **قَسَم** happens to intervene between the two members of a sentence.\*

EXAMPLE.

**زَيْدٌ وَاللَّهُ عَالِمٌ** Zued by God is learned.

Annotation.

The letter **MEEM** (م) with the vowel point *Kusr*, is supposed to be a contraction of **مِنْ**, and with the *Summu* of **مِنْ**; or the first of **يَمِين**, the second **أَيْمَن**, both these derivations however are rejected by other grammarians who consider them from their homogeneity or labial affinity, as mere substitutes for **وَأَوْ**.

The word **أَيْمَن** occurs under seven various forms, viz. **أَيْمَن**, **أَيْمَن**, **أَيْمَن**, **أَيْمَن**, **أَيْمَن**, **أَيْمَن**, **أَيْمَن**. + of these, the two first are appropriated to the words **اللَّهُ**, as **أَيْمَنَ اللَّهُ**, and **كُتِبَ**, the temple, as **أَيْمَنَ الْكُتْبَةِ**—the other four are restricted to **اللَّهُ**.

Besides the above particles there are some nouns, such as **عُمْر** life, age, &c. **دَوْر** duration; continuation; **مَصْحَف** the book, i. e. Qooran; **كُتْبَة** the temple; **يَمِين** an oath; and **أَيْمَن** happiness, or the pl. of **يَمِين**, an oath, which are used in solemn forms of swearing.

The particle **تَا** has already been illustrated in page 72, which see.

\* i. e. between the subject and predicate.

+ These contractions are not more remarkable than **ECASTOR** and **EPOLLIS** in Latin, for **per ædem Castoris**; **per ædem Pollucis**, the latter of which agreeably to Vossius is composed of three words: namely **me** or **e** a particle of swearing and **deus Pollux**.

OF THE PREPOSITIONS.

عَدَا and خَلَا , حَاشَا.

1. THE PREPOSITIONS, حَاشَا , خَلَا and عَدَا , are used in the sense of *exclusion* or *exception*, (استثناء).

EXAMPLE.

جَاءَنِي الْقَوْمُ حَاشَا زَيْدٍ }  
و خَلَا زَيْدٍ وَ عَدَا زَيْدٍ } The tribe came to me (all) *except* Zued.

Annotation.

The prepositions حَاشَا , خَلَا and عَدَا considered either as verbs or particles, are every where used to denote the same idea, namely *exclusion*, or *exception*. As prepositions they govern the noun in the aorist, and as verbs in the accusative or objective case. SEEBUWUEH indeed with most of the Busruh Grammarians deny the verbal character of حَاشَا , and contend that it is invariably an exceptive particle, while the grammarians حَرْبِي HURUBEE, مَازَنِي MAZUNEE, مَبَرَّد MOO-BURRUD, زُجَّاج ZUJJAJ, أَخْفَش UHFUSH, فَرَّار FURRAA, أَبُو عَمْرٍو ABOO-UMR, شَيْبَانِي SHEEBANEY and others, concede the point, but consider it as indeclinable. This however is contradicted by the author of the Mooghnee, who proves it to be regularly inflected like other verbs, as حَاشَيْتُ , حَاشَيْتَ , حَاشَيْتُمْ , &c. The aorist tense حَاشِي occurs in the following verse:

وَلَا أَرَى فَاعِلًا فِي النَّاسِ يَشِبُّهُ  
وَلَا حَاشِيٍّ مِنْ أَلْقَوْلِ مَنْ أَحَدٍ

I perceive none among the people,  
Nor do I distinguish any in the tribe equal to him in action.

It is difficult to assign any determinate signification to the word فَاعِل in the above verse, though there can be little doubt that some specific sense is intended. It may perhaps be worth

X

2. Some grammarians are of opinion that the above particles occur occasionally as verbs, and in this character they govern the noun immediately following them in the accusative or objective case, the agent being an inherent or concealed pronoun.

EXAMPLE.

جَاءَ نَبِيَّ الْقَوْمِ حَاشَا زَيْدًا  
وَحَلَا زَيْدًا أَوْ عَدَا زَيْدًا } The tribe came to me (all) *except* Zued.

Annotation.

remarking that it occurs once in the Qooran in a sense apparently equally absolute, which the expositors have thought necessary to comment on.—The passage is as follows :

قَالَ قَائِلٌ مِنْهُمْ لَا تَقْتُلُوا يُوسُفَ وَالْقَوْمَ فِي غَمَاةٍ الْجَبِّ يَلْتَقِطُهُ بَعْضُ السَّيَّارَةِ إِنْ كُنْتُمْ فَاعِلِينَ ٥

Which SALE has translated thus,—“one of them spoke and said, slay not JOSEPH, but throw him to the bottom of the well, and some travellers will take him up if you do this.” In which he appears to have followed MARACCI, as indeed he very frequently does, who renders the phrase *إِنْ كُنْتُمْ فَاعِلِينَ* “si fueritis hoc facientes,” The Commentators on the Qooran, aware of the general sense of the term, have accordingly proposed various interpretations, the most approved of which seems to be that of HOOSUEN KASHUFEZ—who says the word *عَل* in the above passage must be rendered, *acting with prudence and deliberation*, the sense will then be—“Do not slay JOSEPH, for by that you will draw upon yourselves disgrace and reproach; but if you act with prudence and deliberation, cast him into a pit by the road side, where he may be discovered and taken out by travellers.”

*حَاشَا* written also *حَاشَ* and *حَشَا*, \* assumes in its verbal character a two-fold signification.  
1. *تَنْزِيهٌ* averting or abstaining from. 2. *سَتْمٌ* exclusion, or exception.

\* It is seldom found in this form.

3. When two of the above particles, namely *خَلَا* and *عَدَا*, are preceded by *مَا*, or whenever they happen to commence a sentence, they invariably assume a verbal character.

EXAMPLES:

$$\left. \begin{array}{l} \text{مَا خَلَا زَيْدًا} \\ \text{مَا عَدَا زَيْدًا} \end{array} \right\} \text{Except, or without Zued.}^*$$

Annotation.

In the first sense it occurs in the following passage in the Qooran, *وَقُلْنَا حَاشَ لِلَّهِ مَا هَذَا بَشَرًا* + which MARACCI renders,—“Proh deum, non est hic homo!” And SALE copying, or rather translating the Latin,—“O God, this is not a mortal!” The phrase *حَاشَ لِلَّهِ* means properly “God avert,” *AVERTAT DEUS*, hence the common expression *حَاشَاكَ* or *حَاشَا لَكَ* *absit a te*, in some respects resembling the Latin salutation *Salvus sis*. In its second or *exceptive* signification it is Synonymous with *حَاشَيْتَهُ* and *حَاشَيْتُهُ*, *I excepted, or rejected him*.—In this two-fold capacity of *salutation* and *exception* it resembles the English *save*, in the equivoque of CHAUCER’s *Sompnour* against the *FRIAR*.†

“God save you all, save this cursed *FRIER*.”

The author of the *Maoghnec* however on the authority of *ابن مسعود* *Isno Musoon*, (one of the seven readers of the Qooran) reads the sentence *حَاشَا لِلَّهِ*, with the *tunacen*, and asserts that *حَاشَا* is here a noun in the objective case, the verb *حَاشَيْتُ* being understood, as *حَاشَيْتُ* *حَاشَا* equivalent to *نَزَهْتَ تَنْزِيهَا لِلَّهِ*.

\* The sentence if complete would be *جَاءَنِي الْقَوْمُ مَا خَلَا زَيْدًا* all the tribe came to me with the exception of Zued. *خَلَا* used intransitively means *deserted, empty*, as in the 3d. MUQAM of HUREREZ, *وَحَلَّتِ الْهَرَابُ*, “the stalls were empty,” and hence *خَال* a *desert*, &c. The infinitive *عَدُو* signifies literally *transition, or passage*, hence *عَدَوِي*, and *عَدَا* *sin, transgression*, retaining in Arabic the same relation to the primitive sense as the English term.

+ The exclamation of the women when introduced by ZULEIKHA to JOSEPH.

† See diversions of Purley, Vol. I.

خَلَا الْبَيْتُ زَيْدًا The house freed itself of Zued.\*

عَدَا الْقَوْمُ زَيْدًا The tribe excluded, or excepted Zued.

### Annotation.

حَاشَا When preceded by the negative particle مَا is always a verb, as in the following example:

لِسَامَةِ أَحَبَّ إِلَيَّ مَا حَاشَى فَاطِمَةَ

"OSAMU is most beloved by me, but not to the exclusion of FATIMU."

The prepositions خَلَا and عَدَا, are in every respect Synonymous with حَاشَا except that they are never found in the sense of تَنْزِيه. They correspond with the word *sane, except, unless, besides, &c.* and their derivation is altogether as obvious as the English prepositions: whatever grammatical character therefore they may at present assume, it is obvious they cannot be considered in the light of original particles; they all occur in the following Story.

A verb.

حَكِي أَنْ الرَّشِيدَ قَالَ يَوْمًا لِأَصْحَابِهِ لَعَدِ اسْتَعْبَلْتُ الْمُسْكِرَاتِ مَا خَالَ

S T O R Y.

The Calif HAROON RUSHEED, said once to his companions,—I have drank of every thing intoxicating except the juice of the grape and the poppy,\* in consequence of not finding any advantages from them; and I have indulged my taste in every sort of confectionary except that termed *Khubees*,† for I found it oppress the stomach and slow of digestion; and I dressed in every sort of costly garments except black, for that *colour* is odious; and I favoured and patronized all classes of the people both high and low except that of the Barmecides, who are no better than they should be. It becomes every one therefore to make a

† *خَبِص* from *خَبَسَ* he mingled, or mixed up together; a sort of confectionary or sweetmeat, made of dates, honey, and other ingredients, and with the fem. *خَبِصَة* is used absolutely to denote the elegancies and luxuries of life, as in the following verse from the HUREREE, in which ABOO-ZUED, commences his apology to HAUS, for having fraudulently assumed the character of a religious itinerant:

شَعَرُ  
لَبَسْتُ الْخَبِصَةَ ابْغِي الْخَبِصَةَ      وَأَنْشَبْتُ شَصِي فِي لَبِ الشَّيْصَةِ  
وَصَيَّرْتُ وَعَظِي أَحَبُّو لَكَ      أَرْبَعُ الْقَبِصِ هَا وَالْقَبِصَةِ

"I put on the garment of devotion, with the hope of bettering my condition,  
And baited my hook for every fish:  
I made religious admonition a net,  
The better thereby to entangle every kind of prey."

The Arabic word *قَبِص* *qamees* a tunic, *χιτων*, is found with little variation in several languages; thus in French, *chemise*; Italian, *camiscia*; Spanish and Portuguese, *camisa*; Hindoo *kumeez*, and Bengalee *kamiz*. Like its Synonymes in English and Latin, namely *shift*, and *prætexta*, it seems to have an equivocal meaning, and was a dress peculiar to Arabian devotees.

[I made religious admonition a net.] This will remind the reader of a similar metaphorical expression in the new Testament (See Math. Chap. 4. v. 19. and Mark Chap. 1. and v. 17.)  
*καὶ ποιήσω ὑμᾶς ἁλιεῖς ἀνθρώπων*, and I will make you fishers of men.

judicious selection of the objects of enjoyment, that he may lead a life of unmixed pleasure.

### CONCLUDING REMARKS ON THE PREPOSITIONS.

The preceding view of the Arabic prepositions, will be found to contain almost every thing essentially useful. The Annotations are intended to convey a more precise and accurate notion of their extensive force, and the Stories and Extracts will illustrate their practical application to the purposes of speech. Minute discussions on their origin and grammatical character, I have purposely omitted, not that I consider such discussions, as either useless or uninteresting, but that I am disposed to believe they are unsuitable to the nature of the present work. Theoretical disquisitions are good in their proper place, but they are not in their proper place in an elementary treatise, which should aim rather at the illustration of specific rules, than the discovery or examination of abstract principles.

End of the Prepositions.

CLASS SECOND.

1. The *second* class contains *six* words, termed *الْحُرُوفُ الْمَشَبَّهَةُ بِالْفِعْلِ* or *PARTICLES resembling VERBS*, which precede in construction both *TERMS* of a proposition, governing the *SUBJECT* in the *ACCUSATIVE* or *OBJECTIVE* case, and the *PREDICATE* in the *NOMINATIVE*, viz.

لَعَلَّ , كَيْتَ , لَكِنَّ , كَانَ , أَنْ , إِنَّ .

Annotation.

The particle *أَنْ* governs generally the subject of a proposition in the accusative or objective case, I say generally, for examples are produced in which it is supposed to govern both terms in the accusative. The following examples may be sufficient to illustrate this.

إِذَا اسْوَدَّ جَنُوحُ اللَّيْلِ فَأَتَتْ وَلَتَكُنْ  
خُطَاكَ خَفَاً إِنَّ جُرَّاسَنَا سَدِيدٌ

Approach at night when darkness spreads her sable wings,  
But let your steps be silent and cautious, for our centinels are truly Lions.

In which the words *جُرَّاسٌ* and *سَدِيدٌ* the subject and predicate, are both rendered *Munsoob* by *أَنْ*.

And in the following example from the *حَدِيثُ* or traditionary records of the Prophet.

إِنَّ قَعْرَ جَهَنَّمَ سَبْعِينَ خَرِيفًا

"Verily the depth of Hell is equal to a seventy years Journey."

MILTON in like manner measures *space* by *time*.

"Nine times the space that measures day and night  
To mortal men."

It is worth remarking that the three great Poets, HOMER, VIRGIL and MILTON, have all exerted themselves in extending the idea of the depth of hell. HOMER makes it as far beneath the deepest pit of earth, as the heaven is above the earth. II. viii. 16. VIRGIL twice as far, *Æn.* vi. 578, and MILTON thrice as far; their efforts are commendable no doubt, but not to be compared with the more *magnanimous* flights of a modern Bard.

## COMMENTARY.

2. Of these, the *two* first, namely *إِنَّ* and *أَنَّ*, are used, to *verify*, or *corroborate* the sense of a given proposition. (لِلتَّحْقِيقِ)

### EXAMPLES.

إِنَّ زَيْدًا قَائِمٌ “Certainly Zued is standing.”

بَلَغَنِي أَنَّ زَيْدًا مُنْطَلِقٌ { It reached me, (i. e. the news,) that Zued  
was *certainly* departing.

### Annotation.

“ And he fell, and he fell,  
To the regions of hell;

*Nine centuries* bounced he from cavern to rock,  
And his head, as he tumbled, went nickety knock,  
Like a pebble in Carisbrook well!”

See the new THEATRUM POSTARUM.

It must be remembered that instances of the above government are by no means numerous, and that grammarians have accounted for the anomaly on other principles, which however I do not deem of sufficient importance to repeat.

The word governed by *أَنَّ*, is sometimes a pronoun understood.

### EXAMPLE.

شعر

إِنَّ مَنِ يَدْخُلُ الْكَنِيسَةَ يَوْمًا  
يَلْقَ فِيهَا جَانًّا ذَرًّا وَظَبْرًا

“ Whoever enters the Synagogue, will certainly find in it beautiful youths of both sexes.”

The Arabian Grammarians will not allow the pronoun *مَنِ* in the above verse, to be the word governed by the particle, but *أَنَّ* understood, viz. *أَنَّ* for *أَنَّ*—The sense will then run—“ the fact is this, whoever, &c.”

The particle is sometimes written without the *Tushdeed* with the *Noon Sakin*, or quiescent; and in this form has seldom any government, but the grammarians of Koofuh believe that in all

3. The *third* is كَانَ in the sense of تَشْبِيه, similitude, or comparison.

EXAMPLE.

كَانَ زَيْدًا أَسَدٌ "Zued is like a lion."

Annotation.

such instances it must be translated negatively, example إِنَّ زَيْدًا لَمْ يَمْطَلِبْ "Zued is not but going." But this it may be presumed is a distinction, without a difference, for, "Zued is not but going," and "Zued is certainly going," convey in fact the same meaning.

OF THE PLACE OF إِنَّ IN COMPOSITION.

Grammarians have assigned the following *five* places to إِنَّ in composition.

1. It commences a sentence, as إِنَّ زَيْدًا قَائِمٌ "Zued is certainly standing."
2. It follows the various tenses derived from قَوْلٌ as يَقُولُ إِنَّ زَيْدًا قَائِمٌ.
3. It occurs after the relative pronoun, as جَاءَ الَّذِي إِنَّ أَبَاهُ عَالِمٌ "He came, whose father is certainly learned."
4. It is found in that sentence the predicate of which is preceded by the لَام of corroboration.

وَاللَّهُ يَعْلَمُ إِنَّكَ رَسُولُ اللَّهِ "And God knows, that verily you are his Prophet."

5. It precedes the جَوَابُ التَّسْمِيَةِ as already explained.

EXAMPLE.

وَاللَّهُ إِنَّ زَيْدًا قَائِمٌ "By God Zued is certainly standing."

OF THE DERIVATION OF إِنَّ.

The Arabian Grammarians have amused themselves in tracing the origin of this word, but have produced nothing satisfactory. Their principles of derivation, if indeed they can be said to have any such principles, are so whimsical and extravagant, that it may be doubted, whether they can be matched by those of our most fanciful European Etymologists. They seem to pay little regard to the original sense of the term, from which a word may be derived, and make no scruple to refer it to any word, or indeed to any phrase, provided

4. The *fourth* is لَكِنَّ in the grammatical sense of اِسْتِدْرَاك and is used to explain some uncertainty supposed to exist in the first branch of a compound proposition, it can therefore only occur between two sentences, distinguished from, and contrasted with each other, by reason of some opposition contained in them, or denied by one of them.

E X A M P L E S.

غَابَ زَيْدٌ لَكِنَّ بُكْرًا حَاضِرٌ “Zued is absent *but* Bukur is present.”  
 مَا جَاءَنِي زَيْدٌ لَكِنَّ } “Zued did not come to me *but* OMR did.”  
 عُمَرُ وَاجَاءَنِي }

Annotation.

they are able to point out by the laws of permutation, the causes by which such a change may be legitimately effected:—for instances they derive the word مَا (but,) from the sentence مَا مَهَيَّاكُنْ شَيْءٌ i. e.—“whatever may happen,”—or,—“in whatever state things may be,” by rejecting the last three words and subjecting the remaining one, (مَهَيَّا) to all the evolutions of grammatical change.\* By some grammarians لَكِنَّ is supposed to be compounded of the negative particle لَنْ and the first personal pronoun أَنَا, as the Arabs are known occasionally to make use of the expression, لَنْ أَنَا قَائِمٌ, equivalent to مَا أَنَا قَائِمٌ, “I am not standing.”

لَكِنَّ is also a verb and its derivation is accounted for in seven different ways.

1. It may be the 3d pers. plur. fem. of لَبَسَ lassitude, weariness, as in the example. لَبَسْنَ النِّسَاءُ, i. e. لَبَسْنَ “The women were fatigued,” the original form of the word لَبَسَ having undergone the necessary changes established by the laws of permutation.

2. It may be referred to لَبَسَ originally لَبَسَ vicinity.

3. Or the 3d pers. mas. pret. pass. from لَبَسَ complaining: being originally in the pass. voice لَبَسَ.

\* This is perhaps as happy an Etymology as King PARIN, from the Greek ΠΑΡΙΝ. Thus, ΠΑΡΙΝ—ΠΑΡΙΝ—ΠΑΡΙΝ—Diaper—Nepkin—Nipkin—Pipkin—Pippin—King PARIN. See Div. Parley. Vol. 1, p. 130.

5. The *fifth* is لَيْتَ, and is used to denote *supplication*, or *wishing*, (تَهْنِئَةٌ).

EXAMPLE.

لَيْتَ زَيْدًا قَائِمًا } " I wish Zued were standing, or, I desire  
equivalent to, }  
أَتَهْنِئُ قِيَامَهُ } his standing."

Annotation.

4. Or the 2d pers. imp. act. voice, from the same verb. اَرْنِي being originally اَرْنِي.
5. The 3d. pers. plur. f m. imp., act. voice derived from اَرْنِي. Synonymous with قُرْبُ vicinity. The imper. being originally اَرْنِي.
6. The 3d pers. plur. fem. imper. of the act. voice from اَرْنِي. Synonymous with قَرَّبَ lassitude, originally اَرْنِي.
7. And lastly it may be 3d pers. sing. imp. fem. with the Noon of corroboration, from the root وَايِي promising, stipulating, &c.

The rules of permutation by which the above changes are authorised, I have purposely omitted; they would have swelled out these notes to a disproportionate size, and can not be necessary to the regularly instructed Student.

Grammarians have discovered another use of اَرْنِي which they term جَوَابِي concessive, or responsive, and as such it is Synonymous with نَعَمْ; to illustrate which they produce the following

EXAMPLE.

حَكَمَ أَنَّ فُضَالَ بْنَ شَرِيكَ أَتَى ابْنَ الزُّبَيْرِ فِي حَاجَةٍ فَقَالَ إِنَّ نَاقَتِي تَعَبَتْ فَقَالَ لَارْحُهَا فَقَالَ  
لَا عَطَشَهَا الْطَرِيقُ فَقَالَ لَهُ مَا جِئْتُكَ مُسْتَطَبًّا وَإِنَّهَا جِئْتُكَ مُسْتَنْبِحًا لَعَنَ اللَّهُ نَاقَتَهُ  
نَعَمْ  
حَتَّى لَمْ يَسْمَعْ أَحَدًا فَذَلَّ ابْنَ زُرَّاءَ كَيْبَهَا

6. The sixth is لَعَلَّ denoting *hope*, or *expectation*. (تَرْجِي).

EXAMPLE.

لَعَلَّ السُّلْطَانَ عَابِلٌ “Would that the king were just.”

Annotation.

“It is related that FOZZALUH IBN SHUREEK, waited once upon INNOOZ ZOORUER, for the purpose of soliciting his assistance on some emergency, and addressing him said; truly my camel is wearied. Then let her rest herself replied ZOORUER: but the fatigue of the road rejoined the other has made her thirsty. You had better give her something to drink continued ZOORUER—I am not come to you exclaimed the other (in a passion), to solicit medical advice, but to ask for assistance.—The curse of God on the camel that brought me to you! Yes replied ZOORUER, (coolly) and her rider into the bargain.”

OF THE PARTICLE اَنَّ.

The particle اَنَّ with the *Humza Mustoohu*, or marked with the vowel *Fut'hu* is properly a derivative, or different form of اِنَّ governing the subject in the objective, and the predicate in the nominative case. When joined with the مَا كَانَ it acquires a *restrictive* sense, termed by Arabian Grammarians اِفَادَةُ الْخَصْرِ, that is, the *restriction* or *limitation* of the موصوف, or substantive noun to some one particular attribute, or vice versâ, an attribute to a substantive noun, corresponding in this respect with the particle اِنَّهَا. Example from the Qooran.

قُلْ اِنَّهَا يَوْحٰى اِلٰى اَنْبِيَآءِ الْهٰكِمِ اِلَّا وَاحِدٌ

“Say (O MOONUMMUD)! no other has been revealed to me, than that your God is one God.”

لَعَلَّ is considered occasionally Synonymous with اَنَّ.

EXAMPLE.

اَيْتِ السُّوقَ اَنْتَ تَشْتَرِي لَنَا شَيْئًا

“Come to the market, perhaps you may purchase something from us.”

The particle اَنَّ is never found to commence a discourse.

7. The distinction between *لَيْتَ* and *لَعَلَّ* is this: *لَيْتَ* is used to express a wish either *possible*, or *impossible* of attainment, as in the example already recorded, and the following.

لَيْتَ الشَّبَابَ يَعُودُ "Would to God that youth would return."

### Annotation.

#### OF THE WORD *كَانَ*.

The true origin of this word seems little understood, though I believe it is generally considered by the Arabian Grammarians as compounded of the *كافُ التشبيه*, or *Kaf of similitude*, and the particle *ان*;—the original construction therefore of such a sentence as *كَانَ زَيْدًا أَسَدًا*, "Zued is like a Lion" would have been, agreeably to the above theory, *ان زَيْدًا كَأَسَدٍ*, and they readily account for this *Hysteronproteron*-evolution, by simply remarking, that the chief object in the mind of the speaker on all such occasions being *similitude* or *comparison*, he would naturally commence the sentence with a word expressive of such similitude, thus *كَانَ* and hence with the slight change of *Kusrah* into *Fatha*, would eventually be produced the word *كَانَ*! the author of the *Mooghnee* however rejects this theory and considers it, as an original uncompounded particle.

#### OF THE VARIOUS SENSES OF THE WORD *كَانَ*.

*كَانَ* has four different significations.

*First.* It denotes *Similitude*, (*تشبيه*) and this no doubt is its most general acceptation, though some grammarians have discovered, or think they have discovered a very subtle condition attending it in this character. The *Predicate* of *كَانَ*, in the sense of *similitude*, say they, must belong to the class of primitive nouns, termed *جامد* as *كَانَ زَيْدًا أَسَدًا*, &c. but if to that of *derivative* nouns, (*مشتق*) or to nouns of *time* and *place*, (*ظروف*) the word *كَانَ* will assume the sense of *doubt* or *uncertainty*.

8. But *لَعَلَّ* can only be used to express the *hope*, or *expectation* of some event of *possible* occurrence.

Annotation.

EXAMPLES:

*كَانَ زَيْدٌ أَقَامَ*  
*كَانَ زَيْدٌ إِيقَوْمَ* } Perhaps Zued is standing.

*كَانَ زَيْدٌ أَعِنْدَكَ* Perhaps Zued is with you.

*كَانَ زَيْدٌ أَدْفَى الدَّارِ* Perhaps Zued is in the house.

3. It occurs also in the sense of verification, (*تَحْقِيقٌ*) agreeably to the opinion of the grammarians of Koofub.

EXAMPLE.

شعر

*فَصَبَّحَ بَطْنُ مَلَّةٍ مَشْعَرًا\**  
*كَانَ الْأَرْضَ لَيْسَ هَاهُنَا*

"He entered Mukku in the morning horror struck, (at its deserted appearance),  
For Hoozham was no longer in the country."

In the above verse *كَانَ* is supposed Synonymous with *لَا*.

4. In the sense of *approximation*, (*تَقْرِيبٌ*).

EXAMPLES.

*كَانَتْكَ بِالشِّتَاءِ مُقْبِلٌ* The winter season will *soon*, or *is about to* visit you.

*كَانَتْكَ بِالْفَرَجِ آتٍ* You will *shortly* enjoy pleasure, or pleasure is *about* to visit you.

\* *أَشْعَرَ* Is a verb of the 3d class of increased quadrilaterals, and signifies also, *his hair stood upright*; also *he shrunk from fear*, &c.

9. The above six particles, when joined with the  $\text{مَاءُكَافَهُ}$ , or *prohibitive* particle  $\text{مَّا}$ , lose their governing power.

EXAMPLE.

$\text{إِنِّى اللّٰهُ وَاحِدٌ}$  "Verily there is no God but one God."

Annotation.

$\text{كَانَكَ بِالدُّنْيَا لَمْ تَكُنْ}$  } The time *approaches* when you must depart this world,  
 $\text{وَبِالْآخِرَةِ لَمْ تَزُلْ}$  } for an everlasting residence hereafter.

OF THE WORD  $\text{لَكِنْ}$ .

FURRAA is of opinion that  $\text{لَكِنْ}$  is compounded of  $\text{لَا}$  (with the Noon quiescent,) and the particle  $\text{إِنْ}$ ;—viz.  $\text{لَا إِنْ}$  the *Hamza* being removed, euphoniae gratia, and the *Noon* rejected in consequence of the junction of two homogeneous letters under the sign *Idgham*. This however is contrary to the doctrine of the schools of Bāsrūh, who consider it an uncompounded primitive. On the other hand the grammarians of Kūsfah, maintain that it is a compound of the negative  $\text{لَا}$ , and  $\text{إِنْ}$ , the intervening *Kaf*, being an expletive;—thus,— $\text{لَا كَانَ}$ , the *Kusruh*, of *Humzu*, is transferred to *Kaf*, after rejecting the vowel point of the *Humzu*, and the pleonastic letter *ك* being omitted leaves  $\text{لَا إِنْ}$ , so that in the sentence  $\text{مَا جَاءَنِي زَيْدٌ لَكِنْ عَمْرٍاءُ}$  the word  $\text{لَكِنْ}$  would be synonymous with  $\text{لَا إِنْ}$ , but Ruzee rejects the etymology on the plea that by this change, the sense of the sentence would be entirely altered, converting a *disjunctive* or *adversative* proposition into a *conjunctive*, both members of the compound being thereby rendered negative.

The word is also written with a single *Noon*, quiescent thus  $\text{لَكِن}$  but grammarians seem divided in opinion, whether it should be considered merely as a different form of  $\text{لَكِنْ}$  or an independent primitive; it is frequently accompanied by the conjunctive particle  $\text{وَأَوْ}$ , the insertion or omission of which is guided by sundry conditions which I omit recording, as unprofitably minute.

Annotation.

OF THE WORD لَيْتَ.

There is little to be remarked of the word لَيْتَ. It is used to express desire or volition, and seems to correspond with *utinam* or *O si!*\* in Latin, and *wish*, or *would*, in its optative and imprecative acceptance, in English. The Grammarian FURNAI contrary to the general opinion, says it governs both the subject and predicate of a proposition in the objective case, and quotes the following as an Example.

يَا لَيْتَ أَيَّامَ الصَّبَا رَوَّاجِعًا “O that the days of youth would return!”

It occurs in the following beautiful verse of SHEESH SUDER in the 19th Story, and 5th Chapter of his Goolistan.

شعر  
مَا رَمِيْ ذِكْرَ الْحَبِيْبِ بِمِسْعِي  
لَوْ سَمِعْتَ وَرَقَّ الْحَبِيْبِ صَاحَتَ مَعِي  
يَا مَعْشَرَ الْخَلَاءِ قَوْلُ لَوْلِيَّ عَافِي  
لَيْتَ قَدْ رَمِيْ مَا يَبْقَلِبُ الْمَوْجِعِ

VERSE.

From those dear scenes that round my mistress side,  
Sad strains of sorrow wake a lovers sighs;  
Could they but learn, the Doves would feel my woe,  
And soothing notes of sympathy bestow:  
To him, my friends, who love's soft grief disdains  
And idly jests at unexperienced pains,  
Be this your answer—Oh, may heaven impart  
To thee, acquaintance, with a lover's heart.

OR LITERALLY.

“The intelligence that has reached me, from the abode of my beloved.  
Were it heard by the Turtle-Doves, they would join their complaints with mine.  
O my friends, say to him who has never experienced the anguish of love,  
Would to God thou wert acquainted with what passes in the heart of a lover.”

\* لَيْتَ and لَوْلِيَّ occur together in composition, after the manner of *O si* in Latin, in the phrase, “*O si O si*  
O si! Wishers and woulders are never good house-holders.”

Annotation.

Sir WILLIAM JONES, has quoted these lines in his history of the Persian language, in a manner that destroys the versification, and embarrasses the sense, by the introduction of the conjunction **و**, in the second, and of **يا** in the commencement of the fourth line; as the measure terminates on the penultima of the word **معافى**, the final syllable of which, (i. e. **فيا**), by the figure *Dialysis*,\* must in reading be made to commence the following line, thus :

يَا مَعْشَرَ الْخَلَائِقِ قُولُوا لِلَّهِ عَسَىٰ

قُيِّلَتْ

He has also mistaken the sense of the two first lines, taking the relative **ما** for a negative particle, and the word **جَهَنَّمَ** for a turtle-dove. The word **جَهَنَّمَ** with the first letter *Muksoor* and the second *Mustookh*, signifies properly a meadow, the resort of fawns, and is hence transferred to denote the abode of beautiful damsels, (**مَنْزِلُ الْحَبِيبِ**) **جَهَنَّمَ** and in the second line, with the *He Mustookh* and *Meem Muksooru*, is a contraction of **جَهَنَّمَ**, (and not as GOLIUS says, of the plural **جَهَنَّمَ**) the generic term for *pigeon*, of which **وَرَقَّارٌ** the *turtle-dove* is a species. **وَرَقَّارٌ** is the plural of **وَرَقَّارٌ**, like **حَبْرٌ** of **حَبْرٌ**. This inaccurate reading seems to have been copied from GENTIUS, who has himself overlooked the true sense of the lines, translating **جَهَنَّمَ** in the first line *delicium*, and in the second *campestris*, thus :

" Illud quod de mentione *delicii* ad auras meas pervenit,

Si turtur quoque *campestris*, audiret, mihi congemeret."

**وَرَقَّارٌ** may also be translated,—"*the Doves of that abode*," i. e. of his mistress, as expressed in the first line. In some copies of the Goolistan **قُلُوبُ الْخَلَائِقِ** is found instead of **جَهَنَّمَ**—i. e. "Say to the intelligent &c." With this reading, the particle **يا** would be required in the next line to complete the measure. It may be observed in the above example,

\* A word thus divided is said in the proaody of the Arabs to be **مَرْهُونٌ** literally *pledged*.

## Annotation.

that *لَيْتَ* contrary to the rule laid down by the Commentator, is followed by a verb; but this is a common ellipsis in poetry, a noun or pronoun being understood. Some copies read *لَسْتُ* instead of *لَيْتَ* which has nothing to recommend it. The author of the Mooghoees quotes the following example in which *لَيْتَ* is followed by a verb, *فَلَيْتَ دَفَعْتُ إِلَيْهِمْ عَنْ سَاعَةٍ* "Would to God you would banish from me grief, even for a moment." In which the second personal pronoun is understood.

OF THE WORD *لَعَلَّ*.

The word *لَعَلَّ* denotes contingency in some event, in a twofold manner.

First. Hope or expectation, (*تَوَقُّعٌ*) of some contingent good.

Second. Fear or dread, (*إِشْقَاقٌ*) of some contingent evil.

## EXAMPLES.

1. *لَعَلَّ الْحَبِيبَ مُوَّاصِلٌ* Perhaps (I may gain) an interview with my beloved.
2. *لَعَلَّ الرِّقِيبَ حَاصِلٌ* Perhaps my rival is (there) present.

It denotes occasionally causality or illation, (*تَعْلِيلٌ*). Example from the Qooran:

*افْعَلُوا الْخَيْرَ لَعَلَّكُمْ تَفْلَحُونَ* "Do good, (works) that you may be happy."

The word *لَعَلَّ* agreeably to the author of the Qimoos, assumes eleven various forms, viz.

*لَعَلَّ لَعَنَّ لَعِنَ لَعَنَّ لَعَنَّ لَعَنَّ لَعَنَّ لَعَنَّ لَعَنَّ لَعَنَّ*

## CONCLUSION.

The above six words are termed *أَلْحُرُوفُ الْمُشَبَّهَةِ بِاللَّعَلِّ*. 1. From their similarity in the number of letters composing them, being either three or four. 2. Having their final letter like the präterite of verbs, marked *Maftoah*, i. e. with the vowel point *Futhu*; and lastly from

Annotation.

their taking after them two nouns which they immediately govern, like transitive verbs, the accusative of which they respectively assume.

EXAMPLES.

أَكْدَتْ } equivalent to } أَكْدَتْ } I strengthened, or verified.  
حَقَّقَتْ } حَقَّقَتْ }

كَانَ \_\_\_\_\_ شَبَّهْتُ I compared, or assimilated.

لَكِنِّي \_\_\_\_\_ اسْتَدْرَكْتُ I restored, or amended.

لَيْتَ \_\_\_\_\_ تَهَنَّيْتُ I supplicated, or wished.

لَعَلَّ \_\_\_\_\_ تَرْجَيْتُ I hoped, or expected.

The word **اسْتَدْرَكَ** has so many various senses, that it is not easy to reduce it to a general idea. **دَرَكَ** from which it is derived signifies in the past time: 1. He followed, comprehended. 2. Intransitively, he arrived or reached the age of puberty, as a boy, **قَتَى الرَّبِيعَ قَدْ أَبْرَكَ**, "the child of spring was now mature." On the measure **اسْتَفْعَلَ** it signifies. 1. He wished to follow. 2. He comprehended. 3. He restored, amended or repaired, as in the phrase **اسْتَدْرَكَ الشَّيْءَ** **بِالشَّيْءِ** "he undertook to repair one thing by another," resembling in this respect the sense ascribed to *but* in English by Horne Tooke,—namely to *boot*, *superadd*, &c. The latter sense namely *reparation*, or *restoration*, appears most suitable to the grammatical term **اسْتَدْرَكَ** as applied to the conjunction **لَكِنِّي**, whose office is properly the *restoring* or *amending* as it were, of some doubt or uncertainty originating in the first branch of a compound proposition which meaning may be illustrated by the ingenious remark of the Abbé SICARD. "Ainsi, après l'énonciation d'une première proposition, trouvant un obstacle, ou un empêchement à l'exécution de ce qu'on vient de dire, on semble avertir l'auditeur ou le lecteur qu'il faut s'arrêter; on lui dirait, en Latin, *sede (sed) arretet*: il ya ici une restriction, un changement

à faire; en grec, *Allez*; il y a, ici, une borne, un achoppement; en anglais, *but*; il y a un *plus*, un point majeur à examiner; enfin il y a en français, un *MAIS*.”\*

The application of the various words in the *second* Class, will be found illustrated in the two following Stories.

## STORY.

A scholar whose understanding was none of the brightest, asked his master one day regarding the *SERVILE LETTERS*. The master replied, *Saaltoomoonecha*, (i. e. you asked me that *before*). The scholar not comprehending the drift of

\* *MAIS* he derives from the Latin *Magis*, and says it is an old adverb Synonymous with *Plus*, as in the phrase “*Je n'en peux MAIS*, for *J'en'en peux Plus*, and in the following verse:

“ Pourquoi de vos chagrins, sans cesse, à moi vous prendre?

“ En puis-je *MAIS* de soins qu'on ne va pas vous rendre?”

the reply, (which infact included the whole of the Servile letters), said, I attend you regularly every day but never remember asking you any such question. The Shuckh replied, *A'yuom tunsao*, (i. e. to day you forget). No, said, the student, I do not forget. O blockhead! exclaimed the master, what, you are still in the dark! I heartily wish you were changed into an ass, for I have told you them twice. The scholar on hearing this was ashamed of his want of comprehension, and returned home, repeating, as he went along. Would that the Almighty, had granted me capacity.

## S T O R Y. II.

A certain King of Persia had grown so excessively fat, that though naturally of a graceful form, he resembled in size more an elephant than a man. His Physicians in consequence tried various expedients to reduce his enormous size, but their efforts had no other effect than to encrease it: in this state, a certain eminent Physician waited upon him, and said, I will undertake to prescribe for your Majesty, provided you allow me three days to consult your horoscope, and determine on some medicines suitable to your case; perhaps through the aid of the Almighty I may effect your recovery. At the expiration of the time required, the Physician waited upon the King, and said, I have consulted the aspect of the stars, and observe that you have but four days more to live: when I saw this your approaching destiny, I was much troubled, would to God I had not seen it. If you doubt my words, let me be confined close to you and treated agreeably to the event of my prediction. Then the King gave orders for his confinement, and began to prepare for death, discarded all his former amusements, excluded himself from the eyes of mankind, and

resigned himself wholly to sorrow and affliction; and his grief increased daily. And when the appointed day arrived, the King called the Physician before him, and spoke to him on the subject. The Physician replied, I made use of this stratagem, in order to reduce your corpulency, for I knew that until this occurred, no medicines would be of any avail, but now I may prescribe to you with effect. Then the King ordered him a dress of honor, and gave him a suitable reward.

### CLASS THIRD.

The *third* class, contains *two* PARTICLES, which resemble the imperfect verb *لَيْسَ*, possessing like it a *negative* signification. They precede both TERMS

#### Annotation.

#### OF THE GOVERNMENT OF مَا.

Grammarians are divided in their opinion regarding the government of مَا. The learned of Hujaz, Nujd and Tehama however, whose authority as inhabitants of Arabia proper, may be reckoned decisive, consider it in almost every respect as Synonymous with the imperfect verb *لَيْسَ*. First as it denote like *لَيْسَ* present negation; and secondly as it may precede indifferently a definite, or indefinite noun, and admit the predicate in the sentence in which it is employed to be accompanied by the particle *بِأَنَّ* by way of pleonasm. From this similarity of sense originated its similarity of regimen, governing like *لَيْسَ* the subject in the nominative, and the predicate of a proposition in the objective case: with these functions it is employed in the Qooran, and as the Qooran was immediately revealed to the inhabitants of Hujaz, it has acquired among grammarians in consequence the general appellation of مَا الْحِجَازِي. By the tribe of TAMEEM it was considered a simple negative particle, without any government, and as such was contradistinguished from the other by the term مَا التَّيْمِيمِي.

As a grammatical agent, it precedes both a definite and indefinite noun, but most frequently the former, guided however by sundry conditions, the non-observance of which entirely destroys its government.

of a proposition, and govern the noun or subject in the NOMINATIVE, and the PREDICATE in the OBJECTIVE case.

### Annotation.

#### CONDITIONS ATTENDING THE GOVERNMENT OF مَا.

1. In the sentence in which it is employed, the PREDICATE must not precede the SUBJECT in the order of construction, otherwise its government is cancelled.

#### EXAMPLE.

مَا زَيْدٌ قَائِمًا for مَا قَائِمٌ زَيْدٌ "Zued is not standing."

2. The SUBJECT must not be preceded by the particle اِنَّ, as an expletive.

#### EXAMPLE.

بَنِي عَزَا نَقَمَ مَا اِنَّ اَنْتُمْ ذَهَبٌ } "O tribe of Azanuh, you possess neither gold nor  
وَلَا صَرِيفٌ لَكُمَا اَنْتُمْ خُرَفٌ } silver, :-in truth you are mere potsherds!"

3. The word or sentence immediately connected with the predicate, must not precede the noun of مَا, in the order of construction.

#### EXAMPLE.

فَمَا كُنتُمْ لِيْ وَاَقَامْتُمْ اِنْفَادِرَ } "I do not act treacherously towards every one who has  
acted faithfully towards me."\*

If however the مَعْبُول be a Zurf, or a noun in regimine, the government will be preserved.

#### EXAMPLES.

مَا عِنْدَكَ زَيْدٌ مَقِيْمًا Zued is not standing near you.

مَا بِيْ اَنْتَ مُعِيْنًا You are not my assistant.

\* To preserve the government, the natural order would be فَمَا اَنَا لَكُمْ وَاَقَامْتُمْ اِنْفَادِرَ. The example is excessively stupid, and I suspect faulty.

Of these مَا is used indifferently with a DEFINITE OR INDEFINITE noun, لَا with an INDEFINITE only.

EXAMPLES.

مَا زَيْدٌ قَائِمًا "Zued is not standing."  
لَا رَجُلٌ ظَرِيفًا "No man is ingenious."

Annotation.

4. The particle لَا must not precede the PREDICATE, otherwise the government is destroyed.

EXAMPLE.

مَا مُحَمَّدٌ إِلَّا رَسُولٌ "MOHAMMAD is not but a Prophet."

The word مَا as a *relative, indicative, prohibitive, and interrogative* particle, has a great variety of senses, attended with numerous grammatical distinctions, which cannot well be detailed here.

OF THE PARTICLE لَا.

The resemblance subsisting between لَا and the defective verb لَيْسَ, is considered by INOOR HAJIB, in his Commentary on the KATEBA, as inferior to that of مَا as it is not formed like it *peculiarly* to denote *present* negation; is seldom found with a *definite* noun; and cannot be used in a sentence the predicate of which is preceded by بِأَنَّ as an *expletive*: for these reasons it possesses a much more limited government than مَا, and some grammarians go so far as to deny it any government but in poetry. As an Agent however it is guided in its application, by the same conditions already recorded of مَا, with the exception of that relating to إِنَّ as a redundant particle preceding the predicate, in which form of construction it can never be employed.

لَا preceding an indefinite noun has the force of a UNIVERSAL NEGATIVE, as in the example لَا رَجُلٌ فِي الدَّارِ "No man is in the house," and this I presume is what the Arabs understand by the term نَفْيُ الْجِنْسِ when applicable to this particle.

D d

Annotation.

As grammarians however have observed a nice distinction between لا in the character of نَقْيُ الْجِنْسِ and لَا when synonymous with the verb لَيْسَ I shall endeavour to state in as few words as possible, the grounds upon which they suppose this distinction is founded.

The term نَقْيُ الْجِنْسِ signifies literally *negation of the genus*, and as applicable to the particle لا in such a phrase as لَا رَجُلٌ فِي الدَّارِ, conveys a total denial of every individual comprised in the general term رَجُلٌ i. e. "no man is in the house;" and is therefore properly distinguished from لَا when resembling the imperfect verb لَيْسَ its office being simply to denote *individual, or particular negation*, of one or several from a general Class. Now as the *negation* in the above example is complete and *universal*, it is obvious that the proposition expressive of this negation, cannot be followed by a conjunction in order to restrict or qualify the general term; for example after the words لَا رَجُلٌ فِي الدَّارِ "no man is in the house," we cannot add بَلْ رَجُلَانِ أَوْ بَلْ رَجُلٌ, "but two men or more are in the house," as this would in fact be a palpable absurdity; but the case is different with the same particle when Synonymous with لَيْسَ, which as has already been observed, is used to denote not *universal* but *particular* negation, and therefore we may say with propriety لَا رَجُلٌ فِي الدَّارِ بَلْ رَجُلَانِ أَوْ رَجُلٌ "no one man is in the house, but two or more are in it."

It must be observed in the above example, that the noun of لا in the character of نَقْيُ الْجِنْسِ assumes over its final letter the indeclinable mark *fathu*, whereas in its verbal capacity, it governs (under the conditions already specified) the subject in the nominative, and the predicate in the objective case; this the Arabian Grammarians account for in the first instance, by supposing an Ellipsis of the preposition مِنْ, termed مِنَ الْأَسْتَعْرَاقِيَّةِ, or the *comprehensive Min*, in such a sentence as the following, لَا رَجُلٌ فِي الدَّارِ, for لَا مِنْ رَجُلٍ فِي الدَّارِ. The preposition being understood, the following noun by a general rule of Grammar assumes *fathu*, and this they allege as authority for ascribing to the particle لَا *universality of negation*, in all such sentences, which they consider as responsive forms of expression to the question هَلْ مِنْ رَجُلٍ فِي الدَّارِ — "are there any men in the house?" Ansr. لَا مِنْ رَجُلٍ فِي الدَّارِ or elliptically, لَا رَجُلٌ فِي الدَّارِ "no not any," and in Latin,—"*non est vir quisquam in atrio.*"

Annotation.

The particle as a **UNIVERSAL NEGATIVE** has the same government as **لَا** provided, first that the following noun, or noun affected by the negation, is connected with another word in the **zorist** case, i. e. in regimine, or has any connexion of a similar nature to a noun in regimine.\*

EXAMPLE.

In regimine. **لَا صَاحِبَ جُودٍ مُّوجُودٍ** No man of liberality is *now* existing,

Resembling a noun } **لَا خَيْرَ مِنِّي فِي الدُّنْيَا** There is none better than me in the world.  
in regimine.

**لَا** is the common *responsive* negative and is directly opposed to **نَعَمْ**, as in the following elegant couplet.

رَأَيْتُ ظَبْيًا عَلَى كَثْمٍ يَخْتَجِدُ الْبَدْرُ وَالْهَلَالُ  
قُلْتُ مَا اسْمُكَ فَقَالَ لَوْلُو فَقُلْتُ لِي لَوْلَا

"I saw a fawn upon a hillock, whose beauty eclipsed the full moon; I said, what is thy name? she answered *Deer*. What, my *Dear*? said I, but she replied, *No, No!*"

It is impossible to preserve in a translation the delicate play on the words **لَوْلَا**, **لِي**, **لَوْلُو**. The first means literally a *pearl*, the second a repetition of *mine*, or *for me*, and the last a reduplication of the negative *no*. This species of paronymous composition is very common in the writings of the Persians and Arabs, and seems to have been practiced occasionally by the ancients: Vossius in his rhetoric has given numerous examples of the paronomasia from the Greek and Latin poets, others will be found in Aulus Gellius, Plautus and Ennius &c. which the reader if inclined may consult with pleasure. In the mean time I shall content myself with offering a quibble of rather a different description, the effect depending entirely on the ambiguity of homonymous words.

\* Any word connected with another so as to render the sense complete is termed, **مُضَارِعٌ لِلْمُقَدَّافِ** or **شِبْهُ الْبُضَافِ**.

Annotation.

Ἀνὴρ τὲ καὶ οὐκ ἀνὴρ, ὄρνιθα καὶ ὄρνιθα δ' ὄμωε,  
ἐπὶ ξύλῳ καὶ ξύλῳ καθήμενην, λίθῳ τὲ καὶ λίθῳ  
βαλὼν διώλεσεν.

Vir non vir, avem nec avem tamen, in arbore non  
Arbore sedentem, lapide non lapide feriens interemit;

That is—A man not a man, casting a stone not a stone,  
Killed a bird not a bird, sitting on a tree not a tree.

By the first (in the order of the original), is meant a *eunuch* or *hermaphrodite*, the second a *bat* :\* the third the *sambucus* or *elder-tree*, † and the latter the *pumice* stone, about the nature and origin of which naturalists are not agreed.

OF THE PARTICLE تَ لَا.

The etymology of this particle has given rise to a variety of discordant opinions, which I shall briefly notice as a matter of curiosity, if not of instruction. The grammarian *Ukhruṣh*, says it is nothing but *لا* with the paragogical *تَ* marked with the vowel point *Fut, hu*, in consequence of the junction of two *quiescent* letters, and the author of the *Uozun*, (صاحب الأوضح) ascribes to it the same government with *لَيْسَ* but restricts its application to the word *حِينَ*, which some grammarians consider as comprehending all nouns of *time*, such as *سَاعَةٌ*, *أَوَّلٌ*, &c. and this is also the opinion of *IBNO MULIK* in his *تسهيل*.

One peculiarity attending it is, that in the sentence in which it is employed, either the subject, or predicate must be understood; the common practice of the language seems to authorise the rejection of the subject, as *وَلَاتَ حِينَ مَنَاصٍ* “This is not the time for flight.” In which *الْحِينَ* is understood, but on the other hand several grammarians contend, that it must be the predicate. The point is not worth discussing, and therefore we shall let it rest.

*لَاتَ* by some is derived from the infinitive *لَيْتَ* *loss, damage*, Synonymous with *نَقَصَ*, and is regularly declinable as *يَلَيْتُ لَاتَ*. This derivation is plausible enough and is attributed to *أَبُو زُرِّي خُشْنِي* *ABOOZURI KHUSHINEE*.

\* LOCKE says it was long seriously disputed whether a bat was a bird or not.

† This is the interpretation given by *Suidas*, and may perhaps be disputed.

Annotation.

Others again refer it to  $\text{لَيسَ}$  in the past tense, the  $Y\alpha$  being changed into  $Ulif$ , and  $\text{س}$  into  $\text{ق}$ , these letters being considered proximate representatives of the same sound.

$\text{أَبْرُعَيْدَا}$   $\text{Uroo OBUEDUH}$ , and  $\text{أَبْطَرَارَا}$   $\text{Ibvo TURAWUH}$ , imagine it to be compounded of  $\text{لَ}$  and the letter  $\text{ق}$  redundant in some other word, as in the following example from the Qooran,  $\text{لَا تَكُونُ}$ . but this is ridiculous; the  $Ta$  is not redundant in the word  $\text{كُن}$ , it belongs to the verb  $\text{لَا تَكُنْ}$ , and must have been joined to the word  $\text{كُن}$  by the carelessness of some transcriber. It is written thus erroneously in Maracé. The author of the Mooghnee has entered into minute details regarding its government and the conditions attending its government, but they do not appear to me of sufficient importance to transcribe.

$\text{لَ}$  and  $\text{لَ}$  if explained and illustrated at full length would far exceed the bounds of this Commentary, indeed it is to be feared I have already explained more than is necessary, I shall therefore close this annotation, with one or two miscellaneous remarks.

The intensive or corroborative negative which in Greek is effected by two or more negatives is provided for in Arabic, by a peculiar form of conjugation i. e. by the adjction of the prohibitive  $\text{لَ}$  and  $\text{Nou Sukeela}$  subjoined, as  $\text{لَا يَضْرِبُنِي}$  "let him certainly not strike." But this it must be remembered is applicable only to prohibitive forms of expression. It is curious to observe the concourse of negatives in the following passage from Democritus,  $\text{Οὐδέποτε οὐδὲν οὐ μὴ γένηται τῶν δεόντων}$ . 'Nothing that is necessary will ever (or never) be done,' which however is not more remarkable than the following attributed to a cockney who had lost his hat—"Did nobody see nothing of never a hat no where?"

The particle  $\text{لَ}$  in almost all its various, and even opposite relations, bears a striking resemblance to the Greek  $\text{Μη}$ , as  $\text{لَ}$  and  $\text{لَ}$  do to  $\text{οὐ}$ : to illustrate the latter remark, I shall offer the following little extract from Plutarch as quoted by the Messieurs DE PORT ROYAL, not indeed so much for the purpose of elucidating a point of comparatively no importance, as to introduce to the reader two very successful and spirited versions of the original into Arabic, by SHUKRI UMMAH, a learned native of Yemen, at present attached to the College of

S T O R Y.

A certain Chieftain of the tribe of Buncé Ajil, had two sons, one of whom was rich, the other poor. To the rich one he was kind and partial, to the other indifferent. He was asked,—why do you slight and neglect your son, a son on whom the Almighty has placed a crown of excellence and accomplishments?—Wealth you know is transitory, it comes *to-day*, and leaves us *to-morrow*. The old man replied. He can be of no service to me—if he possess accomplishments they will be of service to him: as for my other son, I am partial to him from necessity, and he has no occasion for any thing of mine, as the poet has justly said.

D I S T I C H.

I have observed that men *incline* towards those who are rich,  
But *decline* all connexion with those who have nothing.

C L A S S F O U R T H.

The *fourth* CLASS, contains *seven* PARTICLES, which govern the noun in the OBJECTIVE case, viz.

L. The Particle *واو* synonymous with *مع*.

E X A M P L E.

اَسْتَوَى الْمَاءُ وَالْخَشَبَةَ. The water was equal *with* the wood.

Annotation.

The Particle *واو*, as synonymous with *مع* is like other Particles a subject of controversy with Grammarians, some contending for its government, and others denying it, and both parties producing arguments and quotations to defend their respective opinions. The author of the *ضوء* says the government usually assigned to *واو* is properly owing to some preceding verb, either expressed or understood in the sentence, as in the example *سَرْتُ وَزَيْدًا* 'I travelled *with* Zued.'

It always in the above sense, denotes *society* or *companionship*, and is found to occur three different ways in a sentence.

1. It is preceded by a verb, as *سَرْتُ وَزَيْدًا* I travelled *with* Zued? Or by a word resembling a verb in sense, as, *مَا تَصْنَعُ مَالِكُ وَزَيْدًا* i. e. What are you doing *with* Zued?

2.  $\text{لَا}$  used in the sense of  $\text{إِسْتِثْنَاء}$  or *exception*, in two ways. The *first* is termed  $\text{مُتَّصِلٌ}$  or *homogeneous*, and signifies in its grammatical sense, that the  $\text{مُسْتَثْنَى}$  or word following the Particle of exception, is of the same species, or *homogeneous* with the  $\text{مُسْتَثْنَى مِنْهُ}$  or word preceding the Particle.

EXAMPLE.

$\text{جَاءَ نَبِيَّ الْقَوْمِ إِلَّا زَيْدًا}$  The tribe came to me, except Zued.

The *second* is termed  $\text{مُنْقَطِعٌ}$  and signifies that the  $\text{مُسْتَثْنَى}$  and  $\text{مُسْتَثْنَى مِنْهُ}$  must be *heterogeneous* or *dissimilar* in their nature.

EXAMPLE.

$\text{جَاءَ نَبِيَّ الْقَوْمِ إِلَّا حِمَارًا}$  The tribe came to me except the Ass.

## Annotation.

2. By a Participle active, as,  $\text{انْصَبْتُ بِرَأْسِ الْوَيْلِ}$  I descended, or went down *with* the Nile.
3. By a Passive Participle, as,  $\text{الْفَرْسُ مَتْرُوكَةٌ وَفَصِيلُهَا}$  The Camel is let loose *with* her young one.

## OF THE PARTICLE $\text{لَا}$ .

The Particle  $\text{لَا}$  is used in the sense of  $\text{إِسْتِثْنَاء}$  or *exception*, and is considered synonymous with the following words:

$\text{لَيْسَ لَا يَكُونُ خِلَا عِدَا حَاشَا غَيْرُ سَوِي}$

Of the above synonyma  $\text{سَوِي}$  is written in three other different ways, namely  $\text{سَوِي سَوَاءٌ سَوِي}$ .  $\text{لَا}$  is a simple Particle.  $\text{لَيْسَ}$  and  $\text{لَا يَكُونُ}$  verbs.  $\text{حَاشَا}$  and  $\text{عِدَا}$  occasionally both verbs and Particles, and  $\text{غَيْرُ}$  and  $\text{سَوِي}$  nouns.

## OF THE $\text{مُسْتَثْنَى مِنْهُ}$ AND $\text{مُسْتَثْنَى}$

The word  $\text{مُسْتَثْنَى}$  is a Passive Participle, and means literally *excepted* or *excluded*.  $\text{مُسْتَثْنَى مِنْهُ}$

The following words, viz. **يَا هَيَا أَيَّ** are called **الْهَيْزَةُ الْمُفْتُوحَةُ** or VOCATIVE PARTICLES, and are used in the following manner:

**يَا** Whether the object addressed is distant or near.

**هَيَا** and **أَيَّ** When the object is distant.

**الْهَيْزَةُ الْمُفْتُوحَةُ** and **أَيَّ** When the object is near.

The above five Particles, when they precede a noun in regimine, govern the **مُضَافٌ** or Governing Noun, in the ACCUSATIVE or OBJECTIVE CASE.

#### EXAMPLES.

**يَا عَبْدَ اللَّهِ** { O slave of God, (or as a proper name)  
O Abdoolah!

#### Annotation.

That from which the exception is made, **مُتَّصِلٌ** may be translated *homogeneous*: **مُنْقَطِعٌ** *heterogeneous*; the Grammatical distinction between these terms is obvious and useless, and requires no further explanation.

The **مُسْتَثْنَى** invariably requires, that its **مُسْتَثْنَى مِنْهُ** should either be a *plural noun*, as **جَاءَنِي الرَّجَالُ إِلَّا زَيْدًا**, 'The men came to me all but Zued;' or a *noun of multitude singular*, as **جَاءَنِي الْقَوْمُ إِلَّا زَيْدًا**, 'The tribe came to me all but Zued.'

The **مُسْتَثْنَى** is rendered *Nusub*, or governed in the *objective* case, after the following order:

1. When found in an *assertive* sentence, viz. in a sentence neither *prohibitive*, *negative*, nor *interrogative*.

#### EXAMPLE.

**جَاءَنِي الْقَوْمُ إِلَّا زَيْدًا**, 'The tribe came except Zued.'

2. When the **مُسْتَثْنَى** precedes the **مُسْتَثْنَى مِنْهُ**

اَيَا غُلَامَ زَيْدٍ O Boy of Zued!  
هَيَا شَرِيفَ الْقَوْمِ O thou who art noble in thy tribe!  
اَيُّ أَفْضَلَ الْقَوْمِ O most excellent of the tribe!  
اَعْبُدَ اللَّهَ O slave of God, or (O Abdoolah!)

But when the noun following them, is not in regimine, it receives the vowel mark رَفْع without the *Tunween*.

#### EXAMPLES.

يَا زَيْدُ O Zued!  
يَا رَجُلُ O man!

#### Annotation.

#### EXAMPLE.

وَمَا لِيَ إِلَّا ذَا أَحَدٍ شَيْئَةً  
وَمَا لِيَ إِلَّا مَشْعَبُ الْحَقِّ مَشْعَبُ

'I acknowledge no other tribe, than that of the Prophets  
And follow no faith, but the true one.'

3. When the مُسْتَقْبَلِي follows either مَا خَلَا or مَا عَدَا

4. When the مُسْتَقْبَلِي follows either لَيْسَ or لَا يَكُونُ

There are a variety of other minute rules regarding لَا and its government, which I pass over as unimportant.

#### OF THE VOCATIVE PARTICLES.

The author of the *MOOGNEE*, says the Particle يَا may be used without any respect to the proximity or distance of the object addressed;—Is of more general application than the other

Annotation.

Particles, and is occasionally understood in a sentence, as <sup>يُوسُفُ</sup> <sup>أَعْرِضْ</sup> <sup>عَنْ</sup> <sup>هَذَا</sup> *O Joseph let this alone,* or *refrain from this!* It is alone applied to the word <sup>اللَّهُ</sup> and to <sup>أَيُّهَا</sup> and <sup>إِيَّاهَا</sup> masculine and feminine.

The Particle <sup>هِيَ</sup> is supposed to be originally <sup>يَا</sup> the *Humza* being changed into <sup>هَ</sup>.

<sup>أَيُّ</sup> occurs also as a <sup>حَرْفُ التَّفْسِيرِ</sup> or *Explanatory Particle*, as <sup>عِنْدِي</sup> <sup>عَسَجِدُ</sup> <sup>أَيُّ</sup> <sup>ذَهَبٍ</sup> *I have got money, that is, Gold.*

The Person or thing addressed is called the <sup>مُنَادِي</sup>, which is considered a species of the <sup>مَقُولٌ بِهِ</sup>, and is always invoked, by one of the vocative Particles in the sense of the verb <sup>أَدْعُو</sup>, 'I call or invoke.'

*The various Particles in the fourth class are illustrated in the following Arabian Tale.*

## S T O R Y.

A man of learning went one day to the house of a Grammarian, who happened at the time to have a boy before him reading Syntax. The learned man stopped at the door to hear the boy read, and heard him say to his master. ‘ O Sir, when I say,’ “ *all the people went out but Zued.*” and am asked—why did not Zued go out *also* ? What answer should I give? Say, replied the master, that he was busy beating AMR. Very well, said the boy : but when I say,—“ *the tribe rose up all but the Ass,*” and am asked—why did not the Ass rise up too? What should I answer? Answer, said the pedant, that he was busy eating grass. Good, said the boy—and when I say—“ *the General came along with the army,*” and am asked—what brought the General along with the army? What should I say? Say, said the schoolmaster, they are come by order of this gentleman (at the door,) to flog me.—On hearing which the boy uttered a shriek—exclaiming—protect me, O followers of MOHAMMED! O father! O brother! O people! hasten, hasten, to my assistance, for *this man at the door*, is certainly mad, and has given orders to have me beaten, and out he ran. The man laughed heartily at both of them, and went about his business.

CLASS FIFTH.

The *fifth* CLASS contains *four* PARTICLES, which render the final letter of the Aorist Tense نَصَب viz.

إِذَنْ كَيْ لَنْ أَنْ

1. The Particle أَنْ prefixed to the AORIST, restricts it to FUTURE time.

EXAMPLE.

أَرْجُو أَنْ تَقُومَ I hope you will rise.

Annotation.

OF THE PARTICLE أَنْ

The Particle أَنْ with the *Humza Mustooh*, and *Noon Quiescent*, as explained in the Text, occurs both as a Noun, and a Particle.

As a NOUN it is supposed by the author of the *Moohureez* and other Grammarians, to be equivalent to *أَنَا* the *first* personal pronoun, as أَنْ فَعَلْتُ 'I did,' and in other cases to the *second* personal pronoun, in the words أَنْتَ أَنْتَ أَنْتُمْ أَنْتُمْ where the termination is merely indicative of gender or number.

As a Particle it is used in *four* ways.

أَنْ الْأَوْصُولِي as recorded in the Commentary, is called also أَنْ الْأَصْدَرِيَّة from the circumstance of its being prefixed either to the AORIST, or PAST Tense, and sometimes even to the IMPERATIVE, as كَتَبْتُ إِلَيْهِ أَنْ يَأْتِ بِانْ قُمْ وَأَيْتِ 'I wrote to him to rise and come.'

Its pronoun is generally rejected in composition, but sometimes expressed, as قُلُوا أَنْتُمْ فِي قُلُوبِكُمْ 'But if you had solicited me in the day of prosperity.'

It is occasionally met with as an *Explanatory* Particle, synonymous with *أَيْ*, as in the following Example from the Qooran: أَنْ اصْنَعْ الْفُلَ 'That is, make the Ark.'

But if prefixed to the Preterite it causes no alteration in the time, and is then called *انْ* or the infinitive *انْ*.

EXAMPLE.

اعجبتني ان خرجت } Your going out surprised me, or it surprised  
me that you went out.

2. The Particle *لن* restricts the verb to FUTURE time, in a confirmed negative sense.

EXAMPLE.

لن تراني You will certainly not see me.

Annotation.

As a PLEONASTIC PARTICLE it occurs as follows:

1. After *لما* or the TEMPORAL LUMMA, *لما جاء زيد* 'When Zued came.'
2. Between the Particle *لو* and a *فعل القسم* i. e. a verb of swearing: as *لو ان اقسم بالله* 'If I swear by God.'
3. Between the Preposition *ك* and its governed word; as *زيد كان اسد* 'Zued is like a Lion;'
4. After *ان* as, *ان اخرجت* When you went out.

OF THE PARTICLE *لن*.

*لن* is a negative Particle restricting the verb to FUTURE time. The Grammarian *فرار* says it was originally *لا*, the ALIF of which is changed into Noon; but this Etymology is rejected by the author of the MOOGHNEE who confirms the account given in the Commentary, in which opinion he is supported by *خليل* and *كسابي*.

This Particle, agreeably to the authority of the Grammarian خَلِيل KHULEEL is compounded of لَا and اِنْ. The *Humza* is rejected, for the sake of euphony, leaving اِنْ, the *Alif* of which is also thrown out, because two quiescent letters occurring together cannot be pronounced, and thus we have اِنْ.

3. The Particle كِي is used in the sense of تَعْلِيل and سَبَبِيَّة or *cause* and *motive*, indicating that that which precedes it, is the cause of that which follows it.

EXAMPLE.

اَسَلَمْتُ كِي اَنْ خُلَّ الْجَنَّةَ } I embraced the Moosulman faith, that I might  
enter into Heaven.

Annotation.

OF THE PARTICLE كِي

The author of the MOOGHNEE says, that كِي is a noun abbreviated from كَيْف as in the following verse:\*

كِي تَجْنَحُونَ اِلَى سَلَمٍ وَمَا ثَمَرْتُمْ  
قَتْلًا كُمْ وَلَظَى الْهَيْجَاءِ تَضْطَرُّ

How can you incline to peace,  
Your slaughtered friends being yet unrevenged,  
And the flame of war still raging?

It occurs as a PARTICLE in the sense of اِنْ الْمَصْدَرِيَّة and لَا التَّعْلِيل and in this sense precedes the مَا الْمَوْصُولَة, Example, كَيْمَا ضَرَبْتَ, that is, اِنْ ضَرَبْتَ, 'Why did you strike.'

It precedes also the مَا الْمَصْدَرِيَّة, Example, يَرْجِي الْعَنِي كَيْمَا يُضْرَوْنَ, 'A man may expect to receive the good or evil he does.'

Also in the sense of اِنْ الْمَصْدَرِيَّة as اِنْ لَا تَأْسَوْا for لَكَيْلَا تَأْسَوْا, 'That you be not sorrowful.'

\* As a proof of this it may be observed that the نُونُ الْأَعْرَابِ is retained in تَجْنَحُونَ, which would have been rejected had كِي been here a governing Particle:

4. The Particle **إِذْنٌ** is used in the sense of **جَوَابٌ** and **جَزَاءٌ** or *answer*, and *consequence*, and restricts the verb to FUTURE time.

EXAMPLE.

{ 'Then you will enter into heaven,' in an-  
swer to him who said **أَسْلَمْتُ** 'I embraced  
the Mohummudan faith.'

Annotation.

OF THE PARTICLE **إِذْنٌ**

Some Grammarians maintain that **إِذْنٌ** is a noun, but the general opinion is that it is a Particle. As a Particle some derive it from **أَذِنَ** and **أَنَ** and others again allow it no Etymology, but consider it a simple uncompound Particle.

The Grammarian **شَاوِيْبِي** says it is always used in the sense of **جَوَابٌ** and **جَزَاءٌ** as explained in the Text; but **فَارْسِي** merely admits its *general* application in this sense, and gives the following example, to prove that it is sometimes met with as the **جَوَابِ** alone;—as in answer to the assertion, **أُحِبُّكَ** 'I love you,' **إِذْنٌ أَظْنُكَ صَادِقًا** then I think you speak truth! where the Grammarian observes that *truth* cannot be considered as a *consequence* of the preceding assertion.—'I love you,' and must therefore be looked upon merely as the *answer*. This is one of the many trifles that exercise the ingenuity of Arabian Grammarians.

The government of **إِذْنٌ** is guided by certain conditions.

It must immediately precede the Aorist, with the exception of a **قَسَمٌ** or *oath*, or the negative Particle **لَا** either of which is allowed to intervene, without destroying its government, as, **إِذْنٌ وَاللَّهِ** **أُكْرِمُكَ** 'Then by God I will honor you,'—or, **إِذْنٌ لَا أَظُنُّكَ كَاذِبًا** Then I do not think you a liar! But we could not say, **إِذْنٌ يَأْعُبِدُ اللَّهَ الْكُرْمُكَ**, nor **أُكْرِمُكَ إِنْ**. This is the general opinion of Grammarians, but **أَبْنُ عَصْفُورٍ** thinks a *Surf* occurring between the Particle and the verb will not affect its government, as **إِذْنٌ غَدًا أُكْرِمُكَ** 'Then to-morrow I will honor you.'

*The Particles in the Fifth Class are included in the following Story.*

## S T O R Y.

I called one day, said a learned man, upon a friend of mine, who was an excellent Singer, and said to him, I am come to you, that you may enliven me with a song, for I have been annoyed this morning, and know no remedy so effectual in dispelling care. I beg therefore that you will oblige me with a couple of good verses. He answered, with great pleasure, and sung the following.

Thy flight the knots of patience hath unwound, \*  
Yet in my soul thy form is firmly bound :  
What were thy wrong, love's bitter to allay,  
With sweets from me withheld ; on others cast away.

I was delighted, says the narrator, with his harmony, and found myself relieved from the affliction that weighed upon my heart, and asked him, do you think any other person in this city can be found a match for you in singing. No said he, I do not think there is, nor will you ever find in it any such. I then took my leave of him, saying ;—I will call upon you tomorrow, please God, between the

\* The verb <sup>حَلَيْتُمْ</sup> in the original is used in four different senses. In the first it means to open. In the second to enter. In the third to sweeten, and in the fourth to be lawful.

noon and evening prayers.—Then, said he, I will sing you something that will please you. One of my friends called upon me in the evening, and informed me that the King had ordered the Songster to be put to death.—On what account I asked? Because replied he, the King's Daughter heard him singing to-day and was so enchanted with his voice, that she was nearly throwing herself down from the top of the palace *in ecstasy*;—the King ran and drew her in from the window, and having locked the door, ordered the Musician to be put to death. On hearing this said the learned man, I made my escape, as soon as the people left me, fearing I might experience the same fate myself, I being in fact the cause of his singing.

CLASS SIXTH.

The *sixth* CLASS contains *five* PARTICLES which being prefixed to the AORIST, render the final letter جَزَم or QUIESCENT, viz.

إِنْ لَا أَتَّهِي لَامُ الْأَمْرِ لَمَّا لَمْ

1. The Particle لَمْ converts the AORIST into a NEGATIVE PRETERITE.

EXAMPLE.

لَمْ يَضْرِبْ In the sense of مَا ضَرَبَ He did not strike.

Annotation.

OF THE PARTICLE لَمْ.

The Particle لَمْ is synonymous with مَا. Its effect upon the Aorist is to change رَفَعَ into جَزَم, rendering the final letter quiescent, and seems in this respect to correspond with the Apocope of European Grammarians. In conversation however this rule is not always observed by the Arabs, who use it like مَا and لَا without causing any difference of inflexion in the verb; the same license is sometimes indulged in Poetry, and what is still more extraordinary the Grammarian لُحْيَانِي sometimes renders the Aorist نَصَب, and in this way he reads the first sentence of the 94th Chapter of the Qooran :

أَلَمْ تَشْرَحْ لَكَ صَدْرَكَ “ Have we not opened thy breast.”

2. The Particle  $\text{لَمْ}$  is used like  $\text{لَمْ}$  but is peculiarly applied in the sense of  $\text{إِسْتِغْرَاق}$  to denote *universality of past time*, and indicates, that the action conveyed by the verb was never performed *at any past period*.

EXAMPLE.

$\text{لَمْ يَضْرِبْ زَيْدٌ}$  In the sense of

$\text{مَا ضَرَبَ زَيْدٌ فِي شَيْءٍ مِنَ الْأَزْمَنَةِ الْمَاضِيَةِ}$

Zued did not strike (him), at *any past period*.

Annotation,

OF THE PARTICLE  $\text{لَمْ}$ .

The distinction observed by the Arabian Grammarians in point of sense between  $\text{لَمْ}$  and  $\text{لَمْ}$  seems to be this, that  $\text{لَمْ}$  as a Negative relates to a *portion* of time past, whereas  $\text{لَمْ}$  in a more comprehensive and absolute sense, embraces the *whole* period; we can say therefore  $\text{لَمْ يَكُنْ ثُمَّ كَانَ}$  "It was not *then*, but was afterwards;" but we could not substitute  $\text{لَمْ}$  in the sentence, and say  $\text{لَمْ يَكُنْ ثُمَّ كَانَ}$  which would in fact amount to this,—"*It never was and then was.*" This is the general opinion of Grammarians, but there are some who consider these Particles as synonymous in every respect.

The author of the  $\text{قَطْرُ الدِّدَارِ}$  makes it a compound of  $\text{لَمْ}$  and  $\text{مَا}$  which is confirmed by  $\text{رُضِيَ}$  RYZEE, who adds that  $\text{مَا}$  is added to it in the same manner as in  $\text{أَيَّنَا}$  &c. These Grammarians observe another distinction in the use of  $\text{لَمْ}$  and  $\text{لَمْ}$  the former of which they say may be preceded by a *conditional* Particle, as  $\text{إِنْ لَمْ يَكُنْ}$  or  $\text{لَوْ لَمْ يَكُنْ}$  but we cannot say  $\text{إِنْ لَمْ يَكُنْ}$  or  $\text{لَوْ لَمْ يَكُنْ}$ .

$\text{لَمْ}$  differs also from  $\text{لَمْ}$  in this, that the verb of the latter may be sometimes omitted in a Sentence, as  $\text{لَمْ أَقْرَبْتُ الْبَلَدَ قَرِيبًا}$  that is  $\text{لَمْ أَدْخُلْهَا}$  'I went close to the City, but did not enter it.'

The word  $\text{لَمْ}$  besides its use as a governing Particle, is employed to denote *time*, and seems in this case to resemble *when*. As such, it is prefixed to a verb in the *past* time, in a Proposition consisting of

5. The Particle **إِنْ** is used before two sentences, the first of which must be a VERBAL one, (**الْجُحْلَةُ الْفَعْلِيَّةُ**); the second may be either verbal or NOMINAL, (**الْجُحْلَةُ الْأَسْمِيَّةُ**). The first branch of the proposition contains a CONDITION, and is termed, (**الْشَّرْطُ**) the second the CONSEQUENCE, and is called, (**الْجَزَاءُ**). If a verb in the AORIST be found in both sentences, or in the conditional sentence alone, it must necessarily be marked **جَزَمَ** as:

**إِنْ تَضْرِبَ أَضْرِبُ** } If you strike, I will strike.  
**إِنْ تَضْرِبَ ضَرَبْتُ** }

**إِنْ تَضْرِبَ فَرَيْدٌ ضَارِبٌ** } If you strike, then Zued will strike, or *lit.* Zued is a striker.

### Annotation.

*in delusione.* Vid. Schult. ad Exc. Ham. p. 389. But the fact I believe is that **إِنْ** is always taken in a Negative sense when followed by a Particle of *exception*: the above reading is sanctioned by **عَاصِمٌ** ASIM; **حَمَزَةُ** HUMUZA; **إِبْنُ عَامِرٍ** IBNO AMIR and others.

### OF THE PARTICLE CALLED **لَامُ الْأَمْرِ** OR IMPERATIVE **لَامٌ**.

The **لَامُ الْأَمْرِ** or letter **لَام** of command may be always marked with the vowel **كُسْرَةٌ**, but the Grammarian **سَلِيمٌ** makes it **تَنْحَنَ**. When it follows either the Conjunction **وَ** or **فَا** it is generally rendered *Quiescent*, and also occasionally after **ثُمَّ**.

It is generally omitted in the 2d Person of the Imperative Active, and also in the 1st Person, and is sometimes understood in Poetry, though its government remains, as **وَيَكُنْ الْخَيْرُ مِنْكَ نَصِيبٌ** 'And let your generosity or munificence reserve for me a portion.' The Grammarian **مَبْرَدٌ** however does not subscribe to this rule even in Poetry, unless it is found preceded in the Sentence by the PREPOSITION **لَامٌ**, as

COMMENTARY.

But if the Aorist be merely in the latter sentence, or in that containing the *consequence*, it may, or may not be marked جَزَم at discretion, as اِنْ ضَرَبْتَ اَضْرَبُ  
If you beat, I will beat.

## Annotation.

قُلْ لِعِبَادِيَ الَّذِينَ آمَنُوا يُقِيمُوا الصَّلَاةَ

‘ Say (O Mohummud) to my faithful servants ; let them observe the stated hours of prayer.

## OF لَا النَّهْيِ OR THE PROHIBITIVE

The Prohibitive Particle لَا is seldom found with the 1st Person, but is equally applicable to the 2d and 3d. Its origin and character are disputed. Some Grammarians derive it from the لَام LAM of command, by adding to it Alif—سَهْلِي says it is not a *prohibitive* but a *Negative* Particle, and that the government ascribed to it, is to be attributed to the Imperative LAM understood : but both these opinions are overruled by the author of the MOOGHNEZ who confirms the doctrine recorded in the Commentary.

## OF THE PARTICLE اِنْ

There is nothing to be remarked of اِنْ except that it is used as a *Negative* as well as a *conditional* Particle, and that it is frequently found as a mere expletive. Schultens says it is used rhetorically as an animated *Aposiopesis* in swearing, a use that has not been discovered by any of the Arabian Grammarians, and which I shall not therefore transcribe. The Particles in Class the Sixth are illustrated in the following Story.

## S T O R Y.

It is related that a woman was troubled with a tingling\* in her ear, and went to a Physician for his advice on the subject. The Physician said, if you apply (to your ear) the yolk of an egg, and a little pulverized LOVE-APPLE you will be well. The woman went to an Apothecary, who had a handsome Apprentice, and said, I will thank you to desire your boy to weigh me out two Dirhums worth of LOVE'S-APPLE!† The Apothecary not knowing, that she meant the plant of that

\* The word طنين is derived from طن which corresponds both in sound and sense with *tinkle* in English, and *tinnio* in Latin. It is here used technically for the *Tinnitus Aurium* of Physicians.

† I have endeavoured to imitate the quibble in the original on the words هَوَا جَوًّا Huowa-Juwwa, and هَوَى الْجَوَى Huowul-Juowa. The first is the name of an herb or plant: the second means

name, on the contrary believing she wished for that which no plant or herb can cure, † said to his Apprentice, give the lady my boy, what she wishes of you. The woman was enraged at the insinuation, and said, I never thought of the strange idea, which has entered your mind; I merely wished for a little of the medicine called LOVE'S-APPLE. The Apothecary felt embarrassed, and said, O my good daughter do not annoy yourself, but say if you please, LOVE-APPLE. § He then gave an order to his boy to weigh her out three Drams of it, and not to stint her in the weight.

CLASS SEVENTH.

The *seventh* CLASS contains *nine* words, which give جَزَمُ or the QUIESCENT mark to the AORIST. They possess a conditional or hypothetical signification like the

---

literally, the *desire* or *ardour* of *love*. I am aware that the LOVE-APPLE, as a genus of the *Mono-gynia* order, is not exactly applicable to the Arabian plant, but it serves to convey some idea of the Pun, and this is all I intended.

† The original means simply, “that which the heart pants after from the *bitterness*, or violence of love.” We may suppose that the Arabian Apothecary from the Lady's mistake imagined her in search of the *Agnus Castus*, or some other love antidote, but having no idea that so much virtue could be found in an herb:—*He mihi quod nullis amor est medicabilis herbis!* Unwittingly recommended her to his Apprentice.

§ Or two *miskals* which are supposed equal to three Drams.

Annotation.

OF مِّنْ.

The word مِّنْ has various other uses besides those mentioned in the Commentary; the following are of common occurrence and may be worth inserting:

It is used, 1st *Interrogatively*, as مِّنْ بَعَثْنَا مِّنْ مَّرْقَدٍ نَّأ who has aroused us from our place of rest (i. e. the Grave)?

Particle **إِنْ** and are placed in construction before two verbs, the first of which is the cause of the second. The first is termed **الشَّرْطُ** and contains the **CONDITION**: the other **الْجَزَاءُ** and expresses the **CONSEQUENCE**. If the verb in both cases be in the **AORIST**, or in the conditional sentence alone, it must in either way receive the mark **جَزْمٌ**

They are as follows:

إِذَا مَا حَيْثُهَا أَتَى أَتَيْنَاهَا أَيْ مَهْمَا مَتَى مَا مَنُ

1. Of these the *first* is **مَنْ** and is never applied but to **PERSONS OR RATIONAL BEINGS**, (ذُوالْعُقُولِ)

EXAMPLE.

مَنْ يُكْرِمُنِي أُكْرِمُهُ He who honors me, I will honor him,

أَيْ That is,

إِنْ يُكْرِمُنِي زَيْدٌ أُكْرِمُهُ } If Zued honors me, I will honor him, and  
وَأَنْ يُكْرِمُنِي عَمْرٌو أُكْرِمُهُ } If Amr honors me, I will honor him.

Annotation.

2. *Relatively*, in the sense of **لَّذِي** as

أَلَمْ تَرَ أَنَّ اللَّهَ يَسْجُدُ لَهُ مَنْ فِي السَّمَاوَاتِ وَمَنْ فِي الْأَرْضِ

‘Do not you see, that whatever is in the Heavens, or in the Earth prostrates or humbles itself before God?’

3. As an *Indefinite Noun* qualified by an *Adjective*, as in the following Verse of the celebrated Poet **HUSSAN**;

كَفَرْنَا بِمَا قُضِيَ عَلَيْنَا مِنْ غَيْرِنَا  
حُبُّ النَّبِيِّ مُحَمَّدٍ أَيْنَانَا

“This excellence is all we require to establish our pre-eminence over others, *namely* the love of the Prophet Mohummud towards us.”

COMMENTARY.

2. The *second* is مَا and is more generally applicable to THINGS, or IRRATIONAL BEINGS, (غَيْرِ ذِي الْعُقُولِ)

EXAMPLE.

مَا تَشْتَرِ أَشْتَرِ What you purchase, I will purchase,

أَيُّ That is,

إِنْ تَشْتَرِ الْفَرَسَ أَشْتَرِ الْفَرَسَ } If you purchase the Horse, I will purchase the Horse, and If you purchase the Cloth, I will purchase it.  
وَإِنْ تَشْتَرِ الثَّوْبَ أَشْتَرِ الثَّوْبَ }

3. The *third* is مَتَى and is applicable to TIME.

EXAMPLE.

مَتَى تَذْهَبُ أَذْهَبُ When you go, I will go,

أَيُّ That is,

إِنْ تَذْهَبُ الْيَوْمَ أَذْهَبُ الْيَوْمَ } If you go to-day, I will go to-day, and  
وَإِنْ تَذْهَبُ غَدًا أَذْهَبُ غَدًا } If you go to-morrow, I will go to-morrow.

## Annotation.

This Poet was contemporary with Mohummud, from whom tradition says he received the name of HUSSAN, in consequence of having delighted the Prophet by some Verses in his praise, and upon hearing which he is said to have called out حَسَّان Most beautiful!

OF مَا.

The author of the Mooghnee says that مَا as a governing Noun, is sometimes significant of *time*, as مَا مَسَّكُمْ فَاسْتَقَامُوا إِلَيْكُمْ فَاسْتَقَامُوا إِلَيْكُمْ 'As long as they preserve their faith to you, do you the same with them:' and that it is sometimes used without any relation whatever to time, as مَا يَخِيرُ عَلَى اللَّهِ 'God knows whatever good you do.'

4. The *fourth* is مَهَبَا and as also applicable to TIME.

EXAMPLE.

مَهَبَا تَذْهَبُ أَذْهَبُ Whenever you go, I will go,

أَيُّ That is,

إِنْ تَذْهَبُ الْيَوْمَ أَذْهَبُ الْيَوْمَ } If you go to-day, I will go to-day, and  
وَإِنْ تَذْهَبُ غَدًا أَذْهَبُ غَدًا } If you go to-morrow, I will go to-morrow.

5. The *fifth* is أَيُّ and is applicable to PERSONS OR THINGS; in other words to RATIONAL OR IRRATIONAL beings, and is always connected with another word in the relation of the Aorist or oblique Case.

EXAMPLE.

أَيُّهُمْ يَضْرِبُنِي أَضْرِبُهُ Whosoever strikes me, I will strike him,

أَيُّ That is,

إِنْ يَضْرِبُنِي زَيْدٌ أَضْرِبُهُ } If Zued strikes me, I will strike him, and  
وَإِنْ يَضْرِبُنِي عَمْرٌو أَضْرِبُهُ } If Amr strikes me, I will strike him.

Annotation.

مَتَى.

The word مَتَى is also used Interrogatively, as مَتَى نَصْرُ اللَّهِ when will God assist us?

It is also Synonymous with فِي as وَضَعْتُهَا مَتَى كُفٍّ 'I placed it in his cuff.' But this is an application of it peculiar I believe to the هَذِيل tribe, who also use it in the sense of مِمَّنْ as أَخْرَجَهَا مِمَّنْ 'I took it out from his cuff.'

COMMENTARY.

6. The *sixth* is أَيَّهَا applicable to PLACE.

EXAMPLE.

أَيَّهَا تَهْبِشْ أَمْشِ Wherever you walk, I will walk,

أَيُّ That is,

إِنْ تَهْبِشْ إِلَى الْمَسْجِدِ أَمْشِ	}	If you walk to the Mosque, I will walk to the Mosque,
إِلَى الْمَسْجِدِ وَ		
إِنْ تَهْبِشْ إِلَى السُّوقِ أَمْشِ	}	If you walk to the Market place, I will walk to the Market place.
إِلَى السُّوقِ		

Annotation.

OF مَهْيَا.

The Commentator considers مَهْيَا merely as a Noun, but the Grammarian سَهْبَانِي makes it also a Particle, as in the following Verse in which it is supposed Synonymous with إِنْ.

شَعْرٌ  
مَتَى مَا تَكُنْ عِنْدَ أَمْرٍ مِنْ خَلِيقَةٍ  
وَإِنْ خَالَهَا يَخْفِي عَلَيَّ النَّاسِ تَعْلَمُ

'If a man possess a certain disposition, and is desirous to conceal it from mankind (it will not avail) it will be discovered.'

It is also supposed to be used *Interrogatively*, as in the following Verse.

مَهْيَا لِي اللَّيْلَةُ مَهْيَا لِي  
أَوْ دِي يَنْعَلِي وَسِرْبًا لِي

7. The *seventh* is أَنَّى and is also applicable to PLACE,

EXAMPLE.

أَنَّى تَكُنْ أَكُنْ Wherever you reside, I will reside,

أَيَّ That is,

<p>إِنْ تَكُنْ فِي الْبَلَدَةِ أَكُنْ فِي الْبَلَدَةِ وَ</p>	<p>If you remain in the City, I will remain in the City, and</p>
<p>إِنْ تَكُنْ فِي الْبَادِيَةِ أَكُنْ فِي الْبَادِيَةِ</p>	
	<p>If you remain in the desert, I will remain in the desert.</p>

Annotation.

I confess I cannot discover the exact meaning of this Verse and know not how أَنَّى can be rendered Interrogatively:—perhaps it may be translated thus,

What a night, what a night for poor Paddy Whack,  
Not a shoe to my foot, nor a shirt to my back!

O أَيُّ.

Is used Interrogatively, as. أَيُّ شَيْءٍ هَذَا? What thing is that?

And as a *Relative Pronoun*, as لَنَنْزِعَنَّ مِنْ كُلِّ شِيعَةٍ أَيُّهُمْ أَشَدَّ عَلَى الرَّحْمَنِ عِتِيًّا Certainly I will separate from every tribe or nation, he who was most perverse against his God.

It sometimes follows an Indefinite Noun for the purpose of distinguishing it either by praise or censure, as زَيْدٌ رَجُلٌ أَيُّ رَجُلٍ Zued is a man; what a man! or after a proper name, as مَرَرْتُ بِعَبْدِ اللَّهِ أَيُّ رَجُلٍ I passed by ABDOULLAH, what a man!

COMMENTARY.

8. The *eighth* is **حَيْثُهَا** and is also applicable to PLACE.

EXAMPLE.

**حَيْثُهَا تَقْعُدُ أَتَقْعُدُ** *Wherever you sit, I will sit,*

**أَيُّ** That is,

<p><b>إِنْ تَقْعُدُ فِي الْقَرْيَةِ أَتَقْعُدُ فِي الْقَرْيَةِ وَ إِنْ تَقْعُدُ فِي الْبَلَدَةِ أَتَقْعُدُ فِي الْبَلَدَةِ</b></p>	}	<p>If you sit in the Village, I will sit in the Village, and If you sit in the City, I will sit in the City.</p>
--	---	--

Annotation.

**أَنْتَى** and **أَيْنَهَا** *O F*

The word **أَيْنَهَا** compounded agreeably to the authority of Ibnool Hajib of **أَيْنَ** and **مَا** redundant, is also used *Interrogatively* as well as *Conditionally*, as **أَيْنَهَا زَيْدٌ** Where is Zued? The same remark is applicable to **أَنْتَى** which seems Synonymous with **أَيْنَهَا** as **أَنْتَى زَيْدٌ** Where is Zued: **أَنْتَى** however is sometimes taken in the sense of **كَيْفَ** as in the following example from the Qooran, as produced by **رُزِّي** RUZEE.

**أَنْظُرْ كَيْفَ نَبِّينَ لَهُمُ الْآيَاتِ ثُمَّ أَنْظُرْ أَنْتَى يَوْفُوكُونَ**

Behold we declare unto them the signs (of God's unity) and then behold how they turn aside from the truth?

**أَنْتَى** is also used in a sense Synonymous with **مَتَى** as **أَنْتَى تَهْبِشُ أَمْشِ** When you go, I will go.

**حَيْثُهَا** *O F*

The author of the Mooghnee makes **حَيْثُهَا** a compound of **حَيْثُ** and **مَا** redundant. It is formed

9. The *ninth* is **إِذَا مَا** and is applicable to TIME.

EXAMPLE.

**إِذَا مَا تَفْعَلْ أَفْعَلْ** When you do *it*, I will do *it*,

**أَيَّ** That is,

**إِنْ تَفْعَلِ الْآنَ أَفْعَلِ الْآنَ** { If you do it now, I will do it now, and  
**وَإِنْ تَفْعَلْ غَدًا أَفْعَلْ غَدًا** { If you do it to-morrow, I will do it to-morrow.

But if the verb in the second sentence, on that containing the *consequence* be in the Aorist, and not in the first or conditional sentence, then the AORIST may be either marked **رَفْعُ** or **جَزْمُ** at discretion.

EXAMPLE.

**مَتَى كَتَبْتَ أَكْتُبُ** When you write, I will write,

### Annotation.

to denote *place*, but is also occasionally applicable to *time*, and is generally found to precede either a *nominal*, or a *verbal* sentence, as

**قَامَ حَيْثُ زَيْدٌ قَامَ** I rose up when Zued rose.

**جَلَسْتُ حَيْثُ جَلَسَ زَيْدٌ** I sat down when Zued sat.

**حَوْثُ** and **حَيْثُ** ; **حَيْثُ** is also written **حَيْثُ**.

**إِذَا مَا**.

This word is considered by the author of the Mooghnee as a Particle Synonymous with **إِنْ** **MOOBURRUD**, **IBNO SIRAJ**, and **FARSEE** make it a *Surf*. Some think it is seldom used as a governing word: and others that it is generally so. It is compounded agreeably to **RUZEE** of **إِذَا** and **مَا**.

## STORY.

A certain city-lounger was standing one day in the street, and happened to see a woman of elegant appearance pass by with a child in her arms. He said to the people about him, 'if any one will bring me that child in order that I may kiss his feet, I will give him ten Dirhums,' but no body answered him. He addressed them again, and said, 'I will give fifteen Dirhums to any one that will bring me the child,' but they continued silent as before. I had better said he to himself leave these blockheads alone, and watch the motions of the woman, and wherever she goes, go there also, and at whatever house she enters, stop there (and wait her coming out,) upon which he began to follow her. The woman (turned round) and said, 'what is your object Sir, in pursuing me thus? I wish replied he for permission to kiss the feet of that child, and if you allow me, I will do whatever you command. Why do you wish this said the woman? because I love you replied he, and you love the child, and the beloved of the beloved, is also beloved. The woman laughed at his answer, and said if you are determined on this, you had better wait for his father, who is about to proceed to the bath,\* and when he takes off his shoes you can go and kiss his feet, for my love to him is greater than to this child. The fellow was abashed at her reply and retreated.

\* I have omitted a sentence here to avoid repetition.

CLASS EIGHTH.

The *eighth* CLASS contains *four* words which give نَصَب to an Indefinite Noun (إِسْمُ نَكْرَةٍ) or govern it in the ACCUSATIVE or OBJECTIVE case, as the تَبْيِينُ or Noun of SPECIFICATION.

1. Of these the *first* is عَشْرَةٌ TEN, when compounded with أَحَدُ ONE; اثْنَانِ TWO; ثَلَاثَةٌ THREE; أَرْبَعَةٌ FOUR; خَمْسَةٌ FIVE; سِتَّةٌ SIX; سَبْعَةٌ SEVEN; ثَمَانِيَةٌ EIGHT and تِسْعَةٌ NINE.

The same government is applicable to the Numbers, عِشْرُونَ TWENTY; ثَلَاثُونَ THIRTY; أَرْبَعُونَ FORTY; خَمْسُونَ FIFTY; سِتُّونَ SIXTY; سَبْعُونَ SEVENTY; ثَمَانُونَ EIGHTY; تِسْعُونَ NINETY, whether compounded or not, but these are properly comprised among the ANALOGOUS governors, under the head of الْأَسْمُ التَّامُّ or INTEGRAL NOUNS.

If the تَبْيِينُ be a MASCULINE Noun, the grammatical arrangement of the units أَحَدُ and اثْنَانِ in construction with عَشْرٌ will be as follows, with both members of the compound number in the MASCULINE Gender:

EXAMPLES.

أَحَدَ عَشَرَ رَجُلًا Eleven men.

اثْنَا عَشَرَ رَجُلًا Twelve men.

Annotation.

The words contained in the eighth Class are nouns of number either determinate or indeterminate, which generally give نَصَب and sometimes جَر to an indefinite noun, or govern it in the OBJECTIVE, and AORIST or OBLIQUE Cases; and as NUMBERS in their applicative sense refer to particulars, in opposition to those in the abstract, the word expressive of that particularity is always termed تَبْيِينُ or تَبْيِينُ the noun of specification or PARTICULARITY; or the SPECIFIER, and significantly مَعْدُودُ the noun NUMBERED. It must however be remembered that the مَعْدُودُ

But if the <sup>٥٠٠</sup>تَهْمِيز be FEMININE, the reverse will take place and both members of the compound be FEMININE also :

EXAMPLES.

أَحَدِي عَشْرَةَ امْرَأَةً Eleven women.

اثْنَتَا عَشْرَةَ امْرَأَةً Twelve women.

The other cardinal numbers from *three* (ثَلَاثَةٌ) to *nine* (تِسْعَةٌ) inclusive, in construction with <sup>١٠</sup>عَشْرَ ten, are applied as below ; the *first* member of the compound being FEMININE the *second* MASCULINE, and this always happens when the <sup>٥٠٠</sup>تَهْمِيز is a MASCULINE Noun :

EXAMPLES.

ثَلَاثَةَ عَشَرَ رَجُلًا Thirteen men.

أَرْبَعَةَ عَشَرَ رَجُلًا Fourteen men, and so on to

تِسْعَةَ عَشَرَ رَجُلًا Nineteen men.

Annotation.

always refers to *number*, whereas the <sup>٥٠٠</sup>تَهْمِيز and <sup>١٠٠٠</sup>مِهْمِيز have a more general application as explained in page 8 and 9 of the 1st Book. The word <sup>١٠</sup>عَشْرَةٌ in the text expresses the *number ten* abstractedly and differs perhaps from <sup>١٠</sup>عَشْر in the same way as *deka* from *deka* in Greek, or *Decas* from *Decem* in Latin. It always governs the <sup>٥٠٠</sup>تَهْمِيز in the Aorist or OBLIQUE Case, in other words its <sup>٥٠٠</sup>تَهْمِيز is <sup>١٠٠٠</sup>مِهْمِيز. The same government is applicable to the cardinal numbers from *three* to *nine* inclusively : in these cases the <sup>٥٠٠</sup>تَهْمِيز is a noun plural either in form or meaning as ثَلَاثَةُ رَجَالٍ and ثَلَاثَةُ نَفَرٍ 'Three men, or three individuals.' But the compounded numerals from *ten* to *ninety-nine*, give *Nusub*, or govern the <sup>٥٠٠</sup>تَهْمِيز in the objective case, which must always be in the singular number. The <sup>٥٠٠</sup>تَهْمِيز of the words مِائَةٌ a hundred, and أَلْفٌ a thousand must be in the singular number and Aorist case, as مِائَةُ رَجُلٍ 'A hundred men,' أَلْفُ دِرْهَمٍ a thousand Dirhums, as also مِائَةُ مَلِكٍ the name of the Book on which the present work is a Commentary.

But if the <sup>تَهْمِينُ</sup> be a FEMININE Noun, the order is reversed, and the *first* member of the compound will be MASCULINE, and the *second* FEMININE.

EXAMPLES.

ثَلَاثَ عَشْرَةَ امْرَأَةً Thirteen women.  
أَرْبَعَ عَشْرَةَ امْرَأَةً Fourteen women, and so on to  
تِسْعَ عَشْرَةَ امْرَأَةً Nineteen women.

The cardinal numbers <sup>اِحْدَ</sup> <sup>اِثْنَانِ</sup>, &c. to <sup>تِسْعَةَ</sup> when combined with <sup>عِشْرُونَ</sup> TWENTY, and its cognate numbers in a decimal progression as far as <sup>تِسْعُونَ</sup> NINETY, take the <sup>وَ</sup> or Copulative Conjunction <sup>وَالْعَظْفِ</sup> between the members of the compound: If then the <sup>تَهْمِينُ</sup> be a MASCULINE Noun, the first member of the compound when it happens to be <sup>وَاحِدَ</sup> or <sup>اِثْنَانِ</sup> (but not of the other units,) will be Masculine also:

EXAMPLES.

اِحْدَ وَعِشْرُونَ رَجُلًا Twenty one men.  
اِثْنَانِ وَعِشْرُونَ رَجُلًا Twenty two men.

Annotation.

OF كَمْ

The word <sup>كَمْ</sup> is derived by some from the preposition <sup>كَافَ</sup> and the interrogative <sup>مَا</sup> by the rejection of the Alif; but the general opinion I believe is, that it is simple and uncompounded. It admits a preposition before it and is therefore considered a noun, as <sup>عَلَى كَمْ جِدْعٍ بَنَيْتَ بَيْتَكَ</sup> 'Upon how many beams have you built your house?'

The <sup>تَهْمِينُ</sup> of <sup>كَمْ</sup> is sometimes rejected if the sense of the sentence can be made out from the context, as <sup>كَمْ يَوْمًا صُمْتَ</sup> for <sup>كَمْ صُمْتَ</sup> how many days have you fasted?

But if the تَبَيِّنُ be FEMININE, the first member of the compound will be Feminine also :

EXAMPLES.

إِحْدَى وَعِشْرُونَ امْرَأَةً Twenty one women.

اِثْنَانِ وَعِشْرُونَ امْرَأَةً Twenty two women.

Of the other digits from *three* to *nine* inclusive the order will be as follows :—the تَبَيِّنُ being a MASCULINE Noun, the first word in the compound will be Feminine :

EXAMPLE.

ثَلَاثَةٌ وَعِشْرُونَ رَجُلًا Twenty three men.

But if the تَبَيِّنُ be FEMININE, the reverse must take place, and the first word of the compound will be Masculine.

EXAMPLE.

ثَلَاثٌ وَعِشْرُونَ امْرَأَةً Twenty three women.

And so on in the same manner to NINETY-NINE.

Annotation.

When كَمْ is used interrogatively with a preposition prefixed to it, it renders the تَبَيِّنُ Mujroor, (the preposition مِنْ being understood), as بِكَمْ دِرْهَمٍ اشْتَرَيْتَ هَذَا 'For how many Dirhums did you purchase this?' but alone or unconnected with a preposition it renders the تَبَيِّنُ Munsoob.

When كَمْ is used to denote *assertion*, it is supposed to be Synonymous with تَكْثِيرٌ, and its تَبَيِّنُ is sometimes a Noun in the Plural number, like the تَبَيِّنُ of عَشْرَةٌ as كَمْ غُلَامَانِ مَلَكَتُ 'I have purchased several slaves.' And sometimes in the singular, as كَمْ دِرْهَمٍ اَنْفَقْتُ 'I have spent much money.' The تَبَيِّنُ in all such cases being rendered Mujroor.

2. The second is the word **كَمْ** which is used to denote an INDETERMINATE NUMBER, (**عَلَّامٌ لَهُمْ**) and has a twofold relation : The *first* is termed **اِسْتِغْهَامِيَّة** or the INTERROGATIVE **كَمْ** when used in the sense of interrogation, and governs the **تَهْمِينِ** in the Objective Case, as

**كَمْ رَجُلًا ضَرَبْتَهُ** How many men did you strike?

The *second* is termed **خَبَرِيَّة** or the INDICATIVE, when not used Interrogatively, and governs the **تَهْمِينِ** in the OBJECTIVE Case if any word happen to intervene between it and the **تَهْمِينِ** as

**كَمْ عِنْدِي رَجُلًا** There are several men with me.

But if no word intervene it governs the **تَهْمِينِ** in the Aorist or Oblique case, as

**كَمْ رَجُلًا ضَرَبْتَهُ** I struck several men.

**كَمْ غُلَامٍ اشْتَرَيْتُ** I purchased several boys or slaves.

The *third* is **كَذَا** compounded of **كَافُ** التَّشْبِيهِ or Kaf of similitude, and the pronoun **ذَا** but is used to denote an Indeterminate number, and is never applied Interrogatively, as

**كَذَا ارْجُلًا عِنْدِي** There are so many men with me.

#### Annotation.

كَذَا F

**كَذَا** compounded of the **كَافُ** of similitude and the demonstrative pronoun **ذَا** is frequently used in its etymological sense, and has no governing power, as **رَأَيْتُ زَيْدًا ذَا ضِلَالٍ وَرَأَيْتُ عَمْرًا ذَا كَذَا** 'I found Zued learned, and Amr the same.' But when used as a single word, it denotes an indeterminate number, as **اَتَذْكُرُ يَوْمًا كَذَا** او **كَذَا فَعَلْتُ كَذَا** او **كَذَا** 'Do you remember such and such a time when you did so and so.' It may be also rendered, so much, **قَبَضْتُ كَذَا دِرْهَمًا** 'I took so much money.'

The *fourth* is كَائِنٌ compounded of the KAF OF SIMILITUDE and the word كَيْ but is used to denote an INDEFINITE NUMBER, without any relation to the meaning of its component parts, as

كَائِنٌ رَجُلًا لَقِيتُ I visited some men.

It is also used Interrogatively, as

كَائِنٌ دِرْهَمًا عِنْدَكَ How many Dirhums have you?

#### Annotation.

O F كَائِنٌ

The word كَائِنٌ is also compounded of the كَان of similitude, and كَيْ as mentioned by the Commentator, and is synonymous with كَمْ Its تَمَثُّلٌ when preceded by مِنْ is *Mujroor*, as in the following example from the Qooran,

كَائِنٌ مِنْ نَبِيِّ قَاتَلَ مَعَهُ رِجَالٌ

"How many Prophets have encountered those who had myriads of Troops."

The words in this class are included in the following story.

## S T O R Y.

Whoever said a certain Physician will eat the Mad-Apple\* for forty days successively will lose his senses. A person present said, how much of it must be eaten every day for that purpose? The Physician answered, *so much*, and made a motion with his hand three times towards him, to denote fifteen of them. The man went away and continued eating the Mad-Apple and in the forty first night, he put on his sword and went to the Physician and said—did you not say O stupid and ignorant Doctor, that whoever would eat fifteen of the fruit of the Mad-Apple for forty days successively would lose his senses? And how many have I eaten beyond that number and yet am not mad? and now I swear by God I will put you to death with this sword. The Doctor alarmed ran off and shut the door against him, and said O pardon me my friend!—I repent of my misconduct, and promise you never to prescribe the Mad-Apple to another as long as I live.

\* بِأَذْنَجَان It is also called the Egg-plant, *Melongena*, and is supposed (probably by those who have tasted of it) to be the mandrake of Theophrastus, which when eaten excites symptoms of madness. It is called in the Hindoostanee language *بینگی* *Buengun*, from which word or perhaps form the Persian *بادنجان* it may have found its way to Arabia.

CLASS NINTH.

The *ninth* CLASS contains *nine* words termed *أَسْمَاءُ الْأَفْعَالِ* or VERBAL Nouns, because they are considered equivalent in signification to verbs. Of these, six are used as the second person of the Imperative and give *زُصِبَ* to a Noun, or govern it in the Objective Case as its Object.

1. The *first* of these is *رُوِيَ* in the sense of *أَمْهَلَ* and is used in the beginning of a sentence.

EXAMPLE.

*رُوِيَ زَيْدًا* } Put off Zued, or  
*أَيَّ أَمْهَلَ زَيْدًا* } Let Zued alone.

Annotation.

The author of the Grammatical Treatise called the *مُفَصَّلُ* Moorussul, divides Verbal Nouns into two Classes, the first having the sense of verbs in the 2d Person of the Imperative mood, the second of verbs in the past time, which are termed *أَسْمَاءُ الْأَخْيَارِ* or Nouns of Predication. The first Class, or those equivalent to the Imperative of verbs, are either transitive as exemplified in the Commentary, or intransitive, as *صَدُ* be silent *اِيْ* go on (with your discourse), like *Agedum* in Latin; or and *هَيَّ* make haste which occurs under four various forms, as *هَيَّكَ*; *هَيَّ*; *هَيَّ*; and *هَيَّا* the last of which is exemplified in the following distich:

فَقَدْ دَجَى اللَّيْلُ هَيَّتَا هَيَّتَا

'For the night is dark, so hasten, hasten!'

Also *نَزَلَ* alight or descend; *قَدْشَكَ* and *قَطَنَى* enough for you; *اِلْبَكْ* return, come back.

The Verbal Nouns termed *أَسْمَاءُ الْأَخْيَارِ* are generally found in the past time as *وَشَكَانَ* he hastened, in the sentence *وَشَكَانَ دَاخِرُجًا* 'He hastened his coming out!' but there are some

2. The *second* is بَلَّهَ in the sense of دَعَّ.

## [EXAMPLE.]

بَلَّهَ زَيْدًا }  
 أَي دَعَّ زَيْدًا } Give up or relinquish Zued;

3. The *third* is دُونَكَ in the sense of خَذَّ.

## EXAMPLE.

دُونَكَ زَيْدًا }  
 أَي خَذَّ زَيْدًا } Take, or seize Zued,

## Annotation.

others supposed to be in the Aorist, as أَتَّ 'it grieves me,' which is said to occur under forty-one various forms; the following are more common, أَتَّ أَتَّ أَتَّ أَتَّ أَتَّ and the word أَؤْء 'It pains me,' which also assumes a variety of shapes, as أَؤْء أَؤْء أَؤْء أَؤْء أَؤْء but Ibnool Hajib the celebrated author of the *Kasaca*, and the generality of Arabian Grammarians, will not admit of any Verbal Nouns being found in the Aorist, and explain those above quoted as applicable to past time,

دَوِيْدٌ

This word has a variety of uses. It occurs 1st as a Verbal Noun. 2d as an attribute or Adjective, as سَارُوا سَيْرًا دَوِيْدًا They travelled or made a slow or tedious journey; 3d as the حال i. e. a *Descriptive Noun*, for the purpose of describing the state of the Agent or Object of a verb, as سَارُوا دَوِيْدًا they travelled in a *slow manner*. 4th as a Noun governing another in the Aorist or Oblique Case, as دَوِيْدَ زَيْدًا the slow progress, or tardy journey of Zued!

The author of the *Qamoos* makes دَوِيْدٌ the diminutive of دَوْدٌ 'travelling slowly,' as أَشْءٌ عَلَى دَوْدٍ 'go on slowly or in an easy pace;' but it is given in *Ruzec* as the dimin. of دَوْدٌ. It seems

BOOK SECOND.

4. The *fourth* is عَلَيْكَ in the sense of أَلْزَمَ.

EXAMPLE.

عَلَيْكَ زَيْدًا }  
أَيُّ أَلْزَمَ زَيْدًا } Seize or compel Zued.

5. The *fifth* is حَيْهَل in the sense of آيَت.

EXAMPLE.

حَيْهَلِ الثَّرِيدَ }  
أَيُّ آيَتِ الثَّرِيدَ } Come to the bread.

Annotation.

when used as an Imperative, to correspond with 'put off,' as well in the sense of *delay, defer, procrastinate, &c.* as that of *discarding*, which is thus used idiomatically in Shakspeare,—'the clothiers all put off the spinsters, carders, fullers, weavers.' It may be translated *differ* in Latin.

It takes the second personal Pronoun *Kaf* as an affix, as يُدَكُّ, and sometimes the expletive لَ as in the following Verse, said to be spoken by an Arab to a bad Poet who had tormented him with a vile Poem in his praise.

وَاللّٰهُ لَوَارَدَتْ لَدَرَاهِمَ لَا أُعْطِيكَ رُوَيْدًا مَا الشَّعْرُ

'If you wish for money I will certainly give it to you,

But (for God's sake) have done with Poetry !'

بَلَاءَ

May be translated, *suffer, let alone, meddle not*, and is found Synonymous with كَيْفَ as in the following example given by Ruzeeقَ بِالْمَحْكَمَةِ  
'Certainly such a person has not strength sufficient to take up a pebble, how then should he carry here a rock.'

6. The *sixth* is هَا in the sense of خُذْ.

EXAMPLE.

هَازِيْدَا } Lay hold of or seize Zued.  
أَيُّ خُذْ زِيْدَا }

This word occurs under three other various forms: First هُوْ with a *Humza*, quiescent in the place of *Alif*. Second هَاء with an additional *Humza Muksoora*, or marked with the vowel كَسْرَة and lastly هَاء with an additional *Humza Mustookha*, or *Humza* marked with the vowel فَتْحَة.

Annotation.

مَلِيْك and دُوْنَكْ

دُوْنَكْ is compounded of دُوْن and the pronominal affix كَف and may be rendered *take, accept, &c.* as in the following Example from the 2d Muqam of Hureeree.

دُوْنَكُمْ بِبَيْتَيْنِ ٧ خَرِيْنِ

'Accept these other two verses.'

عَلَى is also compounded of the Preposition عَلَى and كَف and may be translated *bring, induce, keep by, or remain close to, &c.*

حِيْهَلْ

حِيْهَلْ is compounded of حِيْ in the sense of *make haste*, and هَلْ abbreviated from هَلَا (the English *holla*,) the compound being originally حِيْهَلْ it occurs in the following forms حِيْهَلْ حِيْهَلْ and is sometimes *transitive* of itself, and sometimes in *Conjunction* with a Preposition. حِيْ is alone used by the Moohummudan Crier in his invocatory formula to prayers as حِيْ عَلَى الصَّلَاةِ 'Come to prayers.'

The above six Nouns necessarily require an agent, which agent is the second personal Pronoun concealed in them.

The remaining three are used as verbs in the <sup>رفع</sup>past time, and give <sup>رفع</sup>نصب to a Noun, or govern it in the Nominative Case as its proper agent.

7. The *first* is هَيْهَاتَ in the sense of بَعْدَ.

EXAMPLE.

هَيْهَاتَ زَيْدٌ }  
أَيُّ بَعْدَ زَيْدٍ } Zued was distant.

Annotation.

هَآ

هَآ answers to *take, seize, &c.* and admits of the pronominal affix of the 2d person, as هَآكَ هَآكِ هَآكُمْ masculine, and feminine.

هَيْهَاتَ

This word with the final letter marked *Futha* is peculiar to the people of Hijaz ; and with the *Kusra* to the tribe of Tameem. The final letter is sometimes marked *Summa*, and sometimes with the *Tunween*, as

تَذَكَّرْتُ أَيَّامًا مِنَ الصَّبَا  
فَهَيْهَاتَ هَيْهَاتَ رُجُوعَهَا

" I remembered the season of youth but alas how distant was its return !"

It assumes in the Qamees no less than fifty-one different shapes, the following eleven are supposed to be common :

هَيْهَاتَ هَيْهَاتَ هَيْهَاتَ هَيْهَاتَ هَيْهَاتَ هَيْهَاتَ هَيْهَاتَ  
أَيْهَاتَ أَيْهَاتَ أَيْهَاتَ أَيْهَاتَ أَيْهَاتَ أَيْهَاتَ أَيْهَاتَ

COMMENTARY.

8. The second is شَتَّانَ in the sense of اِفْتَرَقَ.

EXAMPLE.

شَتَّانَ زَيْدٌ وَعَمْرُو }  
 أَيِ اِفْتَرَقَ زَيْدٌ وَعَمْرُو } Zued and Amr were separated.

Annotation.

And was originally شَتَّانَ on the measure فَعْلَلَة the Fa being changed into Alif by a common rule of permutation.

O F شَتَّانَ

Is derived from شَتَّ separation, by the addition of *Alif* and *Noon* redundant. Ruzee says, it frequently denotes surprise or astonishment along with its original meaning, as شَتَّانَ زَيْدٌ وَعَمْرُو 'How widely separated were Zued and Amr!' It is used in Conjunction with the expletive مَا and sometimes also with the word بَيْنَ both of which are then redundant, as شَتَّانَ مَا بَيْنَ عَمْرٍو وَزَيْدٍ but the Grammarian observes that this is of rare occurrence and should not be followed. Its final letter is sometimes written with *Kusra*, but more usually with *Futha*, as in the following verse supposed to be uttered by a way-worn Traveller in the midst of the Arabian Desert;

شَتَّانَ هَذَا وَالْعَنَاقُ وَالنَّوْمُ \*  
 وَالْمَشْرَبُ الْبَارِدُ فِي ظِلِّ الدَّوْمِ \*

How distant feels this wild and desert space,  
 From the warm pressure of a Friend's embrace,  
 How far from cooling springs or soft repose,  
 Where the tall Tree its grateful shelter throws.

\* The دَوْمٌ is a large branchy sub-legumine-fagi kind of tree, perhaps the Palmetto, whose fruit are the مَقَل.

9. The *third* is سُرْعَان in the sense of سُرْع.

EXAMPLE.

سُرْعَان زَيْدُ }  
أَيُّ سُرْعٍ زَيْدُ } Zued hastened.

Annotation.

The following is an attempt to give it a Persian dress :

• فرق است در میان من و آنکه در حضر • بانای و نوش بگذردش عمر سر بسر •  
• روز است و سیر باغ پیاران همدش • بامهوشان همیشه شب خواب تا سحر •  
O F سُرْعَان

سُرْعَان is derived from سُرْع celerity, by the addition of *Alif* and *Noon* redundant. It is written, سُرْعَان سُرْعَان سُرْعَان as سُرْعَان ذَا اِهَانَةً the true meaning and force of which will be better understood by recounting the manner in which it was used, as given in the اَضَاحِيك an Arabian Jest-Book.

An Arab went to a shepherd with the intention of purchasing a sheep, and requested to be supplied with a fat one. The shepherd told him he should have the fattest in his flock, but produced a poor, meagre, scurvy, halfstarved thing, with its nose snivelling from excess of poverty. The Arab called out with astonishment, what object of misery is this! where is the flesh or fat? why my good friend said the shepherd dont you observe the very fat dropping from her nose! O Bravo, said the Arab, سُرْعَان ذَا اِهَانَةً Its snivel runs in melted fat!!

The above Story is related in various ways, (See Ruzee and the Qamoos) but they do not appear to be worth repeating, سُرْعَان also occasionally denotes surprise or astonishment as سُرْعَان مَا صَنَعْتَ كَذَا for مَا اِسْرَعُ, what celerity!.

Annotation.

The idiomatical application of these verbal Nouns may be seen in the following story, which may serve at the same time as a sort of Commentary upon the celebrated saying of Antiphanes,

Προς γὰρ τὸ γῆρας ὥσπερ ἐργαστήριον

Ἀπαντὰ τὰνθρώπινα προσφύονται μακρῇ

S T O R Y.

An old man\* complained to a Doctor of bad digestion. O let bad digestion alone said the Doctor, for it is one of the concomitants of old age. He then stated his weakness of sight. Don't meddle with weakness of sight replied the Doctor, for that also is one of the concomitants of old age. He complained to him of a difficulty of hearing. Alas how distant is hearing said the Doctor from old men! difficulty of hearing is a steady concomitant of old age. He complained to him of want of sleep. How widely separated said the Doctor, are sleep and old men, for want of sleep is certainly a concomitant of old age. He complained to him of a decrease of bodily vigour.† This is an evil replied the Doctor that soon hastens on old men, for want of vigour is a necessary concomitant of old age. The old man (unable to keep his patience any longer) called out to his companions—seize upon the booby, lay hold of the blockhead, drag along the ignorant idiot, that dolt of a Doctor, who understands nothing, and who has nothing to distinguish him from a Parrot, but the human figure, with his ‘concomitants of old age,’ for sooth! the only words he seems capable of uttering. The Doctor smiled, and said, come on my old boy, get into a passion, for this also is a concomitant of old age.

\* From the Verb شَاخَ ‘he grew old,’ comes شَيْخٌ an old man, Plur. شَيْخَةٌ وَشَيْخَانِ وَشَيْخَانِ and the Infinitives شَيْخُ and شَيْخُوحَةٌ old age.

† For the literal signification of بَلِيدٌ consult the Lexicon. بَلِيدٌ a blockhead, Ital. balordo.

CLASS TENTH.

The *tenth* CLASS contains *thirteen* Verbs termed الْأَفْعَالُ النَّاقِصَةُ or IMPERFECT VERBS, and are so called because they cannot with an Agent alone, form a complete or perfect Sentence. They precede in construction a Nominal Sentence, or a Sentence consisting of a SUBJECT and PREDICATE, to the first of which they give رَفَع and to the second نَصَب. The first Term is called the اِسْم the SUBSTANTIVE NOUN, the second the خَبَر the ATTRIBUTE or PREDICATE.

1. Of these the first is كَانَ which is used in two senses. 1st Imperfect. 2d Perfect.

As an *Imperfect* Verb it is used in two ways. *First*, as affirming the existence of its Attribute in its Substantive Noun or Subject, in time past, either in a sense *capable of cessation*, (مُبْكِنُ الْإِنْقِطَاعِ) as كَانَ زَيْدٌ قَائِمًا 'Zued was standing;' or in a sense *incapable of cessation*, (مُبْتَنِعُ الْإِنْقِطَاعِ) as كَانَ اللَّهُ عَلِيمًا حَكِيمًا. 'God was knowing and wise.'

*Second*, in the sense of صَارَ, as,

كَانَ الْفَقِيرُ غَنِيًّا أَيَّ صَارَ غَنِيًّا The poor man became rich.

---

Annotation.

The Arabian Grammarians consider Verbs as either Perfect or Imperfect, and as their account of them seems to agree in almost every respect with that of the Stoics as given by Harris in his *Hermes*, I shall present the extract to the reader by way of illustration.

"The Stoics in their logical view of Verbs, as making part in Propositions, consider them under the four following sorts :

When a Verb Co-inciding with the Nominative of some Noun, made *without further help* a Perfect Assertive Sentence, as Σωκράτης περιπατεῖ *Socrates walketh*; then as the Verb in such Case implied the power of a Perfect Predicate, they called it for that reason Κατηγόρημα a *Predicable*;

2d. As a *Perfect Verb*, forming with its Nominative or Agent alone a complete or perfect Sentence, and consequently does not require to be connected with any other Predicate. In this sense it denotes *existence* (absolutely), as

كَانَ زَيْدٌ Zued was, i. e.

أَيُّ ثَبَّتَ زَيْدٌ Zued existed.

2. The second is *صَارَ* which is used to denote a *change* in the Subject of the Proposition either, from one *nature* or *substance* into another, as,

صَارَ الطِّينُ خَزَفًا The clay became a pot.

Or, from one *quality* into another, as,

صَارَ الْفَقِيرُ غَنِيًّا The poor man became rich.

It is sometimes used as a perfect Verb, to denote change from one place to another, and is then applied transitively with the Preposition *إِلَى*, as

صَارَ زَيْدٌ مِنْ بَلَدٍ إِلَى بَلَدٍ Zued went from one City to another.

### Annotation.

or else from its readiness *συμπίπτειν*, to co-incide with its Noun in completing the Sentence, they called it *Σύμπτωση* a Co-incider.

When a Verb was able with a Noun to form a Perfect Assertive Sentence, yet could not associate with such Noun, but under some Oblique Case, a *Συγκρίτει μεταμέλει*, *Socratem pœnitet*: such a Verb from its near approach to just Co-incidence and Predication, they called *Παρασύμπτωση* or *Παρακτιγόμενα*.

When a Verb, though regularly Co-inciding with a Noun in its Nominative, still required to complete the sentiment some other Noun under an Oblique Case, as *Πλάτων φιλεῖ Δίωνα*, *Plato loveth Dio* (where without *Dio* or some other, the Verb *loveth* would rest indefinite:) such a Verb,

3. The *third, fourth and fifth*, are أَصْحَى أَمْسَى أَصْبَحَ the whole of which are used to unite or conjoin the sense of the Sentence with their respective times, namely, *morning, evening, and noon*, as

أَصْبَحَ زَيْدٌ غَنِيًّا مَعْنَاهُ	{	Zued was wealthy in the morning, i. e.
حَصَلَ غِنَاهُ فِي وَقْتِ الصُّبْحِ		His wealth was at that time.
أَمْسَى زَيْدٌ حَاكِمًا مَعْنَاهُ	{	Zued was a governor in the evening, i. e.
حَصَلَ حُكُومَتُهُ فِي وَقْتِ الْمَسَاءِ		His government was at that time.
أَصْحَى زَيْدٌ قَارِئًا مَعْنَاهُ	{	Zued was a reader in the fore-noon, i. e.
حَصَلَ قِرَاءَتُهُ فِي وَقْتِ الظُّهْرِ		His reading was at that time.

#### Annotation.

from this defect they called ἡττον ἢ συμβαμα, or ἡ κατηγορημα some thing less than a Co-incider, or less than a Predicable.

Lastly, when a Verb required *two Nouns in Oblique Cases*, to render the sentiment complete, as when we say Σωκράτει Αἰκισιάδης μέλει, *Tedet me vitæ*, or the like, such Verb they called ἡττον, or ἑλαττον ἢ παρασύμβημα, or ἡ παρακατηγορημα, something less than an Imperfect Co-incider, or an Imperfect Predicable."

Here by the way it may be worth remarking, that almost the whole of the above extract seems copied from Stanley's History of Philosophy, which Harris appears to me to have made frequent use of in his Hermes and Philosophical Arrangements without any sort of acknowledgment. The following may serve as a specimen:—"Whatsoever is Predicated of another is Predicated of the name of the Case, and both these are either *Perfect*, as that which is predicated, and together with the subject sufficient to make an Axiom. Or they are *Defective*, and require some addition to make thereof a Perfect Predicate."

The above three Verbs are sometimes used in the sense of *مَصَار* as,

أَصْبَحَ الْفَقِيرُ غَنِيًّا The poor man became rich.

أَمْسَى زَيْدٌ كَاتِبًا Zued became a writer.

أَضْحَى الظُّلُمُ مُنِيرًا The obscure became bright.

They are sometimes used in the sense of Perfect Verbs, as,

أَصْبَحَ زَيْدٌ بِبَعْتِي }  
دَخَلَ فِي الصَّبَاحِ } Zued arrived in the morning.

أَمْسَى زَيْدٌ دَائِي }  
دَخَلَ فِي الْمَسَاءِ } Zued arrived in the evening.

أَضْحَى بُكْرٌ آي }  
دَخَلَ فِي الضُّحَى } Bukr arrived in the fore-noon,

### Annotation.

If that which is predicated of a name, make an Axiom, it is a *Categorem*, or *σύμβημα*, a Congruity, as *walketh*, for example, *Socrates walketh*.

But if it be predicated of the Case (whereby Transitions are made from one person to another, wherein it is necessary that some Oblique Case be likewise pronounced with the right,) they are called *Παρασυμβήματα*, as an addition to the *σύμβημα* (or as Priscian renders it, *less than Congruities*) as *Cicero saved his country*.

Again, if that which is predicated of some Noun, require a Case of some other Noun to be added to make up the Axiom, so as the construction be made of two Oblique Cases, they are *ἀντισυμβήματα*,

COMMENTARY.

4. The *Sixth* and *Seventh*, are *ظَلَّ* and *بَاتَ* which are used to unite the sense of the sentence with their respective times, namely *day* and *night* : *ظَلَّ* therefore unites the sense of the Sentence with the *day*, and *بَاتَ* with the *night*, as,

*ظَلَّ زَيْدٌ كَاتِبًا أَيَّ* { Zued was a writer in the day, i. e.  
*حَصَلَ كِتَابَتُهُ فِي النَّهَارِ* { His writing was at that time.  
*بَاتَ زَيْدٌ قَائِمًا أَيَّ* { Zued spent the night in sleep, i. e.  
*حَصَلَ نَوْمُهُ فِي اللَّيْلِ* { His sleep was at that time.

## Annotation.

incongruities, or according to Ammonius, *less than*, *συνεχόμενα*, as *it pleases me to come to thee*; whether the Nouns only or the words require it. See Stanley's History of Philosophy. *Folio Ed.* 1701, in the life of Zeno, p. 310.

In answer to certain of the Arabian Grammarians who contend that *Imperfect Verbs*, are merely used to denote *time* without reference to the sense of their Infinitives, the Grammarian Ruzee in his celebrated Commentary upon the *Kafea* makes the following reply, which I offer as a short specimen of his style and manner.

وَمَا قَالَ بَعْضُهُمْ مِنْ أَنَّهَا سَمِيَتْ نَا قِصَّةً لَا تَدُلُّ عَلَى الزَّمَانِ دُونَ الْمَصْدَرِ لَيْسَ بِشَيْءٍ لَّانْ كَانَ فِي نَكْوٍ  
 كَانَ زَيْدٌ قَائِمًا يَدُلُّ عَلَى الْكَوْنِ الَّذِي هُوَ الْحَصُولُ الْمَطْلَقُ وَخَيْرٌ دَلُّ عَلَى الْكَوْنِ الْمُخْتَصِمِ  
 وَهُوَ كَوْنُ الْقِيَامِ أَيْ حَصُولُهُ فَجَبَّيْ أَوْ لَا بَلْغِظِ دَلُّ عَلَى حَصُولِ مَا ثُمَّ عَيْنُ بِالْخَبَرِ ذَلِكِ الْحَصُولُ  
 فَكَانَتْ قُلْتَ حَصَلَ شَيْءٍ ثُمَّ قُلْتَ حَصَلَ الْقِيَامُ فَكَانَ تَدُلُّ عَلَى حَصُولِ حَدَثٍ مُطْلَقٍ يُقَيَّدُ بِخَبَرٍ  
 وَخَيْرٌ يَدُلُّ عَلَى حَدَثٍ مُعَيَّنٍ فِي زَمَانٍ مُطْلَقٍ يُقَيَّدُ بِكَانَ

The above two Verbs are sometimes used in the sense of *صَارَ*, as,

فَلَّيَ الصَّبِيُّ بِالْغَا The boy *became* adult.

بَاتَ الشَّابُّ شَيْخًا The youth *became* an old man.

5. The *eighth* and *ninth* are مَا بَرَحَ and مَا قَتَّى sometimes written مَا قَتَّأ the *tenth*, مَا زَالَ and *eleventh* مَا اُنْثَكَّ each of which is used to indicate the uninterrupted duration or permanence of the Attribute in its Substantive Noun, as,

مَا بَرَحَ زَيْدٌ عَالِمًا Zued was *always* wise.

مَا قَتَّى زَيْدٌ قَائِمًا Zued was *always* standing.

مَا زَالَ زَيْدٌ فَاضِلًا Zued was *always* excellent.

مَا اُنْثَكَّ بُكْرٌ عَاقِلًا Bukr was *always* intelligent.

### Annotation.

“The opinions of those Grammarians who maintain that *Imperfect Verbs* are so called, because they are merely indicative of time, without reference to the sense of the Infinitive, are nugatory, for the word كَانَ in the Proposition; كَانَ زَيْدٌ قَائِمًا signifies *being*, that is, *being abstractedly considered*, and its Predicate denotes the mode or manner of that *being*, which is here *being standing*, or the *existence* of that *accident*. Introducing the Sentence therefore with a word indicative of *absolute existence*, and afterwards qualifying it by the attribute, is, as if we were to say, *a thing existed or was*, and afterwards add—*it existed standing*. The word كَانَ therefore denotes the existence of an *event absolutely*, which is *qualified* by subjoining its Attribute, and the Attribute is significant of a *particular event*, as occurring in time absolute, which is restricted to a *particular time*, by the word كَانَ.”

Harris uses almost the same words upon the same subject. “Now all *EXISTENCE* is either Absolute or qualified.—*Absolute*, as when we say B is; *Qualified*, as when we say, B is an *Animal*, B is *Black*, is *Round*, &c. With respect to this difference, the Verb (is) can by itself

6. The *twelfth* is مَا دَامَ and is used for the purpose of indicating a temporary relation between two events, the time or duration of the first of which it limits or restricts to the duration of the second. It must therefore necessarily be preceded by either a Verbal or a Nominal Sentence, as

إِجْلِسْ مَا دَامَ زَيْدٌ جَالِسًا Sit while Zued is sitting.

زَيْدٌ قَائِمٌ مَا دَامَ أَمْرٌ قَائِمًا Zued is standing as long as Amr is standing.

### Annotation.

express *Absolute Existence*, but never the *Qualified*, without subjoining the particular form, because the forms of existence being in number infinite, if the particular form be not expressed, we cannot know which is intended." He then goes on to remark, "that when (*is*) only serves to subjoin some such form, it has little more force than that of a mere assertion," and further on.—"As to EXISTENCE in general, it is either *Mutable*, (مُمْكِنٌ لَا نَقْطَاعَ) or *Immutable* (مُمْكِنٌ لَا نَقْطَاعَ); *Mutable*, as in the *Objects of Sensation*; *Immutable*, as in the *Objects of Intellection and Science*. Now *Mutable Objects* exist all in *Time*, and admit the several distinctions of *Present*, *Past*, and *Future*: But *Immutable Objects* know no such distinctions, but rather stand opposed to all things temporary.

And hence two different significations of the Substantive Verb (*is*), according as it denotes *Mutable* or *Immutable* being.

For example, if we say, *this orange is ripe*, (*is*) meaneth, *that it existeth so now at this Present*, in Opposition to *Past Time*, when it was green, and to *Future Time* when it will be rotten.

But if we say, *the Diameter of the square is commensurable with its side*, we do not intend by (*is*) that it is commensurable *now*, having been *formerly* commensurable or being to become so *hereafter*; on the contrary we intend that *perfection of existence*, to which *time* and *its distinctions* are uttered unknown. It is under the same meaning we employ this Verb, when we say, *TRUTH is*, or *God is*. The opposition is not of *time present to other times*, but of *necessary existence to all temporary existence whatever*."

Hermes p. 92.

As my object in producing these extracts is merely to explain and illustrate the doctrine of the Arabian Grammarians on the subject of *Imperfect* or *Defective Verbs*, I avoid as usual all discussion on the question of its merits or demerits.

7. The *thirteenth* is لَيْسَ and is used for the purpose of giving a negative signification to the Sentence in *present* time, though some Grammarians are of opinion that it is applicable to time in general, whether past, present or future, as,

لَيْسَ زَيْدٌ قَائِمًا Zued is not standing.

### Annotation.

Imperfect Verbs with respect to their government may be divided into two Classes, *First*, such as govern of themselves without any restriction or limitation, as لَيْسَ أَمْسِي أَصْحَى and *second*, such as possess a *conditional* government, or that require to be preceded by a Negative Particle either expressed or understood, as

#### EXPRESSED.

مَا زَالَ زَيْدٌ قَائِمًا } Zued did not cease to continue standing, in other words,  
he continued always standing.

#### UNDERSTOOD.

قَالُوا تَاللَّهِ تَفْتَوُتْ ذِكْرَ يَوْسُفَ حَتَّى تَكُونَ } "They said (i. e. the sons of Jacob) by God thou wilt  
حَرَضًا أَوْ تَكُونَ مِنَ الْهَالِكِينَ } not cease to remember Joseph, until thou be brought to  
death's door, or thou be destroyed by affliction."

Or by لَا إِلَهَ إِلَّا اللَّهُ or the Prohibitive لَا which is considered equivalent to a Negative Particle, as

لَا تَزَلْ قَائِمًا } Do not cease to continue standing, or continue always  
standing.

And lastly when they are used in the sense of supplication or prayer, as :

لَا يَزَالُ اللَّهُ مُجَسِّنًا إِلَيْكَ May God always continue beneficent to you.

To which must be added the Verb دَامَ preceded by the Infinitive مَا or the مَا termed *Surfeea*, as,

أَعْطَا دَامَتْ مُصِيبًا دَرَهْمًا } As long as you continue to receive wealth, continue to  
bestow it.

T t

The PREDICATES of these Verbs, may precede their Substantive Nouns in the order of construction, without effecting any change in the government, as

كَانَ قَائِمًا زَيْدٌ      Zued was standing.

And so of the rest.

The whole of the Imperfect Verbs, with the exception of لَيْسَ and those Verbs to which مَا is prefixed, may themselves be preceded by their Predicates; but other

کَانَ is elegantly used as an Expletive, as

وَأَدَّتْ فَاطِمَةُ بْنُتُ الْخُرْشَبِ الْكِبَاةَ لَمْ يُوْجَدْ كَانَ مِنْهُمْ

‘ Fatima the daughter of Khoorshoob brought forth (four) accomplished sons, the like of whom were never found.’ Alluding to the four companions of Nooman king of Hyra in Arabia, who were called قَيْسُ الْحِفَازِ ANOOS-OOL-FUWARIS; فَيْسُ الْغَوَارِسِ OOMMARUT-OOL-WUHAB; عِيَارَةُ الْوَهَّابِ KYS-OOL-HIFAZ, and رَبِيعُ الْكَامِلِ RUBEE-OOL-KAMIL.

2. It is used in a sense equivalent to the Pronoun termed by the Arabs ضَمِيرُ التَّشَانِ or the Pronoun of *distinction*, as كَانَ زَيْدٌ مُنْطَلِقٌ أَيَّ كَانَ هُوَ Zued was going. The Verb كَانَ in both instances possesses no government.

$O F$  صَا

The following seven Verbs are considered Synonymous with رَجَعَ أَضْ namely جَاءَ by Ibnool Hajib, as حَالَ اسْتَحَالَ عَادَ تَوَلَّى رَاحَ to which is added غَدَا and جَارَ what's become of your business? together with قَعَدَ أَيَّ شَيْءٍ صَارَتْ حَاجَتُكَ that is مَا جَارَتْ حَاجَتُكَ as in the following Sentence حَتَّىٰ قَعَدَتْ كَأَنَّهُا حَرْبَةٌ until it became as sharp as a spear. The last two Verbs, however very rarely occur in the sense of صَارَ and should not therefore be used as such.

0 F اَضْحَى اَضْحَى اَضْحَى

Of these Verbs there is nothing particular to be remarked, we may however encrease their number by adding **اِطَهَّرَ** 'he arrived at noon,' and **اَعْتَمَ** 'he arrived in the first watch of the night.'

Grammarians extend the privilege to the whole class of Imperfect Verbs, with the exception of *قَائِمًا كَانَ زَيْدٌ* as *مَا دَامَ*, Zued was standing.

But these Verbs, cannot be preceded by their Substantive Nouns, the noun being the AGENT, which can never take precedence of the Verb.

The government of the above Verbs in all their derivative forms is the same.

### Annotation.

*O F مَا زَالَ &c.*

These four Verbs are nearly or altogether Synonymous in signification, and as two Negatives in Arabic as well as in English and Latin make an Affirmative, they are always found in an Affirmative sense.

*O F مَا دَامَ*

*مَا دَامَ* is exactly Synonymous with *while*, *whilst*, or *as long as* and is always used between two sentences for the purpose of denoting the co-existence of two events, as explained and exemplified in the Text.

*O F لَيْسَ*

*لَيْسَ* as an Imperfect Verb is properly used (agreeably to the authority of the SHURHU ALFEEA) to represent *present time*, as *لَيْسَ زَيْدٌ قَائِمًا*, 'Zued is not standing now.' but when followed by a word expressive of a particular time, it may denote accordingly either past or future, as,

*لَيْسَ زَيْدٌ قَائِمًا امْسَ* Zued did not stand yesterday.

*لَيْسَ زَيْدٌ قَائِمًا غَدًا* Zued will not stand tomorrow.

It is probably compounded of the Negative Particle *لَا* and *أَيْسَ* denoting *existence*, as in the Language of the Arabian Logicians.

أُخْرِجَ الْعَالَمُ مِنَ الْإِيسِ إِلَى الْإَيْسِ

'The world came from *non-existence* into *existence*.' The Abbe Sicard in like manner derives

Annotation.

the Latin *Non* from *n* and *on*.—" *Non* est un mot composé de *n* and de *on*. La consonne *n* est l'expression naturelle du doute chez toutes les nations, parce que c'est le son que rend la touche nasale, quand l'homme incertain examine s'il fera ce qu'on lui demande; ainsi *Ne on*, *Ne ot*, *Ne ec*, *Ne il*, d'où l'on a fait, *Non*, *Not*, *Nec*, *Nil*." And thus in the old English, and Northern Dialects *nael* for *neazill*, or *will not*; *naes* for *nae is*, or *is not*; See Jamieson's Etymol. Dictionary. The whole Class of defective verbs will be found illustrated in the following story.

ABOOS SHIMUQMUQ was a humorist, but falling poor his wife was compelled to pass a whole night without any thing to eat. He went out therefore with the hope of procuring for her a little sustenance, but not succeeding he continued traversing the streets till he arrived at the great Mosque, which he entered and concealing himself in one of its angles, continued standing there till the whole congregation had retired, with the exception of the public Crier, who when night came on, began to pray, saying.—‘ O God at whose mighty will non-existence sprung into life, and by whose merciful kindness the poor and sorrowful are made happy.’—I am here my servant, ‘ cried Aboos Shimuqmuq,’ ask of me what thou requirest!’ the astonished Crier believing he had been honored with the holy conference formerly granted to Moses, replied ;—‘ O God ! thou certainly knowest that this thy servant hath always been obedient to thy will, and hath never ceased to confide to thee his wishes : he hath passed the day in such extreme hunger that his very bowels yearn again for food, bestow upon him then from thy infinite bounty one thousand Dirhums, which will supply his wants and provide sustenance for his family.’—O my servant ! cried Aboos Shimuqmuq, petition for something else, for I swear by my mighty power and dignity that my wife hath passed the whole night fasting, and although I searched every where to find a little bit of supper for her, I have not succeeded in procuring a mouthful, nor have I in my possession sufficient to keep her soul and body together !—The poor Crier ashamed of the trick played upon him, left the Mosque to Aboos Shimuqmuq and went off.

COMMENTARY.

## CLASS ELEVENTH.

The *eleventh* CLASS contains *four* VERBS, termed VERBS of PROPINQUITY (أَفْعَالُ الْمُتَارَبَةِ) being so called from their signification.

1. The first is عَسَى which admits of the *quiescent* تَا or *Tu* of the feminine gender, but is not otherwise (regularly) conjugated, neither is any Derivative formed from it. Its government is twofold.

*First.* It gives رَفْع or the sign of the Nominative Case to the Noun as its Agent, and نَصْب or the sign of the Objective Case to the Predicate, which Predicate is a Verb in the Aorist Tense in construction with اِنْ and in this combination the Verb عَسَى is always Synonyms with قَارَبَ.

### EXAMPLE.

عَسَى زَيْدٌ اِنْ يَخْرُجَ      Zued hastened to come out.

### Annotation.

To the Verbs of this Class generally termed from their signification, Verbs of Propinquity, Grammarians have added several others, which though nearly synonymous in point of sense, are yet sufficiently distinct in application to warrant their arrangement into the following classes or divisions.

1. Verbs of Propinquity properly so called, viz.

اَوْشَكَ كَرَبَ كَادَ

2. Verbs denoting hope or expectation, or implying confidence in some future event, viz.

اِخْلَوْلَفَ حَرَى عَسَى

3. Verbs denoting the commencement of an action, or *Inceptives*, viz.

اَنْشَأَ عَلَتَ اَخَذَ طَفَتَ جَعَلَ

In which example زيد is put in the Nominative, as the Noun or Agent of عَسَى and أَنْ يَخْرُجَ is substituted for the Accusative or Objective Case, as its Predicate. The sense of the Sentence will therefore be.

قَارَبَ زَيْدٌ الْخُرُوجَ Zued accelerated his egress.

The Predicate of عَسَى agrees with its Noun or Agent in Gender and number.

EXAMPLE.

عَسَى الزَّيْدَانِ أَنْ يَقُومَا The two Zueds hastened to stand.

عَسَى الزَّيْدُونَ أَنْ يَقُومُوا (All) the Zueds, &c. to stand,

عَسَتْ هِنْدٌ أَنْ تَقُومَ Hinda hastened to &c.

عَسَتِ الْهِنْدَانِ أَنْ تَقُومَا The two Hindas hastened to &c.

عَسَتِ الْهِنْدَاتُ أَنْ يَقُومْنَ (All) the Hindas hastened to &c.

Annotation.

By this classification as laid down in the Commentary upon the ALFEEA, the Verb عَسَى appears is excluded from the Verbs of Propinquity, contrary to the doctrine in the Text; the grounds upon which this exclusion is founded are the following:

It is supposed by the Grammarian زَاهِدٌ, ZAHID to be a Particle Synonymous with لَعَلَّ. RUZEE thinks its proper signification is *hope* or *expectation*, to which SEEBUWEH adds *pity* and *fear*, as عَسَيْتُ أَنْ أَمُوتَ 'I fear I shall die, or I fear am about to die.'

And agreeably to the authority of the SHUAH it denotes *certainty*, as in the following example from the Qooran:

كُتِبَ عَلَيْكُمُ الْقِتَالُ وَهُوَ كُرْهٌ لَّكُمْ وَعَسَى أَنْ

تَكْرَهُوا شَيْئًا وَهُوَ خَيْرٌ لَّكُمْ وَعَسَى أَنْ تُحِبُّوا

شَيْئًا وَهُوَ شَرٌّ لَّكُمْ وَاللَّهُ يَعْلَمُ وَأَنْتُمْ لَا تَعْلَمُونَ

# تنسيق وإعادة رفع زيد العامري الرفاعي

## COMMENTARY.

*Second.* The Verb عَسَى in its second application gives رَفَع or the sign of the Nominative Case, to a Verb in the Aorist Tense in construction with أَنْ which is substituted for, or put in the place of the Nominative, as the Noun of عَسَى and is then Synonymous with قَرَبَ.

### EXAMPLE.

عَسَى أَنْ يَخْرُجَ زَيْدٌ      The coming out of Zued was near, or  
أَيُّ قَرَبٍ خَرُوجُهُ      He was on the point of coming out.

### Annotation.

Maracci however renders it here *fortasse* which is copied by Sale. “ War is enjoined you against the infidels, but this is hateful unto you: yet *perchance* you hate a thing which is better for you, and *perchance* you love a thing which is worse for you, but God knoweth and you know not.” Sale.

The Predicate of عَسَى is restricted in the Text to a Verb in the Aorist Tense with the Particle أَنْ but although this appears to be the general practice of the Language, there are some instances noticed by Grammarians in which the Predicate is a Noun, as لَا تَلْحَنِي أَنِّي عَسَيْتُ صَائِبًا ‘Do not censure me for I am about to practice abstinence.’ SEEBUWEN is of opinion that the Aorist of عَسَى should never be accompanied by أَنْ as that Particle is known to bestow on the Verb the sense of the Infinitive, which becoming then an abstract term, cannot with propriety be predicated of its Substantive Noun. This doctrine seems conformable to that of Locke, who says that, “all our affirmations are only inconcrete, which is the affirming not one abstract idea to be another, but one abstract idea to be joined to another”— we can say a man is *white*, but we cannot say a man is *whiteness*, unless in a figure of speech. But some believe, that when it does occur in this form it is always by an ellipsis of some governing word, such as حَال or شَأْن and other Grammarians account for it by supposing it to be then redundant.

عَسَى is regularly conjugated in the Past Tense, and its medial radical in the second persons is occasionally marked *kusra*, as, عَسَيْتَ عَسَيْتُمَا عَسَيْتُمْ both masculine and feminine.—Some think it is used in the Aorist, but I am aware of no example and shall not therefore insert the opinions of Grammarians on the subject.

In which case there is no necessity for the introduction of a Predicate, in opposition to its first application where the sense would otherwise remain imperfect.

In its first combination it is therefore termed IMPERFECT, and in its second PERFECT.

2. The second is كَانَ which governs the NOUN or AGENT in the NOMINATIVE, and the PREDICATE in the Accusative or OBJECTIVE Case, which Predicate is generally a Verb in the Aorist Tense without أَنْ though it sometimes admits of أَنْ likewise, in consequence of its resemblance to عَسَى.

EXAMPLE.

كَانَ زَيْدٌ يَجْعَلُ } Zued hastened his coming, or advanced it to  
the last point.

Annotation.

كَادَ.

كَادَ In its original signification is Synonymous with قَرِبَ though it cannot be used alone as such, as كَادَ زَيْدٌ. Its medial radical may be either YA as كَادَ يَكَادُ كَدْتُ or WA as كَادَ يَكْوَدُ but Grammarians in general seem inclined to think it the former. The following example from the Hureeree will illustrate its general force.

فَزَفَرْنَا قُرَّةَ الْغَيْظِ وَكَادَ يَتَهَيَّأُ مِنَ الْغَيْظِ

He exhaled a storm of passion fiery as the summer blast,  
And was almost bursting with very rage!

كَرَبَ.

كَرَبَ With its medial radical marked *Fulha*, and sometimes *Kusruh*, is also Synonymous with قَرِبَ as in the following examples :

كَرَبَتْ حَيَاةُ النَّارِ } The fire was near being extinguished.

كَرَبَتِ الشَّمْسُ } The sun was nearly set.

W w

In which example زَيْدٌ is put in the Nominative Case, as the Noun of كَانَ and يَجِيئُ is substituted for, or put in the place of the Objective as its Predicate; The sense of the Sentence is therefore.

قَارَبَ زَيْدٌ مَجِيئًا Zued accelerated his approach.

The same rules that are applicable to كَانَ are equally applicable to its Derivative formations.

#### EXAMPLE.

لَمْ يَكَدْ زَيْدٌ يَجِيئُ Zued did not hasten his approach:

Grammarians differ considerably among themselves, with regard to the sense of كَادَ when preceded by a Negative Particle, some maintaining and with propriety, that it bestows on the Verb a Negative signification, and others asserting that it has no such force, the sense of the Verb remaining unaffected as before; while others believe that the Particle is redundant before كَادَ in the Past Tense, but preserves its signification in the Future.

#### Annotation.

أَوْشَكَ.

أَوْشَكَ فَلَانٌ Was originally Synonymous with أَسْرَعَ and is still to used in this sense, as أَوْشَكَ فَلَانٌ 'such a-person hastened his march;' agreeably to the authority of the Commentator on the ALFEEA it is used like عَسَى either as a Perfect or Imperfect Verb. It is conjugated like كَادَ but the Grammarian أَصْبَغِي says, it never occurs in the Past Tense as given in the Text, but in the AORIST, يَوْشَكَ which however is rejected in the Alfeea on the authority of KHULEEL.

Under the general head of VERBS of PROPINQUITY, (besides those enumerated in the Commentary above,) may be mentioned the following, namely,

حَرَى إِخْلَوْلَتْ أَوْلَى هَلْهَلْ أَنْشَأَ أَقْبَلَ قَرَّبَ هَبَّ عَلَفَ

3. The third is كَرَبَ which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is invariably the Aorist Tense of a Verb without أَنْ as:

كَرَبَ زَيْدٌ يَخْرُجُ Zued was near coming out.

4. The fourth is أَوْشَكَ which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is a Verb in the Aorist Tense with or without أَنْ.

EXAMPLE.

أَوْشَكَ زَيْدٌ أَنْ يَجِيئَ } Zued expedited his coming.  
أَوْشَكَ زَيْدٌ يَجِيئُ }

Some Grammarians make out seven Verbs of Propinquity, adding to the four abovementioned the following three, namely طَفِعَ جَعَلَ أَخَذَ which are altogether Synonymous with كَرَبَ in sense and application.

Annotation.

The Commentator on the Alfeea makes حَرَىٰ Synonymous with عَسَىٰ in the sense of *hope* or *expectation*, but its predicate must always be an Aorist with the Particle أَنْ as, حَرَىٰ زَيْدٌ أَنْ يَقُومَ Perhaps or it is to be hoped that Zued will rise.

The above rules are precisely applicable to اِخْلَوَاتِ السَّمَاءِ أَنْ تَهْطَرَ as, اِخْلَوَاتِ السَّمَاءِ The Heavens were about to descend in rain.

أَوَّلَىٰ زَيْدٌ أَنْ يَزِيدَ عَلَى ثَلَاثٍ as, قَارَبَ Is supposed by Ruzee to be Synonymous with أَوَّلَىٰ Zued was on the point of encreasing his gift of three (Ruppes!) Its predicate must be accompanied with أَنْ.

هَلْهَلَّ Is used in the sense of كَادَ as,

هَلْهَلَّ يَقُومُ He was on the point of rising, or he was very near rising.

The Aorist of this Verb does not require to be accompanied with أَنْ. The Verbs of this Class are included in the following little story.

 فَقَالَ لَهُ خَلِيفَتُهُ مَا فَعَلَ اللَّهُ بِسُلْطَانِ عَقْلِكَ وَصَبْرِكَ فَقَدْ أَوْشَكَ جَسَدُكَ

## S T O R Y .

A certain religious man was so deeply affected with the love of a King's daughter, that he was brought to the very point of death. His disciple said to him one day, what has the Almighty done with the king of your understanding and patience, for your body seems almost reduced to a mere shadow? Ah my child said the devotee, I subdued my feelings till my very heart was nearly breaking, and practiced patience to the utmost stretch of my power, but when the army of love invaded me, the king of my understanding was put to flight, and I could hold out no longer: he then wept and repeated the following lines:

The jeerer was keen with his joke,  
 And eager to mock my despair;  
 But he saw my heart almost was broke,  
 And he sought but to soften my care.

Then may heaven my mistress defend,  
Though still she my vows should disdain;  
Though her cruelty hasten my end,  
And my heart break indeed with its pain.\*

CLASS TWELFTH.

The *twelfth* CLASS contains *four* Verbs termed أَفْعُلُ الْمُنْجِ وَالنَّعَم or VERBS of PRAISE and CENSURE.

1. Of these the first is نَعِم originally نَعِم with the first letter marked *Futha*, and the second *Kusra*: the *Futha* is changed into *Kusra* to coincide with

Annotation.

OF نَعِم AND يَسْ

As نَعِم and يَسْ assume *Ta* or the mark of the Feminine Gender, they are generally considered as Verbs, but certain Grammarians of the schools of Keofuh will have them Nouns because they are occasionally found in construction with a Preposition, as

نَعِمَ السَّيْرُ عَلَى يَسِّ الْغَيْرِ A good girth (perhaps a bridle is necessary) on a bad ass.

مَا هِيَ بِنَعِمِ الْهَوَلُودَةِ How good a daughter is this that is born!

\* Or literally,

The censurers were *eager* to censure me;  
But when my heart from excess of love was *ready* to break;  
My very censurers *hastened* to console me;  
Then preserve O God the life of my beloved!

There is something pretty if not elegant in the original of this verse, but its spirit I fear is too subtle for transfusion into our idiom. In a literal translation the repetition of the word *censurers* appears harsh and unpleasing, and the strange unconnected wish at the close not very suitable to the complaint expressed in the three first lines, though dilated into a quatrain. As a curious example whoever of the four Verbs under discussion it deserves to be remembered.

## COMMENTARY.

the Vowel mark of the second letter, which is then rendered quiescent to lighten or facilitate the pronunciation leaving نَعَمْ which is a VERB of PRAISE.

The Agent (فَاعِل) of the Verb نَعَمْ is sometimes a general term (الْإِسْمُ الْجِنْسُ) made definite by the Article أَلْ .

### EXAMPLE.

نَعَمْ الرَّجُلُ زَيْدٌ    Zued was a good man.

The word الرَّجُلُ is here مَرْفُوعٌ or in the Nominative Case, as the Agent of نَعَمْ. ZUED (زَيْدٌ) is the Noun PARTICULARISED BY PRAISE (مَخْصُوصٌ بِإِذْحٍ) and being the SUBJECT of the Proposition is also in the Nominative Case; and نَعَمْ الرَّجُلُ the PREDICATE, preceding it in the order of construction.

Or ZUED may be in the Nominative Case as the PREDICATE, the SUBJECT of the Proposition being a Pronoun understood; the order will then be.

نَعَمْ الرَّجُلُ هُوَ زَيْدٌ    He was a good man namely Zued.

The Proposition by the first analysis consisting of one, and by the second of two Sentences.

The Agent of نَعَمْ is sometimes a Noun connected in the relation of the Aorist Case with another Noun made definite by the Article أَلْ .

### EXAMPLE.

نَعَمْ صَاحِبُ الْفَرَسِ زَيْدٌ    Zued the owner of the horse is a good man.

### Annotation.

They both occur under the following forms, namely نَعَمْ نَعَمْ نَعَمْ and نَعَمْ نَعَمْ نَعَمْ but the first is the original one. The two first forms are used by the tribe of Bunoo Tumeem, and the second more frequently than the rest when employed to denote praise or censure. This distinction agreeably to the authority of Mooburrud and Seebuweh is observed by the Arabs in general.

And sometimes a Pronoun concealed rendered <sup>هو</sup>مُهَيَّز by an indefinite Noun in the Objective Case.

EXAMPLE.

نَعَمْ رَجُلًا زَيْدٌ How good was (he) the man Zued.

The concealed Pronoun in such instances refers simply to an object in the mind termed, (مَعْنُونٌ ذِي هُنًى).

The Noun PARTICULARIZED by PRAISE (الْمُخْصُوصُ) is sometimes omitted in the Sentence if the defect can be supplied by the context.

EXAMPLE.

نَعَمْ الْعَبْدُ أَيُّ أَيُّوبَ How good a servant was he, namely Job!

The verse of the Qooran from which the example is taken being in praise of Job.

The Noun PARTICULARIZED by PRAISE and the AGENT must agree in gender and number

EXAMPLES.

نَعَمْ الرَّجُلُ زَيْدٌ Zued was a good man.

نَعَمْ الرَّجُلَانِ زَيْدَانِ The two Zueds were good men.

نَعَمْ الرِّجَالُ زَيْدُونَ All the Zueds were good men.

Annotation.

The Nouns PARTICULARIZED by PRAISE or CENSURE sometimes though rarely precede their Verbs, as <sup>هو</sup>زَيْدٌ نَعَمْ الرَّجُلُ 'Zued is a good man.' <sup>هو</sup>عَمْرُو بْنُ مَسْأَلَةَ 'Amr is a bad man.' The Agent in such cases is rendered definite by the Article *Al* though sometimes the Pronoun is concealed and made <sup>هو</sup>مُهَيَّز by an indefinite noun, as in the following example,

نُعِبَتِ الْمَرْأَةُ هِنْدٌ Hinda was a good woman.

نُعِبَتِ الْمَرْءَتَانِ هِنْدَانِ The two Hindas were good women.

نُعِبَتِ النِّسَاءُ هِنْدَاتٌ All the Hindas were good women.

2. The second is **بُئِسَ** a VERB of CENSURE; originally **بُئِسَ** like **عَلِمَ** (on the third conjugation of trilateral radicals.) The *Futha* of the first letter is changed into *Kusra* to coincide with the vowel point of the second, which is afterwards rendered quiescent in order to lighten or facilitate the articulation. The various rules applicable to the AGENT of this Verb in construction, as well as to its **مَخْصُوصٌ بِالذِّمِّ** or Noun PARTICULARIZED by CENSURE, are precisely the same as those already recorded of the Agent and **نَعِمَ** of **مَخْصُوصٌ**.

#### EXAMPLES.

بُئِسَ الرَّجُلُ زَيْدٌ Zued was a bad man.

بُئِسَ صَاحِبُ الْفَرَسِ زَيْدٌ Zued the owner of the horse was a bad man.

#### Annotation.

أَبُو مُوسَى جَدُّكَ نَعِمٌ جَدًّا

وَشَيْخُ الْكَحِّي خَالُكَ نَعِمٌ خَالَ

Aboo-Moosa is your grandfather, how excellent a grandfather!

And Shuekh-ool-Ilueya your uncle, how excellent an uncle!

These Verbs assume occasionally the Particle **مَا** as an affix, as **نَعِمَ مَا**; **بُئِسَ مَا** which Particle sometimes coalesces with **نَعِمَ** as in the following examples from the Qooran.

إِنْ تَبْدُوا الصَّدَقَاتِ فَنِعِمَّا هِيَ If you give your alms openly it is good.

بُئْسَ مَا اشْتَرَوْا بِهِ أَنْفُسَهُمْ It is a bad thing for which they have sold their Souls.

- بُدْسَ رَجُلًا زَيْدٌ      Zued was a bad man.  
 بُدْسَ الرَّجُلَانِ زَيْدَانِ      The two Zueds were bad men.  
 بُدْسَ الرِّجَالِ زَيْدُونَ      All the Zueds were bad men.  
 بُدْسَتِ امْرَأَةٌ هِنْدٌ      Hinda was a bad woman.  
 بُدْسَتِ الْمَرَاتِنِ هِنْدَانِ      The two Hindas were bad women.  
 بُدْسَتِ النِّسَاءِ هِنْدَاتُ      All the Hindas were bad women.

3. The third is سَامَ and is in every respect synonymous with بُدْسَ.

4. The fourth is حَبَّ with دَا affixed, the first letter being marked either *Fulha* or *Summa*; originally حَبُّ with the second letter *Muzmoom*, which being afterwards rendered quiescent the two homogeneous letters coalesce under the sign Idgham. This rule is applicable to حَبَّ with its first letter *Muftookh*, but if *Muzmoom*, the Vowel point *Zumma* is transferred to the second letter, and the two homogeneous letters coalesce as before.

### Annotation.

O F سَامَ A N D حَبَّ دَا.

I have nothing particular to offer regarding these words. سَامَ is supposed by some to be derived from سَوَّ originally سَوَّ the *Wao* being changed into *Alif* by a common rule of permutation. It is precisely synonymous with بُدْسَ as observed in the Commentary. حَبَّ دَا is sometimes preceded by the Vocative Particle يَا denoting surprise or admiration, as in the following example from the 3d Muqam of Hureerce in praise of a gold coin.

يَا حَبِّدَا نَضَارًا وَنَضْرَةً      وَحَبِّدَا نَخْنَاةً وَنَضْرَةً

O how admirable is its metal, how fascinating its splendor!  
 How delightfully it enriches, how potently it assists us!

## COMMENTARY.

The Verb **حَبَّ** is never separated in practice from **ذَا** and is therefore written **حَبَّذَا**. It is Synonymous with **نَعَمَ** and its Agent is **ذَا** followed by its **مَخْصُوصٌ بِالْمَدْحِ** or Noun PARTICULARIZED by PRAISE.

The CONSTRUCTION (**إِعْرَاب**) of the **مَخْصُوصٌ** of this Verb is the same as that of **نَعَمَ** in both of the cases already detailed, but its Agent and Noun PARTICULARIZED by PRAISE, do not necessarily agree in gender and number.

### EXAMPLES.

حَبَّذَا زَيْدٌ	Sing. mas.	} O excellent Zued!
حَبَّذَا زَيْدَانِ	Dual mas.	
حَبَّذَا زَيْدُونَ	Plural mas.	
حَبَّذَا هِنْدٌ	Sing. fem.	
حَبَّذَا هِنْدَانِ	Dual fem.	
حَبَّذَا هِنْدَاتُ	Plur. fem.	

### Annotation.

The concealed Pronoun mentioned in the Text as the Agent of the three first Verbs of Praise and censure answers in all such cases to the Pronoun *it* in English, and is therefore rendered **مِمَّنْ** in Arabic by a Noun in the Objective Case. The phrase **نَعَمَ رَجُلًا زَيْدٌ** therefore resolves itself thus, **نَعَمَ** 'It was good.' What was good?—'The man (**رَجُلًا**) Zued.' As opposed to a Pronoun *expressed*, it is called *concealed* or *implied*, and its reference being to some object presented merely to the intellect for the *first time*, in opposition to the other Pronouns which *verbally* refer to an object perceived before, its relation is properly termed by the Arabs **مَعْنَوِيٌّ** **ذَهْنِيٌّ** which seems to agree with the remark of Apollonius as quoted by Harris, "*That some indications are o cular, and some are mental.*" *τὰς μὲν τῇ ὁφειν εἶναι δείξεις, τὰς δὲ τῷ νῷ*, De Syntaxi, S. II. c. 3, p. 104. See Hermes, p. 77.

The **مُخْصُوص** or Noun PARTICULARIZED by PRAISE, may be either preceded or followed by a Noun agreeing with it in gender and number, and in the Objective Case as the **تَهْمِينُ** or **حَال**.

EXAMPLES.

حَبْدًا رَجُلًا زَيْدٌ What an excellent man is Zued!

حَبْدًا زَيْدٌ رَاكِبًا What an excellent horseman is Zued!

Annotation.

The Verbs of this Class are included in the following little Story.

حِكَايَةٌ

تَوَحَّشَتْ زَوْجَةٌ فَقِيهٌ بِخَيْلٍ عَلَى السَّيِّكِ وَأَخْبَرَتْ بِذَلِكَ زَوْجَهَا

COMMENTARY.

مَعْرِفُ السَّيِّئِ أَنْتَ يَا رَجُلُ إِنْ كُنْتَ تَذُمَّهُ أَمْسَ فَكَيْفَ تَبْدَحُهُ الْيَوْمَ

زَوْجَتُهُ مِنْ خَطَايَاهُمْ وَتَعَجَّبَتْ مِنْ سُرْعَةِ جَوَابِهِ \*

STORY

The wife of a niggardly attorney happened to be seized with a longing after fish, and expressed her desire one day to her husband. O what execrable food said the attorney is fish, and how vile a thing is fish for food! for its F is *fatality*; its I *insipidity*; its S *sickness*, and its H *horror*! The good woman however was determined to satisfy her longing, and accordingly having pawned her earring unknown to him, purchased some fish, but in the very act of enjoying it, who pops in upon her but old Pinchpenny, who seeing her eating cried out— what is that you are eating my dear! Nothing but a little fish replied the wife, which a neighbour woman has sent me! Oh ho! cried Muckworm, then allow me to join your mess immediately, for most excellent food is fish, and fish is truly excellent for food, for its F is *fatness*; its I *impletion*; its S *salubrity* and its H *hilarity*.\* What a vile describer of fish you are said his wife, for yesterday you abused it and now again you are praising it. Nay my dear said the attorney I am an admirable definer of fish, for I divide it into two classes. One that is purchased with money, and this I hold to be the bad class: the other that is got gratuitously and this I consider the good class. His wife laughed at his answer and was surprised at the readiness of his reply.

\* Or agreeably to the original word سَيِّئِ its first letter is *poison*, its second *sickness*, and its third *affliction*; and again, its 1st is *fatness*, its 2d *enjoyment* and its 3d *competency*.

CLASS THIRTEENTH.

The *thirteenth* class contains *seven* Verbs termed, أَفْعَالُ الْعُلُوبِ or VERBS of the MIND, and are so called because they have their source in the mind and come not under the cognizance of the senses. They are also called Verbs of DOUBT and CERTAINTY, some of them denoting doubt and some certainty, and precede a Sentence consisting of a subject and predicate to both of which they give نَصْب or govern them in the Objective Case as double Objects.

Annotation.

It must be obvious that under the head of أَفْعَالُ الْعُلُوبِ (which signify literally ACTIONS of the SOUL with reference to the understanding, and grammatically VERBS denoting the operations of the mind or intellect) may be included a variety of other kindred Verbs besides those recorded in the Commentary; for ACTION which is here meant *spiritual action*, being a GENUS, necessarily embraces all the various operations of the mind, and as these operations of the mind or modes of thinking, are but different kinds or species of the same genus, the verbs expressive of these actions must partake of one common character as to sense, and might therefore be expected to fall under one common rule of government. This has not escaped the notice of the Arabian Grammarians who, in some of their larger works, have discussed the subject with great ingenuity and have enumerated a variety of Verbs possessing a similar government to those recorded in the text; but as their arguments are very diffuse and scattered through many parts of their works, I shall save myself the trouble of collecting and translating them, and endeavour to supply the defect by presenting the reader with a short extract from the celebrated Essay of Bishop Wilkins towards a real character, and Philosophical Language, which containing a very precise view of the different ACTIONS of the UNDERSTANDING (أَفْعَالُ الْعُلُوبِ) may not be deemed inapplicable to the Class of Verbs now under discussion.

ACTION as a Predicament he divides into four kinds.

I. SPIRITUAL. II. CORPOREAL. III. MOTION. IV. OPERATION.

The genus of SPIRITUAL ACTIONS he divides into two Classes, those that belong to God by which are meant only his *transient* actions which are terminated in the creatures, such as *creation*,

Three of them denote doubt,

Three certainty,

And One sometimes doubt and sometimes certainty.

The three first or those denoting doubt, are,

خَلْتُ ; ظَنَنْتُ ; حَسِبْتُ

EXAMPLE.

حَسِبْتُ زَيْدًا قَائِمًا I conceived Zued was standing.

ظَنَنْتُ عَمْرًا فَاضِلًا I imagined Amr was eminent.

خَلْتُ بُكْرًا قَاعِدًا I supposed Bukr was sitting.

Annotation.

annihilation, blessing, cursing, preservation, revelation, inspiration, redemption, &c. &c. and secondly,

“ ACTIONS of the UNDERSTANDING and judgment SPECULATIVE, *Contemplation, Theory*, are such as do concern the various exercise of our understandings about the truth and falshood of things, with respect either to

    - DISCOVERY ; detect, find, perceive, sift out, pick out, invention, excogitate, author, inventor, tell, inkling : 'tis out.
- Judgment ;

The Verb ظَنَنْتُ however if derived from ظَنَنَ suspicion or accusation does not require a second Object or Acusative.

EXAMPLE.

ظَنَنْتُ زَيْدًا أَيَّ إِهْمَتِهِ I accused Zued or suspected him.

Annotation.

The Section is continued with an enumeration of the ACTIONS of the understanding and judgment PRACTICAL, and the Actions of the WILL, with these also of the sensitive part or the Fancy, which are properly styled PASSIONS, but the whole would require too much space and the above extract may be deemed sufficient to illustrate the nature and division of words significant of the distinct operations of the mind, or of spiritual or intellectual Ideas.

The other three Verbs or those denoting certainty, are

وَجَدْتُ ; عَلِمْتُ ; رَأَيْتُ

EXAMPLES.

- رَأَيْتُ عَمْرًا كَرِيمًا I perceived that Amr was generous.  
عَلِمْتُ زَيْدًا أَمِينًا I knew that Zued was faithful.  
وَجَدْتُ الْبَيْتَ رَهُونًا I found the house mortgaged.

Annotation.

That there are many Verbs of this Class besides those recorded in the Commentary, the following will demonstrate.

1. دَرَيْتُ بِكَوْرٍ صَاحِبِكَ, He knew, as, دَرَيْتُ I knew that Bukr was your companion.
2. تَعْلَمُ Know for certain, as,

تَعْلَمُ شَقَاؤَ النَّفْسِ قَهْرَ عَدُوِّهَا } Know that the preservation of the soul, is by subduing  
the passions.

3. اَلْفَى He found, as,

اَنَّهُمُ الْغَوَا اَبَا بَهُمْ ضَالِّينَ Verily they found their fathers who were lost.

Ruzee however remarks that the Verbs دَرَيْتُ when synonymous with عَلِمَ and تَعْلَمُ the Imperative synonymous with اَعْلَمْ do not govern two Objects in the Accusative Case, but require after them a Sentence preceded by the Particle اِنَّ as,

دَرَيْتُ اَنَّكَ قَائِمًا I knew that you were standing.

تَعْلَمُ اَنَّ بَعْدَ الْغِيِّ رَشْدًا Know assuredly that after error comes piety.

4. عَدَا He numbered or calculated, as,

وَلَا تَعْدُ دِ الْمَوْلَى شَرِيكَكَ فِي الْغِنَا } Do not reckon on God as your companion in affluence  
وَلَكِنَّمَا الْمَوْلَى شَرِيكَكَ فِي الْعَدَا } but in poverty and distress.

The Verb **رَأَيْتُ** is sometimes used to denote perception with the eye, as in the following sentence from the Qooran.

**فَانْظُرْ مَاذَا تَرَىٰ** } Consider therefore what thou *see'st*, or rather  
thinkest (I should do.)

**عَلِمْتُ** is sometimes used synonymously with **عَرَفْتُ** as,

**عَلِمْتُ زَيْدًا أَيْ عَرَفْتُهُ** I knew or recognized Zued.

### Annotation.

5. **حَكَّأَ** *He conjectured, &c. as,*

**حَكَّأْتُ زَيْدًا أَخَاكَ** I thought Zued was your brother.

6. **ظَنَّ** Synonymous, with **جَعَلَ**.

**وَجَعَلُوا الْمَلَائِكَةَ الَّذِينَ هُمْ عِبَادُ الرَّحْمَنِ إِنَاثًا** } They thought that the Angels who are the attendants  
of God were his daughters.

7. And some occur in this form as *Neuter Verbs*, as,

**فَكَرَّ زَيْدٌ** Zued thought.

8. Or merely transitive to *one* Object, as,

**كَرِهْتُ زَيْدًا** I abhorred or detested Zued.

There are many other Verbs besides the above which govern two Objects in the Accusative, but which for the sake of brevity I omit recording: the following however from their affinity to those under discussion may merit insertion:

1. **صَيَّرْتُ الطِّينَ خَزْفًا** as, **صَيَّرَ** I converted the clay into a pot.

2. **قَدْ مَرَّ إِلَىٰ مَا عَمِلُوا مِنْ عَمَلٍ - جَعَلَ** as, **فَجَعَلْنَاهُمْ هَبَاءً مُنْتَثَرًا** } We will come unto the work, which they shall have  
done, and make it as dust scattered abroad.

3. **هَبَّنِي اللَّهُ فَذَاكَ** as, **هَبَّ** God made me your Victim.

A a a

And وَجَدْتُ in the sense of أَصَبْتُ as,

وَجَدْتُ الضَّالَّةَ أَيَّ أَصَبْتُهَا I found or discovered the lost.

These three Verbs when used as above are transitive only to one Object or Accusative.

The Verb زَعَيْتُ is sometimes used to denote *doubt* and sometimes *certainly*, as,

1. زَعَيْتُ اللَّهَ غَفُورًا رَحِيمًا I believed that God was merciful and forgiving.
2. زَعَيْتُ الشَّيْطَانَ شُكُورًا I doubted whether the devil was a thanksgiver!

#### Annotation.

4. اتَّخَذَ اللَّهُ إِبْرَاهِيمَ خَلِيلًا as اتَّخَذَ The Lord made Abraham a friend.

5. لَوْ شِئْتَ لَتَّخَذْتَ عَلَيْهِمْ أَجْرًا as تَخَذَ } If you wished you would certainly have received a reward for it.\*

6. تَرَكْتُهُ صَدِيقًا لِنَفْسِي as تَرَكَ I made him my bosom friend.

7. رد as —————  
 قَدْ دَسَّعُوا رُءُوسَهُنَّ السُّودَ بَيَاضًا  
 وَرَدَّ وَجُوهَهُنَّ الْبَيْضَ سُدًّا

Time has changed their black locks into white,

And has turned their fair faces black.

The above seven Verbs are termed اَفْعَالُ التَّحْوِيلِ or Verbs of *conversion*.

Of the Verbs of *doubt* and *certainly* as recorded in the Text.

The Verbs ظَنَنْتُ and خَلَنْتُ حَسِبْتُ though generally used to denote *doubt* or *uncertainty* of mind, are supposed by the Author of the Commentary upon the ALFEEA to be used in the Sense of *certainly* also: Examples.

\* Qooran, C. 18.

The Verbs of this Class do not admit of the retrenchment of one of the two Objects in composition being but as one word, and the sense of both collectively forming as it were the مفعول به or Object of a transitive Verb, that is the radical sense of the *second* Object or its Infinitive, may be considered as connected with the *first* in the relation of the aorist case, as the sense of the sentence عَلِمْتُ زَيْدًا أَفْضَلَ resolves itself into عَلِمْتُ فَضْلَ زَيْدٍ 'I knew the excellence of Zued.' We cannot consequently reject one of them in composition, as the omission would be equal to that of rejecting a portion of a single word; which is not allowable.

Annotation.

حَسِبْتُ التَّقَى وَالْجُودَ خَيْرَ تِجَارَةٍ } I was sure that virtue and liberality were the best  
species of traffic.

خَلَيْتُ أَبَاكَ عَطُوفًا } I was confident that your father was benevolent.

ظَنُّوا أَنَّ لَا مَلْجَأَ مِنَ اللَّهِ إِلَّا إِلَيْهِ } They well knew that the only place of refuge was  
with God.

Or in the following Jeu d'esprit attributed to اسحق بن خلف

ON A VERY LITTLE MAN CALLED DAVID, WITH A VERY LARGE BEARD,

مَا شَيْتَ دَاوُدَ فَاسْتَضَحَكْتَ مِنْ عَجَبٍ

كَأَنَّهُ وَالِدٌ يَهْشِي بِهَوَاؤِهِ

مَا طَوَّلَ دَاوُدَ إِلَّا طَرْلَ لِحْيَتِهِ

وَوَظَنَ دَاوُدَ فِيهَا غَيْرَ مَزْجُودٍ

These lines are very ingeniously versified by Dr. Carlyle in his SPECIMENS OF ARABIAN POETRY, for the learned Professor has not only preserved the sense but the very spirit of the Epigram, by lengthening out his version to an extent as disproportionate to the original as little David's beard.

When these Verbs happen to intervene between their Objects, or when they follow them, their government may be optionally omitted.

EXAMPLES.

زَيْدٌ ظَنَنْتُ قَائِمٌ  
 زَيْدًا ظَنَنْتُ قَائِمًا  
 زَيْدٌ قَائِمٌ ظَنَنْتُ  
 زَيْدًا قَائِمًا ظَنَنْتُ

I believed Zued was standing.

Annotation.

1.

"How can thy chin that burden bear?  
 Is it all gravity to shock?  
 Is it to make the people stare?  
 And be thyself a laughing stock?"

2.

When I behold thy little feet,  
 After thy beard obsequious run,  
 I always fancy that I meet,  
 Some father followed by his son.

3.

A man like thee scarce e'er appear'd,  
 A beard like thine—Where shall we find it?  
 Surely thou cherishest thy beard,  
 In hopes to hide thyself behind it."

The Verb **رَأَى** is supposed to be used in the sense of *doubt* or *uncertainty* in the following example from the Qooran, as,

أَنَّهُمْ يَرَوْنَهُ بَعِيدًا  
 They suppose (the day of judgment) is distant.

It is used in a sense termed by the Arabian Grammarians **حُلْمٌ** to denote *vision in a dream* and requires after it two Objects in the Accusative, as in the following Sentence from the Qooran:

أَنِّي أَرَىٰ أَنِّي لَأَعْصِرُ خَمْرًا  
 It seemed unto me in my dream, that I pressed out wine  
 (from grapes.)

Their government therefore or non-government is equally proper, though some Grammarians are of opinion that when they intervene between their Objects, their government had better be preserved, but when they follow them, it had better be cancelled.

If to the Verbs <sup>رَأَيْتُ</sup> and <sup>عَلَيْتُ</sup> a *Humza* be prefixed, they become transitive to three Objects or Accusatives.

EXAMPLES.

أَعْلَيْتُ زَيْدًا عَمْرًا فَاضِلًا I made Zued know that Amr was excellent.

أَرَيْتُ عَمْرًا خَالِدًا عَمَلًا I shewed Amr that Khalid was wise.

Annotation.

Verbs of sense in Greek generally govern a genitive, but the Verb *ὁρῶμαι* like <sup>رَأَى</sup> in Arabic, requires an Accusative which Mr. Jones has endeavoured to account for philosophically in his Greek Grammar. See p. 275.

The example produced by the Commentator to prove that the Verb <sup>رَأَى</sup> is sometimes used to express *ocular* in opposition to *mental* vision, appears to me very singularly inapplicable. The entire passage from the Qooran is as follows:

قَالَ يَا بَنِيَّ إِنِّي آلَمْتُ فِي الْمَنَامِ أَنِّي أَذْبَحُكَ فَانْظُرْ  
مَاذَا تَرَى قَالَ يَا أَبَتِ افْعَلْ مَاذَا تُؤْمَرُ

He (Abraham) said, O my dear son, verily I saw in a dream, that I should slay thee as a sacrifice, consider therefore what *thou thinkest* I should do. He replied, O my Father do what thou art ordered to do. A word cannot surely be placed in a more unequivocal light than in the above Sentence: perhaps the Commentator intended to quote the preceding example, <sup>رَأَى فِي الْمَنَامِ</sup> which would have been less objectionable.

Another Object is therefore added to these Verbs by this *Humza* of increase, which possesses the property termed *تَضْيِيرٌ* (and is that by which the Agent or Nominative to a Verb puts the Object in possession of the sense of the radical.) The meaning therefore of the first example is *جَعَلْتُ زَيْدًا عَلِيًّا أَنْ يَعْلَمَ غَيْرًا* and of the second *جَعَلْتُ غَيْرًا عَلِيًّا أَنْ يَرَى خَالِدًا عَالِمًا* *فَأَضْلَلْتُ* This property is restricted by prescription to the above two Verbs, contrary to the authority of AKHIFUSH who bestows it upon the whole Class from their analogy to *عَلِمْتُ* as,

أَزْعَمْتُ أَوْجَدْتُ أَخْلْتُ أَحْسَبْتُ أَظَنَنْتُ

### Annotation.

The Grammarian RUZEE, makes *عَلِمَ* synonymous with *عَرَفَ* in every respect, and says the phrases *عَرَفْتُ أَنْ زَيْدًا قَائِمٌ* and *عَلِمْتُ أَنْ زَيْدًا قَائِمٌ* are precisely equivalent, but he acknowledges that *عَرَفَ* does not govern two Objects in the Accusative like *عَلِمَ*. HUSNAN however thinks there is no difference between them either in sense or construction.

The government of these Verbs is *suspended* but not destroyed, *first*, by the introduction of the Particle termed *لَا* as *ظَنَنْتُ لَزَيْدًا قَائِمًا* I imagined Zued was standing; *secondly* by the Negative Particle *لَا* as *رَأَيْتُ لَا قَائِمًا زَيْدًا* I saw Zued not standing; *thirdly* by the *Lam of swearing*, as, *عَلِمْتُ وَاللَّهِ لَقَائِمًا زَيْدًا* By God I knew that Zued was certainly standing; and *lastly* by the intervention of an Interrogative Particle, as,

*حَسِبْتُ أَوْ زَيْدًا قَائِمًا مَعَكَ أَمْ غَيْرًا* I doubted whether Zued was standing with you or Amr.

This suspension of government being caused by the immediate Agency of some word is termed by the Arabian grammarians *تَعْلِيلٌ* but that the government of the Verbs is not altogether destroyed by the construction they alledge the following argument as a proof; namely that if another Sentence follow the one to which the Particle is prefixed, the government will be preserved, as

*ظَنَنْتُ لَزَيْدًا قَائِمًا وَغَيْرًا مُنْطَبِحًا* I thought that Zued was standing and Amr going.

The following Verbs namely *أَنْبَأَ*; *أَخْبَرَ*; *خَبَّرَ* and *حَدَّثَ* are also transitive to three Objects.

Note, that it is not allowable to reject in composition the 1st OBJECT or ACCUSATIVE, nor either of the last two *separately*, but they may both be rejected together as already described. ♣

### Annotation.

The *أَفْعَالُ الْغُلُوبِ* are distinguished from other Verbs by the following peculiarity, namely that the Agent and Object with which they are connected, may be expressed by the conjunctive personal pronouns, and both be the same Individual, as *عَلِمْتُكَ* *I know myself*, *عَلِمْتَكَ* *Thou didst know thyself*; which form of construction cannot be applied to any other Class of Verbs such as *ضَرَبْتُكَ* for example, but if we wish to express the *reflective* sense, a distinct Noun must be introduced for the Object, as *ضَرَبْتُ نَفْسِي* *I struck myself*. In this particular respect the Greek seems to have an advantage over the Arabic, having a peculiar form of verbs in the middle voice to express this double relation independent of any adscititious Noun or Pronoun, as *ἐτυλόμην* *I struck myself*, &c.

The following Story will illustrate the use of the different verbs of this Class.

STORY.

A Merchant was going through a slave-market one day and happened to see a Broker holding a boy by the ear for sale, and calling out, who will purchase a youth accomplished, sensible, learned, and faithful, for one hundred Dirhums? Why my good Sir said the Merchant, I suspect you must be crazy, for if your boy possess the qualities you mention, he is worth a thousand Dirhums. O said the Broker you see him shining and take him for silver, but if you were acquainted with his failing you would probably find him copper. Pray what is his failing said the Merchant, and what do you think the cause of it? He tells every year said the Merchant a great lie and a little lie, and each of these I consider as a very serious evil. Pooh

pooh! said the Merchant, I look upon this as a mere trifle. He accordingly purchased the boy and took him into his service, and finding him expert and skilful in duty, placed him at the head of all his servants. But it happened sometime after, that the Merchant accompanied by some of his friends went out to his garden, and sent the boy home about sunset to bring him his ass, but the boy as soon as he approached his master's house rent his clothes, and threw dust upon his head, and exclaimed, O alas, alas, my master! the lord of my bounty!—the Merchant's wife concluded from his appearance that some misfortune had happened to him, and said, alas, boy, what is the meaning of this outcry? Ah! replied he, the roof of the house has fallen in upon my master and crushed him to pieces with all the other Merchants. The wives of the Merchants who happened to be invited there by the lady of the house, as soon as they heard the report of the slave beat their faces in despair, and began to run towards the garden, but the boy got before them and entered it tearing his clothes like a frantic person and throwing dust on his head, in the same manner as he had done before the women. The Merchants surprised at his appearance asked the cause of his distress. Ah! I believe he replied, a spark of fire escaped from the hands of one of the maid-servants and has set fire to your house, and I do not think there is a single child that has not been burned to death, nay not one even of the maid-servants nor one of your wives. The Merchants hearing this ran out all distracted, one weeping for his sister and wife, the other for the daughter of his relation, but when they got about half way home, both parties met on the road and every one saw his friend safe, and discovered that the whole was a trick played upon them by the lying valet. What has tempted you said his master to this act? Do you not know replied the boy that I was bound to tell you every year a great lie and a little one? Well said the Merchant and under what class must I place the present? Is this the large lie or the little one? O this is the little lie, replied the boy, the large one you shall have bye and bye! This little lie said the Merchant will answer my purpose.—I now give you your liberty, so set out, and find some other person of more consequence to practice your large lie upon.

OF THE GOVERNMENT TERMED قِيَاسِي OR ANALOGOUS.

The Class termed قِيَاسِي or ANALOGOUS contains seven GOVERNING POWERS.

FIRST ANALOGOUS GOVERNOR.

الْفِعْلُ الْمُطْلَقُ

Of the ANALOGOUS GOVERNORS the *first* is a VERB UNIVERSALLY, whether neuter or transitive, and in any tense past or aorist; for every Verb governs an AGENT in the Nominative, as قَامَ زَيْدٌ 'Zued stood.' ضَرَبَ زَيْدٌ 'Zued struck;' but if the Verb be transitive it governs an object in the accusative also, as ضَرَبَ زَيْدٌ عَمْرًا 'Zued struck Amr.'

The Agent can never precede the Verb in the order of construction but the Object may, as زَيْدٌ اضْرَبْتُ; nor can the Agent be omitted in composition, which is not the case with the Object which may be optionally omitted.

SECOND ANALOGOUS GOVERNOR.

الْمَصْدَرُ

The *second* is the INFINITIVE (الْمَصْدَرُ) which is defined to be the NAME of a MODE, (الْأَمْرُ حَدَثٌ) and is termed الْمَصْدَرُ or the SOURCE, being the source from which the Verb is conceived to flow.

Annotation.

The true Grammatical sense of the term حَدَثٌ as employed in the Definition of an Arabic Infinitive, is not easily conveyed by any one word in the English Language. Mr. Lumsden who well knew its true nature and force has rendered it *event*, and to his opinions on every important question of Arabic Science and general Grammar, the profoundest respect is justly due; but the word حَدَثٌ as

The Grammarians of Busrah call the **مَصْدَر** the ROOT or RADIX, from its absolute signification in itself, without reference to a Verb; and the **فِعْل** the BRANCH or STEM, because it is not independant in itself, but has reference to some Noun. On the other hand the Grammarians of Koofuk call the **فِعْل** the root, and the **مَصْدَر** the branch or derivative, because the rules of permutation to which the latter may be subjected, depend entirely on the permutations of the

### Annotation.

I shall endeavour to make appear, is a much more comprehensive term than *event*: it embraces all attributes when considered separately from the beings to which they are attributable; all essential and inward properties as well as outward respects and relations, and reaches to actions themselves as well as *manners* of actions.\* On the contrary the word *event* means little more strictly speaking, than the *end*, *conclusion* or *termination* of an affair, and this also is the precise Definition of it as given by Cicero; “*Eventus est alicujus exitus negotii.*”† May it not therefore be concluded that the word *event*, even in its most comprehensive acceptation, signifies rather the *effect* of action, than action itself, and that consequently it cannot be considered as a legitimate representative of **حَدَث** in the definition of an Arabic Infinitive?

This however is a question of too much importance to be hastily decided upon. It involves a very minute inquiry into the true nature and definition of the parts of speech, and if fully and satisfactorily conducted, into the general principles of universal Grammar. An analysis of this nature will not indeed be expected in the limited space allotted to a note, but a short view of the subject may be interesting, and this I purpose to submit.

My own opinion is that the most unexceptionable name for an Arabic Infinitive is a *MODE* or *manner of being*; I mean a mode in its philosophical acceptation as explained by Locke, and since adopted I believe by every writer on ontology. “*Modes* I call such complex ideas, which, however compounded contain not in them the supposition of subsisting by themselves, but are considered as dependences on, or affections of Substances; such as are ideas signified by the words triangle, gratitude, murder, &c.” But in order to justify the application of this term to an Arabic Infinitive, it may be necessary to enter into some detail.

\* See Watt's Def. of Mode.

† *De Div.* 51, C.

former when it happens to be a Verb of the INFIRM Class (مُعْتَلِّ) and if of the SOUND OR HEALTHY (صَحِيح) it continues SOUND also: example, قَامَ قِيَامًا\* the Musdur here قِيَام being originally قَوَام the WAO is charged into YA, because the same letter had before been permuted in the Verb قَام originally قَوْم: And in the phrase قَاوَمَ قَوَامًا the Infinitive قَوَام suffers no permutation, because the Verb قَاوَم being of the SOUND Class, is not subject to any rule of permutation.

### Annotation.

The word حَدَث in Arabic is precisely equivalent to the Hebrew חָדַש and means literally, *to become new*, and transitively as an augmented triliteral *to make new* or produce, 'أَخْدَعَهُ اللَّهُ تَعَالَى فَخَدَّثَ' 'God made new or created it and it was created,' in which sense its prototype is frequently found in the Bible נְחַדְשׁ שָׁמַיִלְכֶם 1. Sam. XI, 14. "Let us *renew* the kingdom there," or rather as I should think *make a new* kingdom, establish royalty there. This is the original sense of the word حَدَث which as applicable to an Arabic infinitive is explained as follows by the Grammarian Ruzee:

نَعْنِي بِالْحَدَثِ مَعْنَى قَائِمًا بِغَيْرِهِ سَوَاءً صَدَرَ مِنْهُ  
كَالضَرْبِ وَالْمَشْيِ أَوْ لَمْ يَصْدُرْ كَالطَّوْلِ وَالْقَصْرِ

"We mean by the word حَدَث a thing existing in or by some other thing, whether extrinsical as *beating* and *going*; or intrinsical as *extension* and *contraction*." If the reader will take the trouble to compare this with the definition of a *MODE* as given above by Locke, and of its various divisions as recorded by Watts in his Logic, he will find I think the term حَدَث and *mode* in every respect reciprocal.

Let us compare them in a few places. "The *very being* of a *Mode* depends on some substance for its *subject*, in which it is, or to which it belongs; so motion, shape, quantity, weight, are *modes* of

## COMMENTARY.

Now it is certain that the arguments of the Busrah Grammarians in support of the *مَصْدَر* as the Root, are absolute and of general application, while those of the Grammarians of Koofah for the *فَعْل* are confined to the rules of permutation alone, from which no general principle can be inferred. But if no other proof were necessary to establish the original of a word, then it would follow that *يَعِدُ* originally *يُوعِدُ*, and *أَكْرَمُ* originally *أُكْرِمُ*, were the roots, and the different persons of these Verbs, such as *نَعِدُ* *أَعِدُ* *تَعِدُ* and *نَكْرِمُ* *يَكْرِمُ* *أَكْرِمُ* the branches, which no one will assert.

the *body*; knowledge, wit, folly, love, doubting, judging, are *modes* of the *mind*; for the one cannot subsist without *body*, and the other cannot subsist without *mind*.\*— “We mean by the word *حَدَّثَ* ‘says Ruzee,’ a thing existing in or by some other thing, as *beating, going, extension* and *contraction, &c.*” So far the terms are clearly identified.

Further. “Modes are either *essential* or *accidental*. An *essential Mode* or *Attribute*, is that which belongs to the very Nature or Essence of the Subject wherein it is; and the Subject can never have the same Nature without it, such as *Roundness* in a Bowl, *Hardness* in a Stone, *Softness* in Water, *Vital Motion* in an Animal, *Solidity* in Matter, *Thinking* in a Spirit:” All these *Modes* are comprehended in the Definition *أَسْمُ حَدَّثَ* and are all Arabic Infinitives and the Sources of Derivation.”

Again. “An *Accidental Mode*, or an *Accident*,† is such a Mode, as is not necessary to the being of a thing, for the Subject may be without it, and yet remain of the same Nature that it was before; or it is that Mode, which may be separated or abolished from its Subject: So *Smoothness* or *Rough-*

أَعْجَبَنِي ضَرْبُ زَيْدٍ عَمْرًا { The beating of Amr by Zued astonished me : *lit.*  
Zued's beating Amr, &c.

In both these examples the word ZUED is *grammatically* in the Aorist Case, from its relation to the Infinitive, but *virtually* in the Nominative, as its Agent.

Annotation.

*ness, Blackness or Whiteness, Motion or Rest, are the accidents of a Bowl ; for these may be all changed, and yet the body remain a Bowl still : Learning, Justice, Folly, Sickness, Health, are the accidents of a Man : Motion, Squareness, or any particular Shape or Size, are the accidents of Body : —So Hope, Fear, Wishing, Assenting and Doubting, are accidents of the Mind, though Thinking in general seems to be essential to it.” These are all Arabic Infinitives.*

“ *Modes* belong either to *Body* or to *Spirit*, or to *both*. *Modes of Body* belong only to matter, or to corporeal Beings ; *Modes of Spirit* belong only to minds ; such as *Knowledge, Assent, Dissent, Doubting, Reasoning, &c.* *Modes* which belong to *both* have been sometimes called *mixed Modes* or *human Modes*, for these are only found in human nature, which is compounded both of body and spirit ; such are *Sensation, Imagination, Passion,*” &c. See Watts’s Logic.

That the term حَاق as defined by the Arabian Grammarian corresponds with a logical *MODE* as above detailed will hardly I think be disputed, and that this precise word is peculiarly applicable to the *Musdur* or Infinitive we have the Grammarian’s own words as authority اعلم ان معنى المصدر عرض “ Know that by the *Musdur* is meant *MODE*.” This *MODE* he adds is necessarily dependant on some Subject for its existence as well as for other subordinate distinctions of

The INFINITIVE is constructed in five different ways.

1. It is connected as the مُضَاف or Governing word in the relation of the aorist case with an AGENT, the OBJECT being at the same time expressed, as in the last example.

2. It is connected as the مُضَاف in the relation of the aorist case with an AGENT, the OBJECT not being expressed.

EXAMPLE.

عَجَبْتُ مِنْ ضَرْبِ زَيْدٍ I was astonished at the beating of Zued.

Annotation.

ولا بد لنا في الوجود من محل يقوم به وزمان ومكان وبعضه، *object, end, instrument, time and place*, but these distinctions he observes are not inherent but superinduced on the Infinitive in its genuine state, which is formed to denote a *MODE* without reference to any particular person or thing, or as he expresses it, *المصدر الذي هو موضوع لسانح الحدث*, "The Infinitive is formed to denote (a pure essence) a *MODE* or manner of being abstractedly."

The result of this comparison may perhaps convince us that the Arabians have borrowed their general notions of Science from the Greeks, and that their *NOUNS* and *INFINITIVES*, or their *NAMES* of *MODES*, comprise the two great philosophical divisions of *SUBJECT* and *ACCIDENT*, from which the celebrated *CATEGORIES* of Aristotle have been formed. This is indeed a fact that will hardly be disputed. Every system of Arabic logic sets out with this twofold arrangement, and although their modern Grammarians have not adverted to this circumstance in their enquiries into the true nature and definition of the parts of speech, I think it is evident that this must have been the original cause of the present grammatical classification. "The multitude of *ideas* 'says Harris,' treasured up in the human mind and which, bearing reference to *things*, are expressed by *words*, may be arranged and circumscribed under the following characters. They all denote either *SUBSTANCE* or *ATTRIBUTE*."

This Division of words and things into two general Classes is taken from the *SOPHISTA* of Plato, and is thus given by *SANCTIUS* in his *MINERVA*. "*Quicquid enuntiatur, aut est permanens, ut Arbor, Durum; aut fluens, ut Currit, Dormit. Res permanentes sive constantes vocamus, quarum natura diu*

3. It is connected as the مُضَاف in the relation of the aorist case with an OBJECT, the AGENT not being expressed, having then a passive signification, and being used as the AGENT's proxy.

EXAMPLE.

عَجَبْتُ مِنْ ضَرْبِ زَيْدٍ  
أَيُّ مَنْ أَنْ يُضْرَبَ زَيْدٌ } I was astonished at Zued's being beaten.

4. It is connected as the مُضَاف in the relation of the aorist case with an OBJECT, the AGENT being also expressed in the Nominative.

EXAMPLE.

عَجَبْتُ مِنْ ضَرْبِ اللَّصِّ الْجَلَدِ } I was surprised at the beating of the thief by  
(the headsman.

5. It is connected as the مُضَاف in the relation of the aorist case with an OBJECT, the AGENT being understood.

EXAMPLE.

لَا يَسْأَمُ إِلَّا نَسَانُ مَنْ دُعِيَ الْخَيْرُ "Man is not wearied with soliciting good."

Annotation.

*perstat: harum notam NOMEN dixere. Fluentes dicimus, quarum natura est, esse tamdiu quamdiu  
funt. Harum nota VERBUM est? Sanct. Minerv. Lib. II, p. 14.*

And hence I draw the following conclusions, that all MODES in their absolute and Indefinite capacities are GENERAL TERMS or arbitrary NAMES, affixed to certain combinations of simple ideas which have their existence only in the mind. That every MODE denotes an ATTRIBUTE, and that every ATTRIBUTE is capable of sundry modifications as to means, object, end, instrument, time, place, and other circumstances, including in fact the nine sub-divisions or Post-Predicaments into which this comprehensive GENUS has been distributed.

E e e

*Note.* The above rules of construction are only applicable to the INFINITIVE of a transitive Verb: when it happens to be neuter, it is constructed only in one way, namely in the relation of the aorist case with an AGENT.

أَعْجَبَنِي تَعُوذُ زَيْدٌ It surprised me, the sitting of Zued.

The AGENT of the INFINITIVE can never be concealed, nor can the Infinitive itself be preceded in composition by its مَعْبُول or governed word.

### Annotation.

This is absolutely capable of demonstration, for if we compare the *nine* subdivisions of ATTRIBUTE, with the common derivative forms or modifications of an Arabic MUSDUR; which are produced by the mere change of vowel points, or by the addition or elision of certain letters to and from the MODE in its radical form, we shall find them agree in almost every particular: For example, QUALITY abstractedly considered will be represented by the مَصْدَر; (and concretely by the الصِّفَةُ اِسْمُ اِلَهْمِيَّة) QUANTITY and RELATION by the اِسْمُ اِلَهْمِيَّة and اِسْمُ اِلَهْمِيَّة ACTION by the اِسْمُ اِلَهْمِيَّة PASSION by the اِسْمُ اِلَهْمِيَّة WHEN by the اِسْمُ اِلَهْمِيَّة WHERE by the اِسْمُ اِلَهْمِيَّة POSITION by the اِسْمُ اِلَهْمِيَّة and HABIT by certain properties of the conjugations which clothe the object with the sense of the radical. I do not pretend however to assert that this comparison is precisely accurate, indeed I have no doubt it might easily be improved, \* my object is merely to shew that an Arabic infinitive is capable of expressing by its derivative forms the entire series of predicaments or specific relations into which the ATTRIBUTE or MODE has been divided by Philosophers, and this I think I have effected. Aristotle has enumerated but four divisions of the Attribute namely, *Action, Passion, Habit and Position*, which he also comprises in the ἀπρότερον or INFINITIVE.

Here then we discover the true origin and sense of the INFINITIVE MOOD or MODE, a term familiar to every Schoolboy, yet strangely misunderstood by the most learned Grammarians. Sanctius, Sciopping, Perizonius and the Messieurs De Port Royal deny the propriety of the expression altogether, and Scaliger says the Infinitive is not a mood in act but in power, to which Vossius agrees.† “ Assentior autem Jul. Scaligero, qui actu monum esse negat, contra quàm vulgus non modò semidoctum putat, &c.”

\* I have omitted the اِسْمُ اِلَهْمِيَّة or Noun of Instrument.

† Vid. Voss. De Art. Grammat. Lib. V. p. 286.

THIRD ANALOGOUS GOVERNOR.

اسْمُ اَنْعَاعِلِ

The *third* is an ACTIVE PARTICIPLE, (اسْمُ اَنْعَاعِلِ) which possesses like the Infinitive the same regimen as its verb, that is, if derived from a neuter Verb it governs an agent in the Nominative as "زَيْدٌ ذَا اَبٍ" "The Father of Zued is standing;" and if from a transitive verb it governs both a Nominative and an Accusative.

EXAMPLE.

زَيْدٌ ضَارِبٌ غُلَامًا مَدْعِيًّا Zued's servant is beating Amr.

Its government is guided by certain conditions.

The sentence in which the Active Participle is employed must include either *present* or *future* time, with one of which it must necessarily be accompanied in order to complete its affinity to the Aorist tense of a Verb; for as it already resembles the Aorist in the number of its letters and vowel points, it acquires by this addition of present or future time a similitude in signification also.

Annotation.

"The INFINITIVE says Dr. Beattie, if you please may be called a form, but a *mode* it certainly is not!" Now what is a *MODE* but a *form* or *manner of being* abstractedly considered, a term synonymous with *QUALITY* or *ACCIDENT*, the ποιότης of the ancient Philosophers as opposed to οὐσία or *SUBSTANCE*, of which the *NOUN* and *INFINITIVE* were used as the verbal REPRESENTATIVES? The whole source of the error proceeded from not attending to this original distinction, and by taking the word *MODE* in its *relative* instead of its *absolute* signification, and to this perhaps we may trace the partial and consequently erroneous definition of it by Gaza in his Grammar L. IV; which Harris has unwittingly commended—βάλημα, εἰς ἓν πάθημα ψυχῆς, διὰ φωνῆς σημανόμενον.—*A volition or affection of the Soul, signified through some voice, or sound articulate.* See Hermes, p. 140.

The *QUALITY* of Verbs says the Roman Grammarian *Consentius* is either *finite*, or *infinite*. *FINITE* as denoting a certain person, a certain number, or a certain time, as *I read, I write.* *INFINITE*,

It must be connected with a SUBJECT (الْمُبْتَدَأُ) preceding it in the order of construction to which it forms the PREDICATE, as in the examples already given, or with a QUALIFIED NOUN (مَوْصُوف) to which it will be the ATTRIBUTIVE, (صِلَة).

And hence the Verb in this form or mode was called *Impersonal, Infinite*, and by the Greeks ἀπαρέμφατον or *Indefinite*.\* "Adeo, 'says Macrobius,' autem hic modus absolutum nomen rerum est, ut in significationibus rerum, quas Aristoteles numero decem κατηγορίας vocat, quatuor per ἀπαρέμφατον properantur, μένεται, ἔχειν, ποιεῖν, πάσχειν. Græco vocabulo propterea dicitur ἀπαρέμφατον, quod nullum mentis indicat affectum." Vid. Macrob. De Differ. Græc. Lat. Verbi. p. 325.

the **INFINITIVE MOOD** of a Verb, that is an indefinite or absolute **MODE** or manner of being, as opposed to **NOUNS** denoting **SUBSTANCES**, and this no doubt being a very important discovery I may perhaps claim the privilege of inserting a Q. E. I!

The Revd. Alexander Crombie, Author of the Etymology and Syntax of the English Language (a work in my opinion of very considerable merit) has adopted without consideration the vulgar error respecting the Infinitive mood, and says—"I concur decidedly with these Grammarians, who are so far from considering the **INFINITIVE** as a distinct **MOOD**, that they entirely exclude it from the appellation of verb." Had Mr. Crombie taken the trouble to judge for himself he would have decided differently, for he could not be ignorant that all such words as *running, leaping, flying, &c. &c.* were **MODES**, **MODES** of **ACTION**, but indefinite as to time, place, and other circumstances, and consequently **INFINITIVE MODES**. This is surely a very plain and simple matter of fact, and yet Horne Tooke himself that Hermes of critical sagacity has misunderstood the term mode and says, "The Infinitive appears plainly to be what the Stoics called it, the very Verb itself, pure and uncompounded with the various accidents of **MOOD**, of *number*, of *gender*, of *person*, &c. &c." and Bishop Wilkins proposes to alter the name. "That which is called the *Infinitive MOOD* should according to the true analogy of speech, be styled a *Participle Substantive*. There hath been formerly much dispute among some learned men, whether the notion called the *Infinitive MOOD* ought to be reduced according to the Philosophy of speech. Some would have it to be the *prime* and *principal* Verb, as

Annotation.

signifying more directly the notion of ACTION: and then the other varieties of the Verb should be but the inflexions of this. Others question whether the infinitive mode be a Verb or no, because in the Greek it receives articles as a Noun. Scaliger concludes it to be a Verb but will not admit it to be a MODE. Vossius adds, that though it be not *Modus in Actu*, yet it is *Modus in Potentia*, All which difficulties, (mighty difficulties indeed!) will be most clearly stated by asserting it to be a *Substantive Participle*.

But in the name of common sense, where lies the difficulty or impropriety of the term? Are not the chief objects of our thoughts THINGS or SUBSTANCES and their *Manners of being*? Are not the words *walking, flying, learning, dancing, sailing, sitting, &c. &c.* certain MODES or manners of being, applicable to certain objects? Are not these *manners of being, general words representing general ideas*, and therefore applicable to many particular things? May we not talk of the walking of a *Man*; the walking of a *Horse*, the walking of a *Dog*, and so on ad infinitum? Is not *walking* then a mere mode or manner of being, applicable to an indefinite number of objects and consequently particular to none? Is it not therefore *indefinite*? It expresses no *time*, no *person*, no *place*, in fact nothing but a certain *manner of motion*; is it not therefore a MODE expressing a *general idea*, and therefore an INDEFINITE an INFINITIVE MODE?

And now having the MODE termed *walking* for instance, a word expressive of a *manner of being*, applicable to a great variety of objects, if we wish to limit its general application we apply it to

*Note.* The PARTICIPLES ACTIVE termed الْمَبَالِغَةُ or PARTICIPLES of the Intensive or Superlative Degree, such as ضَرَّابٌ ; ضَرُوبٌ ; and مِضْرَابٌ , 'a great beater ;' عَلَّامَةٌ and عَلِيمٌ 'a very wise man ;' حَذِرٌ 'very cautious or prudent,' have the same government as the simple PARTICIPLES of the positive degree, and are guided by the same conditions, and although they lose under this form their resemblance to the Verb in the number of letters, yet their increased signification as INTENSIVE PARTICIPLES is considered an equivalent for that loss.

### Annotation.

some particular object, and say the WALKING of BARCLAY, by which combination the general idea becomes limited to a certain individual, but nothing more. If however we find it necessary to define the time in which the agent performed this MODE, this *manner of action*, we say Barclay walks—did walk, or will walk. Here we have the MODE *modified*, so as to express time and this we call the MODE *indicative*. If we desire the performance of the action, we say WALK, which is the MODE *imperative* and so on through all the other grammatical Modes or variations which we generally call *Derivatives*. Now these observations are equally applicable to every such word in the language, and consequently the term MODE is applicable to them also.

And so much for the INFINITIVE MOOD, a term perfectly applicable to an Arabic Musdur. That the word MODE is the best representative of حَدَث in its technical and Grammatical sense, I have endeavoured to prove, as well from the authority of the Arabian Grammarians themselves, as from the character of language in general, which being conversant about *things* or the *manner* of things, in other words about SUBSTANCES and MODES, (the chief objects of our ideas,) would necessarily have two characteristic verbal Classes to represent them, and these appear to me to be Nouns and INFINITIVE MODES.

It now only remains to be observed that besides the Infinitive as above described, there is another species of Noun in some measure resembling it, which the Arabian Grammarians term اِسْمٌ مُصَدَّرٌ or the INFINITIVE'S NOUN, like the ὀνομα ῥημα of the Greeks. Between these two Nouns, namely the اِسْمٌ مُصَدَّرٌ and the اِسْمٌ مُصَدَّرٌ there is precisely the same distinction in point of sense, as between the word *drink* and the Participial Noun *drinking*, when used as a general term in such an example as the following :

## FOURTH ANALOGOUS GOVERNOR.

إِسْمُ الْمَفْعُولِ

The *fourth* Analogous Governor is a PASSIVE PARTICIPLE (إِسْمُ الْمَفْعُولِ) and has the same regimen as a Verb in the passive voice, governing a Noun in the Nominative as THE SUBSTITUTE OF THE AGENT.

The conditions attending its government require that it be used in a sentence, including either *present* or *future* time, and be constructed with a SUBJECT in the same manner as the ACTIVE PARTICIPLE.

### EXAMPLE.

زَيْدٌ مَضْرُوبٌ غَلَامُهُ الْآنَ وَغَدًا } Zued's boy is beaten *now*, or will be beaten  
to-morrow.

### Annotation.

“ Bacchus ever fair and ever young,  
Drinking joys did first ordain;  
Bacchus' blessings are a treasure,  
Drinking is the soldier's pleasure.”

In which lines the word *drink* might be substituted for *drinking* without much detriment to the sense, for *drinking joys* mean the *joys of drinking* or *drink*, and the same may be observed of all other words of the same classes as *grief, grieving; kiss, kissing; love, loving; &c.* How then shall we ascertain the true character of these words? What for instance is *love* as opposed to the general term *loving*? It is certain that they are both general terms descriptive of certain sensations of delight or Modes of pleasure in the mind, and as such may become either the subject or predicate of a Proposition, but this explains nothing, and if we ask the Arabian Grammarians for an explanation they answer us by pointing out a mere distinction in their application. The *إِسْمُ مَضْرُوبٍ* say they, has no other government than that of any common Substantive Noun, but this again is controverted by the Grammarlans of Koofah and Bagdad, who bestow upon it the very same regimen as that of the *مَضْرُوبُ*, and even admitting the fact which I believe to be just, it differs nothing in this particular from

Or with the Article *أل* as its ANTECEDENT (مَوْضُول).

EXAMPLE.

الْمَضْرُوبُ غُلَامُهُ زَيْدٌ The person whose boy was beaten is Zued.

Or with a QUALIFIED NOUN as its مَوْضُوف.

Annotation.

the Infinitive of a Neuter Verb. The essential distinction then, for some essential distinction there certainly is, between the INFINITIVE and the INFINITIVE'S NOUN or ISMO MUSDUR, is not in my judgment simple *abstraction*, that is, making the one an abstract Noun in opposition to the other; for as I have observed before they are both *general*\* or *abstract* terms, but rather in the idea of *action* or *energy* conveyed by the INFINITIVE, which *action*, Locke observes, however various, and the effects almost infinite, is all included in the two ideas of *thinking* and *motion*. These are his words, "For *action*, being the great business of mankind and the whole matter about which all laws are conversant, it is no wonder, that the several *Modes* of *thinking* and *motion* should be taken notice of, the ideas of them observed, and laid up in the memory and have *names* assigned to them; without which, laws could be but ill made, or vice and disorder repressed. Nor could any communication be well had amongst men, without such complex ideas, with *names* to them: and therefore men have settled *names* and supposed settled ideas in their minds of *Modes* of *ACTION*, distinguished by their causes, means, objects, ends, instruments, time, place and other circumstances, &c."

The real distinction then between the MUSDUR and ISMO MUSDUR seems to be this. The ISMO MUSDUR signifies simply the name of a *MODE* without any reference to *action* or *energy*; the MUSDUR denotes a more complex idea and indicates indefinitely the *action*, *energy* or *being* of that *MODE*. LOVE for example is a name assigned to a certain feeling of delight, but LOVING is something

\* Words are *general* says Locke, when used for signs of *general Ideas*, and so are applicable indifferently to many particular things, that then which general words signify is a sort of things, and each of them does that by being a sign of an *ABSTRACT IDEA* in the mind. Locke. B. III. S. 3.

Or with a Substantive Noun as its ذُو الْحَالِ .

أَمْ مَضْرُوبٌ غُلَامُهُ } Was his boy beaten?

Annotation.

more, being another name by which we indicate the *action* or efficacy of that feeling called Love; and hence we perceive the real cause of its possessing an *active* or *transitive* government, in contradistinction to the ISMO MUSDUR, which having no reference to action, has no other regimen than that of any common Substantive Noun.

Action indeed is applicable to every Infinitive, and this the Arabian Grammarians acknowledge by dividing all the verbs in the Language into two general Classes, which they term *متعدي* and *لازمي* that is, verbs denoting ACTIONS *transitively*, (the *actio transiens* of Logicians;) and verbs denoting actions *inherent* or *inseparable*, (*actio immanens*) which we are accustomed to call neuter; and hence we perceive the propriety of the Rule laid down in the Commentary, namely, that the *إِسْمُ الْفَاعِلِ* or ACTIVE Participle may be derived from either a transitive or intransitive verb, which is saying in other words that every *action* supposes an *agent*.

This idea of *action* is conveyed in other languages by terminations, as beat-*ing*: verber-*ans*: τυρ-*ων*\* &c. but in Arabic with a few particular exceptions, there is no distinguishing mark by which we can discriminate the INFINITIVE from the INFINITIVE'S NOUN, so that we must trust entirely to the context for the sense of either. Every PARTICIPLE however in our language when used as a general term, is the just representative of an Arabic مَصْدَر or INFINITIVE,

\* Not unlike the oon or TUNWEEN in Arabic.

If none of the conditions above described accompany the PASSIVE PARTICIPLE, it possesses no government, but is used simply as the مُصَاف to the Noun immediately following it.

If however the PASSIVE PARTICIPLE be made definite by the theArticle آل it becomes independent of the above conditions, and governs like the Verb in every form of past, present or future time.

EXAMPLE.

جَاءَ الْمُضْرُوبُ غُلَامُهُ  
الآنَ أَوْ غَدًا أَوْ أَمْسٍ { That person came whose boy was beaten  
now, or will be beaten to-morrow, or was  
beaten yesterday.

Annotation.

I mean every ACTIVE PARTICIPLE formed by adding the termination *ing* to the IMPERATIVE of a Verb, which seems in this case to possess a similar power to the characteristic *to*, and therefore it may perhaps be said that we have two *Infinitives*,\* as,

Drink-*ing* is the soldier's pleasure, or

To-drink is the soldier's pleasure,

Formed by annexing *ing* and prefixing *to*,† to the Imperative in one sense and the اِسْمُ مَصْدَرٍ Drink, in the other.

The real office of the Verb is supposed also by Plato to indicate action τό μὲν ἐπὶ ταῖς πράξεσιν ἐν δέλεμιν, ὅ ἡμὰς ποιεγομεν, declarationem quâ actiones significantur verbum dicimus,‡ which is nothing but the *res fluentes* already quoted, but however this may be, it will scarcely I think be denied that action, energy or being is the essential characteristic of every Arabic Infinitive.

\* This has indeed been remarked before by Mr. ELPHINSTON in his "PRINCIPLES of the ENGLISH LANGUAGE,"—"The INFINITIVE MOODS are two, the INFINITIVE MOOD, and the PARTICIPLE." See the work Vol. 1, p. 259.

† Which Casaubon and Minsheu ridiculously make the Greek NEUTER Article τὸ, and Horne Tooke the Imperative δὲ, corrupted into *to*.

‡ De Ente, p. 183. "C'est ce QUI de l'esprit," says the Abbé SICARD, but this is not applicable to a verb in its Infinitive state.

FIFTH ANALOGOUS GOVERNOR.

الصِّغَةُ الْمُشَبَّهَةُ

The *fifth* Analogous Governor is a simple ATTRIBUTE or ADJECTIVE (الْمُشَبَّهَةُ الصِّغَةُ) which resembles the ACTIVE PARTICIPLE, as well in the forms of declension, as in its attributive character, as حَسَنٌ; حَسَنَانِ; حَسَنُونَ; حَسَنَةٌ; حَسَنَاتٌ analogously with ضَارِبٌ; ضَارِبَانِ; ضَارِبُونَ; ضَارِبَاتٌ; ضَارِبَتَانِ; ضَارِبَاتٌ.

Annotation.

It must however be remembered that the proper subject of discussion in this work is the *MUSDUR*, and not the *ISMO MUSDUR*. It is this that the Arabian Grammarians include among the Analogous governors, ascribing to it the same regimen as its own Verb, which they say must in every case denote either *transitive* or *intransitive* Action. In this contracted sense it must be acknowledged that *MODE* cannot be considered as a strictly correlative term, for although it may be truly affirmed that every Arabic *MUSDUR* is a *MODE*, yet we cannot add conversely that every *MODE* is a *MUSDUR*; as the word *MODE* embraces *every manner of being* without exception, and a *Grammatical MUSDUR* includes only *MODES of action, energy or being*. These considerations led me to remark at the commencement of this note, that the true *grammatical* sense of an Arabic Infinitive was not easily conveyed by any one word in our Language, and as my object in this enquiry is truth and nothing but truth, I deem it my duty candidly to state and examine every objection that occurs to me on the subject. But the word *MODE*, although far more comprehensive in signification than a *grammatical MUSDUR*, is yet clearly the term that the Arabian Grammarians had in view in the Definition اِسْمٌ حَدَّثَ and as it embraces, also the *ISMO MUSDUR*, which is only distinguished from the other by its want of *verbal* government, (being generally represented by the same word) I conceive it to be upon the whole the least exceptionable, if not the only just representative of an Arabic Infinitive.

But the word *EVENT* which is usually explained an *incident, the consequence of an action, the conclusion or upshot of any thing*, I confess I cannot but consider as inapplicable to any Arabic *INFI-*

The ATTRIBUTE OR ADJECTIVE (الصِّفَةُ الْمَشْبُوهَةُ) is derived from a neuter Verb, and is formed to denote THE UNINTERRUPTED OR PERPETUAL EXISTENCE OF THE SENSE OF ITS INFINITIVE IN AN AGENT OR SUBSTANTIVE NOUN. It possesses also the same regimen as its own Verb without any restriction as to time, but is subject to the conditions already described as applicable to the ACTIVE and PASSIVE PARTICIPLES, with the exception of that relating to ANTECEDENT, as the Article أَنْ to which the ADJECTIVE is annexed is not considered the مَوْضُوع.

### Annotation.

NITIVE whatever.\* It may indeed be frequently applied to an ISMO MUSDUR, for WAR, PEACE, POVERTY, &c. are called *events*, but these are not Nouns of ACTION, nor have they any *verbal* government, and cannot therefore be properly considered as INFINITIVES, in the true sense of the term Infinitive as laid down by the Arabian Grammarians.

Having given a short view of what appears to me to be the true character of an Arabic مَصْدَر as well as an اِسْمٌ مَصْدَرٌ to both† of which the term MODE is generally applicable, I shall close this Note with a few observations on the اِسْمٌ لِّفَاعِلٍ and الصِّفَةُ الْمَشْبُوهَةُ two attributive Nouns derived from the Infinitive, which seem to require some explanation.

### OF THE اِسْمٌ لِّفَاعِلٍ AND الصِّفَةُ الْمَشْبُوهَةُ.

It has already been shewn that every Arabic Infinitive in the general sense of the term Infinitive, has a twofold signification: one under the character of an اِسْمٌ مَصْدَرٌ by which is simply indicated a MODE, the other under that of a مَصْدَرٌ properly so called, by which is denoted the *energy* or *being* of that MODE in a state of action. Now as every Object represented by a Substantive Noun, may be described by its *active* and *passive* qualities, i. e. by the *actions* which it performs, or by the *qualities* with which it is modified or distinguished, so would language naturally be provided with distinct words to express them, and hence the two Derivative Adjectives, in Arabic termed اِسْمٌ لِّفَاعِلٍ

\* EVENT from *evenio* to *come forth*, and in this sense the Verb itself is used by the old writers.

"O that thou saw'st my heart, or didst behold,

The place, from whence that scolding sigh *evented*."

† Duo sunt INFINITIVI in Lingua Anglo-Saxonica, &c. Vid. Gram. Ang. Sax. Auct. G. HICKESIO.

The word governed by the ADJECTIVE (مَعْبُول) is sometimes in the Accusative Case, either from its resemblance to the proper OBJECT of a transitive Verb when definite; or as the مَعْبُول when indefinite; and sometimes in the Aorist Case from its relation to the ADJECTIVE. All Active Participles are formed by analogy, but ADJECTIVES by the authority of prescription, as حَسَنٌ beautiful, صَعْبٌ difficult, and شَدِيدٌ hard.

and الصِّفَةُ المَشْبَهَةُ of which the former, as its name imports, is properly the NOUN of the AGENT, but used as a VERB Adjective, for the purpose of describing the ACTION in which the AGENT is employed, as زَيْدٌ ضَارِبٌ ZUED IS BEATING; and the latter a simple ATTRIBUTE or QUALITY supposed to exist in the Object to which it is imputed, as زَيْدٌ حَسَنٌ ZUED IS BEAUTIFUL, and to this observance of active and passive qualities as signified by these derivative words, and to this alone, we are perhaps to trace the distinction drawn by the Arabian Grammarians between them, namely, that the one, meaning the اِسْمُ الْفَاعِلِ denotes the temporary existence of a MODE in an agent, and the other i. e. the الصِّفَةُ المَشْبَهَةُ its permanent or uninterrupted continuance.

This general rule however regarding permanent Attributes is certainly erroneous, for to prove it true, we must prove that every MODE or QUALITY as expressed by the ATTRIBUTE or الصِّفَةُ المَشْبَهَةُ must be necessarily permanent in the object to which it refers, which if granted would confound accidental and essential Modes altogether, and produce as many strange phenomena in nature as in language. A poor man for instance would necessarily live and die a pauper, and if sick and gouty into the bargain, so much the worse, for no hope could be reasonably entertained of his cure. A PREGNANT WOMAN (حَبِلًا) might in vain look for an accouchement, for the QUALITY being permanent, she could not consistently with the grammatical canon (or more properly speaking the grammatical BULL) expect the slightest change in her condition! yet seriously, the Arabian Grammarians maintain, that the Adjective or Attribute denotes properly its own perpetual existence in the Substantive Noun to which it is imputed, and the phrase اَنَا كَرِيْمٌ حَسَنٌ 'ANACREON\* IS BEAUTIFUL,' must accordingly denote that ANACREON

THE SIXTH ANALOGOUS GOVERNOR.

الْإِسْمُ الْمُضَافُ

The first of every two Nouns connected together in the relation of the Aorist Case, will invariably govern the second or render it مَجْرُور provided it be not accompanied with the Article *أل*, or terminate in تَنْوِين or what is considered a substitute for the TUNWEEN, namely the نُون of the Dual or Plural Number.

is now, ever was, and ever will continue beautiful.\* But beauty has in all ages been considered as a very transitory quality, a quality indeed of so uncertain a texture, that the Poets have compared it to a brittle gem, a bubble, a rose, dew, snow, smoke, wind, air, in fact to a—*momentarily*!

Vitrea gemmula, fluxaque bullula, CANDIDA FORMA est,

Nix, rosa, ros, fumus, ventus et aura, nihil!

and Anacreon himself the true Καλος γέρον of antiquity, was obliged to acknowledge that the Ladies, (who in matters of love and beauty are perhaps as good metaphysicians as the Arabian Grammarians) very soon found out that his age had effected a change.

"Like Καλος in the Greek, *fulcher* in the Latin, *bello* in the Italian, and *beau* in the French, it is applied to moral and intellectual as well as to physical or material qualities.

1. This RELATION between two Nouns (إِضَافَةٌ) has the force of the preposition *لَآم* understood, provided the *مُضَافٌ إِلَيْهِ* or governed word is neither of the same GENUS as the *مُضَاف* nor the *ظَرْفٌ* to it.

EXAMPLES.

Annotation.

The women tell me every day  
That all my bloom has past away,

“ Behold this mirror with a sigh,  
“ The locks upon thy brow are few,  
“ And like the rest, they're withering too!”  
Whether decline has thinu'd my hair,  
I'm sure I neither know nor care,  
But this I know, and this I feel,  
As onward to the tomb I steal,  
That still as death approaches nearer,  
The joys of life are sweeter, dearer,  
And had I but an hour to live  
That little hour to bliss I'd give!

MOORE.

To this mode of objection I can easily conceive the answer of an Arabian Grammarian. He will remark that certain objects are *characterized* by certain qualities, and consequently that although a female is not always *pregnant*, yet *pregnancy* is a quality *habitual*, or at all times attributable to her, in other words that the *power* of conception is co-existent with female nature. This is good, but it will not prove the point in question, for *pregnancy* can neither *exist* before, nor after certain periods, so that after all it is but a *temporary*, a *transitory*, in fact a

Annotation.

mere *nine month's* quality, and like the attribute *supposed* to be conveyed by the ACTIVE PARTICIPLE or <sup>أ</sup>اسْمُ الْفَاعِلِ can only become *permanent* by the repetition of the action !

This distinction of *permanent* and *transient* qualities is commented upon by the Greek Philosophers. Aristotle has many passages of a similar nature to that under discussion, one of which Harris thus paraphrases in his ARRANGEMENTS.

“ And now with respect to all kinds of QUALITIES, whether corporeal or incorporeal, there is one thing to be observed, that *some* degree of *permanence* is always requisite; else they are not so properly *Qualities*, as *incidental affections* (Πάθη.) Thus we call not a man *passionate* because he has occasionally been angered, but because he is prone to *frequent anger*; nor do we say a man is of a *pallid* or a *ruddy* complexion, because he is *red* by immediate *exercise*, or *pale* by sudden *fear*, but when the paleness or redness may be called *constitutional*. ”

But first let us consider the true nature and use of an <sup>أ</sup>اسْمُ الْفَاعِلِ or ACTIVE PARTICIPLE, which may enable us to judge of the propriety or impropriety of the distinction supposed to exist between it and the simple ADJECTIVE.

The PARTICIPLE ACTIVE or <sup>أ</sup>اسْمُ الْفَاعِلِ is used in two ways. First as a VERB ADJECTIVE, and secondly as a SUBSTANTIVE NOUN. As a Verb Adjective alone it is properly the subject of Grammar, and in this character it describes the *state* or *action* in which any object exists or is employed, as <sup>أ</sup>زَيْدٌ قَائِمٌ “ Zued is standing; ” or <sup>أ</sup>زَيْدٌ ضَارِبٌ عَمْرًا “ Zued is beating Amr, ” and has therefore the precise force of the Aorist Tense of a Verb, governing in the one case the agent in the nominative, and in the other,

3. Or to the Preposition *فِي* if the *مُضَافٌ إِلَيْهِ* be the *ظَرْفٌ* to it.

EXAMPLES.

Annotation.

the object in the accusative. It seems to possess *virtually*, the united force of a predicate and copula, or of an attribute and assertion, and may be resolved into *is* and the sense of the *Musdur* or *INFINITIVE*, as *يُضْرَبُ* equivalent to *يُضْرَبُ* Zued is beating. Now this is the proper *grammatical* character of an *اسم الفاعل* which has always the same government as its Verb, and is therefore termed an *ANALOGOUS* governor, but as a *SUBSTANTIVE NOUN* it possesses no other regimen than that of the *Aorist Case*, and has nothing to do with Arabic Syntax.

These remarks are in a great measure applicable to the *الصِّفَةُ الْمِشْبَهَةُ* which is also viewed in the double capacity of a *SUBSTANTIVE NOUN* and a simple *ADJECTIVE* or *ATTRIBUTE*, and having also a near resemblance to the *اسم الفاعل* it is termed by the Arabian Grammarians *الصِّفَةُ الْمِشْبَهَةُ* or *ATTRIBUTE* resembling an *ACTIVE PARTICIPLE*.

What then may be asked is the difference between the *اسم الفاعل* and the *الصِّفَةُ الْمِشْبَهَةُ* in their grammatical characters as governing powers? The difference in my judgment is very obvious and very simple, and consists merely in this, that in construction the first or *اسم الفاعل* describes the *action* in which the Agent is employed: the second or *الصِّفَةُ الْمِشْبَهَةُ* the *quality* supposed to exist in, or belong to accidentally, a given object or *Substantive Noun*. In other words, one denotes *ACTION*; the other denotes *QUALITY*, as *يُضْرَبُ* Zued is beating; *يُحَسِّنُ* Zued is beautiful. In the first sentence a certain *ACTION* as *beating* is predicated of Zued, and in the second a certain *QUALITY* as *beauty*, but without any necessary inference that the one is *transitory*, and the other *perpetual*, for *يُضْرَبُ* is equal to *Aorist* or *Indefinite* time, and *يُحَسِّنُ* means nothing more than *نَوْحَسِّنُ* (possessed of beauty,) which is also indefinite as to time, and this is all the distinction that appears to me to exist between them.

THE SEVENTH ANALOGOUS GOVERNOR.

الْأَسْمُ التَّامُّ

The seventh is a PERFECT OR INTEGRAL NOUN (الْأَسْمُ التَّامُّ) that is a Noun rendered perfect in itself, and independent of the relation of the Aorist Case.

Annotation.

The simple ATTRIBUTE OR ADJECTIVE as expressing a *passive* quality, may perhaps have given rise to the idea of *permanence*, and the Active Participle as expressing an *active* quality, may also have led Grammarians to consider it as somewhat *transitory*, but in point of fact there is no such distinction between them, and the idea of *duration* whatever it may be, will in every possible case I imagine depend upon the nature of the VERB, as well as our own previous knowledge of the SUBJECT. For instance, the phrase <sup>الْأَرْضُ مُتَحَرِّكَةٌ</sup> 'THE EARTH IS MOVING,' conveys to every one acquainted with our astronomical System, an idea of *permanence*, as the quality of *mobility* predicated of the Earth, is known to be continual,\* but if we say <sup>الْكُرَّةُ مُتَحَرِّكَةٌ</sup> 'THE BALL IS MOVING,' we shall then be understood to infer merely that the BALL is IN MOTION temporarily, and will again be at rest. Yet the Active Participle is the same in both examples and cannot be said to convey any idea of duration either *temporary* or *permanent*. It simply describes the *action* in which the Agent is employed with an indefinite relation as to Time. The very same may be observed of the ATTRIBUTE, for if we say, 'THE IRON IS HAND,' we shall be understood to speak of a quality co-existent and essential to the Substance Iron, and therefore *permanent*, but let us substitute another Adjective, and say the IRON is HOT, and the *permanence* of the quality immediately vanishes, for we all know that *heat* is accidental and not essential to Iron, and from this very idea of its *transitory* existence arose the common adage,

Strike while the IRON is hot.

With the ACTIVE PARTICIPLES and ATTRIBUTES, considered as Substantive Nouns, Arabic Syntax has properly no concern. They assume then a different character in composition, and have the same government as common Substantive Nouns. For instance the words ظَالِم a TYRANT; حَارِس a SENTINEL; طَائِر a Flier or BIRD, and سَائِل an Asker or BEGGAR, are all active Participles in the character of Substantive Nouns, though they may be literally translated and used as Verbal Adjectives, for ظَالِم means *Tyrannising*; حَارِس *Keeping watch*; طَائِر *flying* and سَائِل

\* To the Arabs who believe in the Ptolemaic Hypothesis, the phrase would convey no idea of *permanence* whatever, on the contrary they would either imagine we were lying, or talking of an Earthquake!

This is effected either by its terminating in TUNWEEN (تَنْوِينٌ) or in what is considered equivalent to the Tunween, namely the Noon (نُونٌ) of the Dual or Plural Number, or by its being followed by the مُضَافٌ إِلَيْهِ or governed word.

### Annotation.

*asking or begging.* But in the character of AGENTS, they become complex Terms, expressing both qualities and subjects, and are therefore assumed as SUBJECTS in a Proposition, not however with any reference to the transitory nature of those qualities, as the Arabian Grammarians would fain make us believe: on the contrary they denote the *habitual possession* of the attributes or MODES referred to, and signify that the objects are *accustomed to do so and so*; for what is a TYRANT but a man who is known to *practice* tyranny? Or a SENTINEL, but a man whose *duty* it is to keep watch? Or a BEGGAR but he who *subsists* by, or whose *trade* is begging? In truth the ACTIVE PARTICIPLE as a SUBSTANTIVE NOUN invariably denotes in Arabic the *habitual DOER* of an action, though in its VERBAL capacity it may perhaps be considered as *temporary*, as اَنَا كَرِيُونَ شَارِبٌ *Anacreon is tipling.*

I have already remarked that the اَصْفَةُ الْمَشَبَّهَةِ is used like the Active Participle in the double capacity of a SUBSTANTIVE NOUN, and a simple ATTRIBUTE, resembling in application an Active Participle, as its name imports. In the first capacity it is used as a concrete or complex Term, to express both a subject and quality conjoined, as بَخِيلٌ a MISER or *avaricious man* (MISERUS) طَبِيبٌ a PHYSICIAN or *one who professes the art of healing* (MEDICUS.) غَرِيبٌ A STRANGER, or *man from a foreign Country.* (PEREGRINUS) &c. (where it may be observed the Latin adjectives have precisely the same force as the Arabic;) but these are all strictly speaking, simple Adjective Nouns, which indicate by their *prescribed* form, that they are meant to be added to other Nouns, "so that both together may answer the purpose of complex terms,"\* and in this character as simple *modifiers*, they are the proper subject of grammar. Now between an ACTIVE PARTICIPLE and a simple ADJECTIVE considered as Verbal and Analogous Governors, we have already pointed out the distinction, (a distinction that comprises the two grand divisions of MODES or *manners of being*, that is, the modes of *action*, and the modes of *being* without *action*; as the first attributes ACTION to a subject, and the second QUALITY, but neither with any adsignification of time,) and it now only remains to consider in what it is that they differ when used as COMPLEX TERMS.

\* See Div. of Purley. Vol. 11, p. 439.

It governs an INDEFINITE NOUN in the Objective Case, as its 'TUMEEZ, (تَمِيمِز) or Noun of specification, which removes the uncertainty supposed to exist in the INTEGRAL NOUN.

EXAMPLES.

رَطْلُ زَيْتَا	A pound of oil.
مَنْوَانِ سَبْنَا	Two Minas of butter.
عِشْرُونَ دِرْهَمًا	Twenty Dirhums.
خَاتَمُ زَيْدٍ ذَهَبًا	Zued's ring of Gold.
مِثْلُهُ عَسَلًا	Its compliment of honey.

Annotation.

With regard then to the *transitory* or *permanent* nature of the attributes expressed by either, there is not in my judgment any distinction whatever. They are both *concrete* TERMS that differ only in the *nature* of the *qualities* they express. The ACTIVE PARTICIPLE being the abbreviated sign of a complex idea, i. e. of a SUBJECT and an *Active* QUALITY, as حَارِس a SENTINEL, or *man who keeps watch*; and the ADJECTIVE NOUN, the sign of another complex idea, i. e. of a SUBJECT and a *Passive* QUALITY as, بِخَيْل a MISER, or *man in whom the passion of avarice is supposed to exist*. Compare all the PARTICIPLES and ADJECTIVE NOUNS in the Arabic Language (as complex Terms) and this distinction and no other I think will be found to characterize them; and indeed the reason appears obvious, for the PARTICIPLES are derived from ACTIVE Verbs, the ADJECTIVE NOUNS from Neuter, or from those that merely express *corporeal* or *mental* qualities in a passive state.

If we have occasion to mention an OBJECT *habitually* employed in any given action, or whose *profession* is agency or business of any sort, we use the ACTIVE PARTICIPLE as a Substantive NOUN, and say عَامِل an AGENT; رَاوِي a STORY-TELLER; حَارِث a HUSBANDMAN; خَادِم a SERVANT, &c. and on the contrary, if we intend merely to describe an OBJECT as *possessing* some particular QUALITY, we make use of the ADJECTIVE NOUN, and say بَكْر a VIRGIN, (which is also an Adjective) *Virgo Intacta*. شَيْخ an OLD MAN, *Sener*. شَرِيكَ a PARTNER, *Consors*, &c. without any reference to their *active* states.

Annotation.

But I repeat again that Arabic Syntax has nothing to do with ACTIVE PARTICIPLES, and ADJECTIVE NOUNS, as COMPLEX TERMS. They are employed in Grammar as *Verb adjectives*, and simple Attributes or Qualities, and are used *descriptively*, to define either the *action* in which a given Agent is employed, or the *Quality* with which a given Object is invested. As such they are necessarily *adjected* to Nouns, and although their *grammatical* office is to *describe* the Active or Passive state of a Substantive, they come afterwards like the Participles and Adjectives of other Languages, to stand for the Substances themselves.

In this manner are PASSIVE PARTICIPLES employed, for مَحْبُوبٌ which means literally *beloved*, is used as a Substantive Noun to denote a MISTRESS. مَعْبُودٌ *Worshipped*, or God. مَكْتُوبٌ *Written*, a BOOK. مَمْلُوكٌ *Possessed*, a SLAVE or SERVANT. رَسُولٌ *sent*, a PROPHET. مَعْبَا *Hidden*, an ENIGMA. أَسِيرٌ *Imprisoned*, a PRISONER. &c. &c. upon which principle of Analysis, Horne Tooke has explained above 2,000 abstract terms in the English Language, a process that may be adduced as a very powerful argument in favor of Etymology, as it enables us to trace the true and legitimate character of Words.

It appears to me therefore upon the whole, that the distinction laid down by the Arabian Grammarians, between the ACTIVE PARTICIPLE, or اسْمُ الْفَاعِلِ and the SIMPLE ATTRIBUTE, or الصِّفَةُ الشَّيْئَةِ with regard to the *temporary* or *permanent* nature of their qualities, is founded in error and misconception, and that the source of this error proceeds from confounding the different offices of these words together, that is, by comparing the ATTRIBUTE or ADJECTIVE when used as a COMPLEX TERM or Substantive Noun, with the ACTIVE PARTICIPLE as a *Verb Adjective*, which being then considered as equivalent to the Aorist Tense of a Verb, may well enough have given rise to the *transitory* nature of its attribute, when applied to any given Agent or Object. For instance the word جَالِسٌ is a simple ATTRIBUTE or ADJECTIVE, signifying properly *familiar*, but like our own Adjective it is used in the sense of a COMPLEX TERMS to denote an *intimate* or *companion*, a FAMILIAR. If however we use the ACTIVE PARTICIPLE, and say زَيْدٌ جَالِسٌ we convey a very different idea, as the Participle جَالِسٌ is equal to the Aorist يَجْلِسُ and the phrase will mean that, ZUED is SITTING, which though indefinite as to time, has certainly something *transitory* in its nature as opposed to the complex Term جَالِسٌ which does not mean indeed a *perpetual sitter*,

Annotation.

that would be ridiculous, but merely a companion with whom we are accustomed to *sit*, and corresponds precisely with the Latin *SODALIS*, "*qu. sedales quòd unà sederent et essent.*"

I have extended this Note so far beyond the limits of the Text, that I cannot with propriety persevere in the discussion, yet I relinquish it with reluctance, for I consider it as one of very considerable importance, and one by no means satisfactorily explained by the Arabian Grammarians. The few remarks here offered may however enable the reader to carry on the enquiry himself. I have pointed out what appears to me the source of the error in the distinction drawn between the Active Participle and the simple Attribute, (which should properly be called the *VERB ADJECTIVE* and the *ADJECTIVE NOUN*.) This if correct, will be found of importance, but much information is still wanting to elucidate the true nature of *ARABIC ADJECTIVES*, and this I may possibly attempt in a future work. I shall therefore close this enquiry with a few promiscuous remarks (extracted from *RUZEE* and the *WAFEEA*) on the *ACTIVE PARTICIPLE* and *ATTRIBUTE*.

The *PARTICIPLE ACTIVE* and *Simple ATTRIBUTE* or *ADJECTIVE*, agree in denoting a *MODE* or manner of being; they assimilate also in form as to number and gender, and follow the same rule of construction with the single exception alluded to in the Commentary.

There are however some particulars in which they differ. The Adjective for instance, is derived from a Neuter Verb alone; the Participle Active may be derived from either a Neuter or an Active Verb. The Adjective denotes the *perpetual*, the Participle Active the *temporal* existence of an attribute in a given Object or Substantive Noun. The Adjective has seldom any resemblance in point of form to the Aorist of a Verb, as *حَسَنٌ*, *ظَرِيفٌ*\*, though some examples of this are known to occur as *ظَاهِرٌ*, *ضَامِرٌ*†, on the contrary the Active Participle is always found conformable to the Aorist.

The word governed in the Objective Case by the Adjective, is never allowed to precede it in construction: that of the Active Participle may. We can therefore say *زَيْدٌ أَنَا ضَارِبٌ* 'I am beating Zued,' but we could not say *زَيْدٌ وَجْهٌ حَسَنٌ* 'Zued has an ingenious countenance.'

There are other distinctions between them which I omit to record as unimportant.

## COMMENTARY.

### Annotation.

The ADJECTIVE may or may not be constructed with the definite article **ال**, and in either case its governed word is **مضاف** to another; or made definite by the Article; or neither one or other: hence we have six peculiarities of construction; but besides these the governed word is itself constructed in three different forms, namely in the NOMINATIVE, AORIST, or OBJECTIVE Cases, which multiplied by six as given above, leave eighteen varieties of construction, as may be seen in the following:

TABLE.

٣	٢	١	
3. زيد الحسن وجه ٤	2. زيد الحسن الوجه ٥	1. زيد الحسن وجهه ٢	In which the governed word is in the Nom. as the Agent.
6. زيد حسن الوجه ٩	5. زيد حسن وجهه ٨	4. زيد حسن وجهه ٧	
9. زيد الحسن وجهها ١٢	8. زيد الحسن الوجه ١١	7. زيد الحسن وجهه ١٥	In which the gov. word is in the OBJECTIVE CASE &c.
12. زيد حسن وجهها ١٥	11. زيد حسن الوجه ١٢	10. زيد حسن وجهه ١٣	
15. زيد الحسن وجهه ١٨	14. زيد الحسن الوجهه ١٧	13. زيد الحسن وجهه ١٤	In which the gov. word is in the AORIST CASE.
18. زيد حسن وجهه ٢١	17. زيد حسن الوجهه ٢٠	16. زيد حسن وجهه ١٩	

Annotation.

Of the examples however given in the above table, two are rejected by Grammarians as improper, namely the 13th in which the Adjective Noun is made definite by the Article *ال* and connected in the relation of the Aorist Case with its own *مَعْمُولٌ* which is itself constructed with a Pronoun in the aorist case; and the 15th in which the Adjective Noun is made definite by the Article, and connected in the aorist case with an Indefinite Noun.

The propriety of the 16th example is also disputed by some and defended by others, but I willingly resign the office of umpire to any other Commentator.

Of the fifteen remaining examples the 1st, 4th, 8th, 9th, 11th, 12th, 14th, 15th and 16th, are termed by the Arabian Grammarians *أَحْسَنُ* i. e. *elegant or perfectly correct*. The 7th and 10th *حَسَنٌ* or *unobjectionable*, and the 2d, 3d, 5th and 6th, *قَبِيحٌ* or *bad*.

I shall close this long grammatical narcotic on Infinitives, Verb Adjectives and Noun Adjectives, (which the generality of readers may probably feel inclined to class among the *Insolubilia de Aliaco*) with a few extracts from Arabic Authors by way of illustration. In the following poetical panegyric on a departed Hero, extracted from the 20th Muqam of the Muqamat-ool-Hureerce will be found a variety of Adjective Nouns, employed both as simple Attributes and complex Terms.

O People I have a surprising story to unfold,  
 From which the wise and ingenious may derive advantage!  
 I was acquainted in my youthful days with a potent Hero,  
 Whose warrior-blade was sharp and piercing,  
 Who entered the lists of combat in crested pride,  
 Confident of success and fearless of danger.

\* The word بَيْضُ the Plural of بَضْرُ means both brilliant swords and beautiful women. I have tried to preserve the quibble but I fear not very successfully.

At the vigour of his onset the most impervious holds gave way,  
And he made himself an easy passage through the narrowest defiles.  
He never encountered an adversary in single combat,  
Without returning from the tilt with a blood stain'd spear :  
Nor assaulted a fortress however fenc'd and barricado'd,  
Without being hailed on the erection of his standard, with the auspicious cry,  
' Assistance from above and a speedy victory ! '\*  
Thus he lived triumphant :—arrayed every night in the stately garb of youth.  
Giving rapture to the young and beautiful and receiving it in return,  
Nay caressed by all as an idol of perfection.  
But time which continu'd to extract his vigour and diminish his strength,  
At length succeeded in effecting his fall,  
And reduced him to so mean and shriveled a plight,  
That his very friends beheld him with contempt.  
The exorcists and cunning men in vain attempted his recovery,  
And the most skilful Physicians were baffled in their attempts :  
Then indeed he abandoned arms, for arms had abandoned him,  
After giving and receiving many a hostile salute.  
He is now dejected, drooping and crest fallen, †  
And such is the fate of man who is born to misery.  
Behold to-day the warrior stranger on his funeral couch,  
And who will bestow a trifle to have him decently interred?

The reader will perhaps smile when he hears, that this 'sable warrior,' this Arabian Achilles, so feelingly and pathetically eulogized by Abou Zued, is no other than the celebrated Bonus Dens or Hellespontiacus of the Ancients! Of this un-

I resided at Busrah,\* said a certain Arabian Yorick, as a parson and professor of humanity, and was one day a good deal amused by a strange fellow, squint-eyed, straddle-footed, lame of both legs, with rotten teeth, stammering-tongue, staggering in his gait like a man intoxicated, puffing and blowing like a thirsty dog, and foaming at the mouth like an angry camel, who came up and seated himself before me. Whence come you, said I, O father of gladness? From home please your worship said he. And pray where is your home I rejoined, and what is the cause of your journey? My home he replied, is near the great mosque, adjoining the poor house, and I am come for the purpose of being married, and to beg you will perform the ceremony. The object of my choice is this long-tongued, importunate hump-backed, scarlet-skinned, one-eyed, no-nosed, stinking, deaf, wide-mouthed, daughter of my uncle. Do you agree Miss Long-tongue said I, to marry this Mr. Pot-belly? Ay, said the lady (with a great deal of doric brevity!) then accept my friend cried I, this woman for your wife, take her home, cherish and protect her. So he took her by the hand and departed. Now it happened that about

nine months after that they both returned to me, rejoicing and had hardly seated themselves when my old friend Adonis called out.—O your worship we have been blessed with a most sweet and fascinating child, and are come to request you will bless and give him a name, and offer up a prayer for his parents. Now what should I behold, but a little urchin stone-blind, hair-lip'd, without the use of its hands, splay-footed, bald-headed, ass-eared, bull-necked not possessing one sense out of the five, and altogether frightful and deformed, in short a perfect epitome of all the qualities of his parents. At this sight I said to them, be thankful for this darling boy, and call him Oombsoor,\* for truly he has all your perfections combined in himself, and that child is truly admirable who resembles his parents!

A certain deaf fisherman was angling one day in the Tigris, and was accosted by another deaf man who had lost his way, with 'peace be to you.'—A poor fisherman, said he.—I belong to the tribe of BUNZE LAM\* answered the traveller, and have lost my way. Why truly said the fisherman the shoals of fish that

\* A villanous tribe of genuine Arab Hottentots with whom I had the misfortune to get acquainted on my way to Bagdad. They inhabit the wilds of AL-HUD about a hundred miles above Koorna on the Tigris, and though nominally subject to the Pasha of Bagdad, lose no opportunity of opposing his power, plundering his subjects, and way-laying every unfortunate traveller that may have occasion to pass through their inhospitable territory.

haunt the Tigris are amazing, and the voraciousness with which they swallow up the bait delights me, I have therefore taken my station here, and expect good sport.—I have lost my way said the traveller, for the path is entirely defaced by the overflowing of the river.—A net rejoined the fisherman, is by no means so good, for its meshes are always getting out of order,—no, no, a hook if you please for my money.—I am going to Bagdad, continued the other, what direction should I take? you must know being an inhabitant of this part of the country; shall I turn to the north, or towards yonder date-trees?—I can supply you with as many fish as you like answered the fisherman, for I have caught a great many to day, both great and small, but I do not part with them for less than 20 foollooses, ready cash!—The man thinking he had directed him towards the north, went away and the fisherman remained where he was.

OF THE GOVERNMENT TERMED مَعْنَوِيّ OR ABSOLUTE.

By ABSOLUTE GOVERNMENT (الْعَامِلُ الْمَعْنَوِيّ) is meant a government perceived by the mind, and in which a word as an agent has no concern. It is distinguished in two ways. *First*, as governing the SUBJECT and ATTRIBUTE in the NOMINATIVE Case, which is the *primary* form of a word in construction, or the state of a Noun uninfluenced by any Verbal governor, as زَيْدٌ مُنْطَلِقٌ

Annotation.

The Government termed مَعْنَوِيّ as opposed to لُغَوِيّ or VERBAL, may be properly denominated ABSOLUTE or Independent, and like the Absolute Case in Greek, it comprehends the Participle or Verbal Adjective with its substantive Noun, or the مُسْتَدَالِيَّةُ and مُسْتَدَالِيَّةٌ which are termed also the Subject and Predicate, and which seem to correspond with the QUOD LOQUIMUR and DE QUO LOQUIMUR of European Grammarians. This therefore may account for the mark of Case assigned by the Arabs to the Aorist Tense of a Verb, for the Aorist as well as the Participle forms the مُسْتَدَالِيَّةُ, the QUOD LOQUIMUR or Predicate, to the مُسْتَدَالِيَّةُ or THING SPOKEN OF, and both terms connected together in discourse by means of this ABSOLUTE GOVERNMENT, produce the connexion termed اسْتَدَالٌ which constitute a perfect or complete Proposition.

ZUED is GOING. Secondly, as governing the AORIST tense of a Verb, which arises from its aptitude to supply the place of a Noun, as زَيْدٌ يَعْلَمُ ZUED KNOWS, in which example the Aorist يَعْلَمُ is marked مَرْفُوع or governed in the Nominative Case, being considered the adequate substitute for a Noun, as we may use عَالِمٌ in its place without any detriment to the sense, and say زَيْدٌ عَالِمٌ. Its government is therefore ABSOLUTE.

### Annotation.

The Nominative Absolute in Greek, which may be considered equivalent to the AMIL MANUWZE in Arabic, is accounted for by Grammarians by supposing a verbal ellipsis, as they contend that there can be no Nominative without a Verb either expressed or understood. This doctrine may, perhaps be applied to the Case in question, though the ancient\* Arabian Grammarians endeavour to account for the construction in a different manner, alledging that the Subject governs the Predicate, while others† again pretend that they mutually govern each other.

With regard to the government assumed by the Aorist, it is the opinion of KISSAEE that it should be considered VERBAL, and not ABSOLUTE as laid down in the Commentary, and this Verbal regimen he ascribes to one of the four formative letters of the Aorist, namely تاء ياء ألف and نون which he thinks must give the Tense رَفَع. This doctrine is very gravely refuted by other Grammarians, but the reader I imagine will readily dispense with their arguments, and I shall accordingly permit them to rest in peace.

The NOMINATIVE CASE,‡ or that Case in Arabic which expresses the subject of a proposition without the means of any Verbal Governor, may be illustrated by the following extract from HERMES. "It has been said already in the preceding chapter, that the great Objects of natural union are SUBSTANCE and ATTRIBUTE. Now from this *Natural Concord* arises the *Logical Concord*

\* OONDOOLOOSEE records this opinion of SEEBUWH. It is also noticed by BOO ALLE, ABOOL FUTUH, &c.

† KISSAEE and FURRA, &c.

‡ Quand le nom jouit le premier rôle dans la phrase, et qu'il exprime le sujet *en action*, ou l'objet duquel on affirmait quelque *qualité*; comme ce sujet attire et fixe tous les regards; que l'esprit le nomme le premier; que la forme de son nom devint se prêter à cet emploi, et pour cela, être *nominative*, on disoit que le nom étoit alors à la chute *nominative* (CASUS NOMINATIVUS,) et nous disons *cas nominatif*, ou cas qui sert à nommer le sujet.

Eléments De Grammaire Générale, Par,

M. L'Abbé SICARD. Tom. prem. 169,

The Grammarians of Koofuh in general, ascribe the government of the Aorist, to the simple circumstance of its being unaccompanied with any of those particles which occasion it to terminate in نَصَب or جَزْم and this also is the opinion of Ibno Malik.\*

### Annotation.

of SUBJECT and PREDICATE, and the *Grammatical Concord* of SUBSTANTIVE and ATTRIBUTIVE.† These CONCORDS in SPEECH produce PROPOSITIONS and SENTENCES, as that previous CONCORD in NATURE produces NATURAL BEINGS! this being admitted"— "What?—Why that Nouns and Adjectives like natural BEINGS coalesce and bring forth SENTENCES!" we proceed by observing, that when a Sentence is regular and orderly, *Nature's Substance*, the *Logician's Subject*, and the *Grammarians's Substantive* are all denoted by that Case, which we call the NOMINATIVE." He then goes on to explain how the ATTRIBUTE in imitation of its SUBSTANTIVE would appear in the NOMINATIVE Case also.—"Every Attributive would as far as possible conform itself to its Substantive, so for this reason, when it has Cases, it imitates its Substantive, and appears as a *Nominalive* also. When it has no Cases, it is forced to content itself with such assimilations as it has!" Surely this is not the language of the ΕΡΜΗΣ ΛΟΓΙΟΣ;—the mighty oracle of winged words and philosophical arrangements! See Hermes, B. the second, p. 280.

\* A celebrated Grammarian author of the ألفعاء Alfecah.

† Harris classes Verbs, Participles, and Adjectives under the general head of ATTRIBUTIVES, and for this, the poor man has not escaped the lash of the Wimbledon Aristarchus. "Harris should have called them either *Attributes* or *Attributables*; but having terminated the names of his three other Classes (*Substantive*, *Definitive*, *Connective*) in *Ive*, he judged it more regular to terminate the title of this Class also in *Ive*: having no notion whatever, that all common terminations have a meaning and probably supposing them to be, (as the Etymologists ignorantly term them) mere *protractiones vocum*; as if words were *wire-drawn*, and that it was a mere matter of taste in the writer to use indifferently either one termination or another at his pleasure."
